To the Professional and Beginner:

HOW TO MAKE MARKET GARDENING PAY

THE PROFESSIONAL MARKET GARDENER and the one about to begin

Market Gardening are alike anxious to make market gardening pay.

TO MAKE MARKET GARDENING PAY and how to do it, is just as important

to the professional as to the beginner. To both we say, the prime essential is to procure the best

seeds that money can buy. Buy the best varieties. Select the earliest, the most productive,

the best carriers and the best sellers. Don’t hesitate a moment to plant the best — the price is

of little consequence providing you get just what you are seeking for, and secure the highest

prices; the market will invariably pay well for the best. Perpetual seeds will never produce good crops, nor vegetables of first quality. In vegetables as in fruits it is

high quality that counts; high quality always insures highest market prices. Best quality and highest

market prices spells success to every market gardener who grows for the home or distant market.

Many thousands of market gardeners throughout the United States have found by actual experience

that the best seeds obtainable are only to be had from The Moore Seed Company, 339 Market Street, Philadelphia, Pa., who have made it a life long study and work to produce the best

varieties and strains of seeds calculated to insure the most profitable and abundant crops and that will command the highest prices on any market, no matter where sold.

WE ARE CAREFUL to only recommend the best varieties.

WE ARE CAREFUL to use the utmost care and caution in selecting our seed stocks as well as in growing our seed crops.

WE ARE CAREFUL not to send out any seeds we have not given a good and thorough test for germination. Our tests in this respect are very thorough and are conducted both in greenhouse and in the open ground as occasion requires.

SOMETHING NEW. We are something new and good in seeds all the time. Our seeds are in greater de-

mand than ever before; in 1910 our sales were 33% greater than any previous year in our history, and we assure you it will be big money in your pocket to buy our seeds from us. Write us if you wish to know anything about our seeds.

CONCLUSION. We wish to acknowledge our many thanks to our customers for their loyal and patron-

age. It affords us great pleasure to receive your orders and receive your kind expressions of satisfaction, for it indicates that our efforts to please and assist you have been successful. We have tried harder this year than ever before to offer you in this catalogue newer and better varieties than last year, as well as a larger assortment and at prices that will induce every market gardener who seeks the greatest profits to send us an order.

HIGH GRADE TOMATO SEED

IS OUR GREAT SPECIALTY

All our Specialty Tomato Seed is grown, selected and saved exclusively,

from the best specimens for seed, and from what is usually known as crown and second settings, and is of the highest quality. Moreover, no seed is grown twice in succession on the same plot and blight of any kind is unknown among any of our tomato seed crops.

Market Gardeners, Large Growers, Shippers and Canners will find

our Selected Tomato Seed reliable in every respect.

We have produced, at great expense and personal labor, superb varieties

well calculated to meet all the requirements of soil, climate, locality, market, as well as the many exacting demands of the most critical consumer.

Healthy, Blight-Proof Seed Stock. We also exercise the greatest

care in growing all our seeds, that it not only be pure and true to name, but also

that it be saved from strong, healthy and vigorous plants, free from all traces of dis-

case of any kind. Our customers may thus rest assured that the seed they get from

us will be absolutely free from any trace of disease whatsoever.

The growing of high grade Tomato Seed has long been a leading and important

specialty with us and we probably distribute more seed to critical market gar-

den and select canning establishments than any other three seedsmen in the

United States.

Remember, the Main Thing in Making a Good Crop of

Tomatoes is to Get Your Seed from Us. Buy the Best

Large Planters and Associations wanting to purchase seeds in unusually large quantities, should write for special prices. Although we have made prices very low in this catalogue, yet where a number of pounds or bushels are wanted, we can frequently supply at a lower price than by a single pound or bushel. In writing, give us a list of quantities and varieties required, and we will return list promptly with our LOWEST COST PRICE FOR THE LOT.

OUR BUSINESS RULES

ABOUT WARRANTING SEEDS,

ETC.— The Moore Seed Co. give no warranty, express or implied, as to description, quality, productiveness or any other matter of any Seeds, Bulbs or Plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

REMIT MONEY WITH ORDER.—

Money can be sent safely by Post Office Order, Express Money Order, Registered Letter, Bank Draft or Check.

OUR PRICES include bags, boxes and free cartage to depot. Bags are free excepting on Clover, Timothy and Millet.

SEEDS BY MAIL.—Four cents per half pound and eight cents per pound must be added to our wholesale prices if seeds or bulbs are to be sent by mail. Packages, Ounces and Quarter Pounds of Flower and Vegetable Seeds will be sent, postage free, to any part of the United States. Postage for Beans and Peas, please add 15 cents per quart; and for Corn 10 cents per quart to catalogue prices, except where noted.

Please WRITE your NAME, POST

OFFICE, COUNTY and STATE as distinctly as possible, especially the name. Many orders reach us lacking either or both; customers when writing about unsigned orders will aid us in identification by mentioning the articles ordered and quantity.

GIVE FULL SHIPPING INSTRUCC-

IONS on each and every order you send. To avoid chance of error, never write letters on the same sheet as your order.

IF GOODS ARE WANTED C. O. D.,

25 per cent of the amount must accompany the order.

WE SELL ½ pounds at pound rates, ½ pecks at peck rates, ½ bushels at bushel rates except where noted.

A WORD TO OUR CUSTOMERS

It will be Money in Your Pocket to

Buy the Best Seeds

MANY THOUSANDS of the most suc-

cessful MARKET GARDENERS and

FLORISTS throughout the United

States use no other

WHY WE ARE MOST RELIABLE.—

Because we are the only seedsmen in the United States who grow seeds especially for

Market Gardeners and Florists. All our

time and energy is devoted exclusively to producing the purest and best qualities of seeds possible for the market, garden and florist trade. We send out only such strains as are adapted to the wants of the most critical, and offer nothing that should disappoint those engaged in this important business.
FARMOGERM (High Bred Nitrogen Fixing Bacteria)

MAKES Poor Soil Good Soil

The FARMOGERM Method

DOES AWAY with the use of expensive fertilizers by using nature’s method of supplying nitrates. Lime, potash and phosphates are comparatively cheap, and in many cases there is an abundant supply of these in the soil which can be made available for plant food if right methods are used—and the “Farmogerm Method” is the right method. If you wish to improve the condition of your land and grow bigger and better crops, send for book on the “Farmogerm Method.” What it has done for thousands of people during the past two years it will do for you.

BUILDS UP the land to the highest state of fertility and productiveness. Don’t give your plants stimulants when they want food. The Farmogerm method not only adds nitrates to the land but improves its physical condition. Nitrate of Soda is a temporary stimulant that soon leaks out of the soil and is not a permanent benefit. Farmogerm supplies at one tenth the cost not only enough nitrates for the growing crop but stores in the soil a large amount for future crops of other kinds.

IN THE GARDEN. Increase your crop of peas, beans and sweet peas from fifty to one hundred per cent. by treating the seeds with Farmogerm. A few minutes extra work and the expenditure of fifty cents means sweeter and better peas and beans, larger vines, heavily loaded with pods, and a longer bearing period. When you can gain so much for so little, isn’t it worth while to try?

ON THE FARM. The practice of sowing clovers, cowpeas and soy beans in rotation with corn, wheat, cotton and other crops is of great benefit. You can double the benefit if you treat the seeds with Farmogerm and follow instructions for putting the land in suitable condition.

ALFALFA. The greatest forage crop grown—yields two to eight cuttings per year, an average of seven to twenty tons per acre. Contains one-third more protein (muscle building food) than clover, and in food value equals a full grain ration. Horses, mules, cattle, hogs and chickens relish it and fatten rapidly on it. The largest stock farms advocate its growth. Eighty per cent. of the farms of this country can grow it, if they use the “Farmogerm Method.” You cannot grow alfalfa on wet, soggy land or land with a close lying, hard pan sub-soil; but how much of your farm is like that?

COST

Farmogerm is put up in bottles in the following sizes:

<table>
<thead>
<tr>
<th>Garden size, containing material to treat the seeds for 1/6 acre of land, $0.50 each</th>

for Peas, Beans and Sweet Peas; also a mixed culture good for all three.

IN ORDERING state what crop you wish to plant; quantity wanted, and ask for book on the FARMOGERM METHOD:
WHAT OTHERS HAVE DONE YOU CAN DO!

PROF. JACOB G. LIPMAN, of the NEW JERSEY AGRICULTURAL EXPERIMENT STATION, states that he got good results from the use of Farmogerm for alfalfa, Cowpeas, and Garden peas.

E. B. FRED, VIRGINIA AGRICULTURAL EXPERIMENT STATION, says: "All of Old Process showed contamination. Modly mouldy. Farmogerm was entirely free from contamination."

W. T. BROOKS, Director MASSACHUSETTS AGRICULTURAL EXPERIMENT STATION, says: "In reply to your letter of the 21st inst., I beg to say that the only one of your cultures which we found it possible to try during the past summer is the culture for alfalfa, and we are naturally unable to make a final report at this time.

We made four different comparisons between seed treated with your culture in accordance with directions and untreated seed and at the present time find that conditions are about as follows:

1. In the case of two of the comparative tests, the growth of the alfalfa which was sown early in August is materially better where your culture was used. It is ranker and of a darker green color.

2. In the case of the other two comparisons there is but little difference; but we judge that the alfalfa where the inoculated seed was sown is slightly better than the other.

3. Examination of the roots shows that in the case of all four comparisons, nodules are quite numerous on the roots where your culture was used, but relatively few where the uninoculated seed was sown.

W. S. SAYERS, of the MICHIGAN STATE AGRICULTURAL COLLEGE, says: "Pure cultures of nodules bacteria suitable for the various legumes may be used in inoculating the seed just previous to sowing. This method has been used very extensively during the past three years, usually with marked success."

MAURICE MULVANY, of the UNIVERSITY OF TENNESSEE, says: "I found the bottle of material sent me to contain a pure culture of living Pseudomonas radicola.

GEORGE W. CARVER, DlRector TUSKEGEE INSTITUTE, ALA., says: "My plot of crimson clover which was inoculated with Farmogerm is about three times better than the uninoculated; it is exceedingly luxuriant while the other is straggly, pale and not worth cutting."

EDWARD R. MINNS, INSTRUCTOR, CORNELL UNIVERSITY, N. Y., says: "We are studying the problem of producing more and better forage per acre by planting beans with corn intended for silage, and so far we feel quite certain that some form of inoculation for the beans is necessary to success."

J. N. HARPER, DlRector, SOUTH CAROLINA AGRICULTURAL EXPERIMENT STATION, says: "I have your letter of Oct. 21st with the enclosed letters from gentlemen who have tried your Farmogerm, and found it to be of great value. We have tested Farmogerm in a small way and from the results obtained and very much pleased with it."

CHAS. B. MORREY, of the OHIO STATE UNIVERSITY, says: "In reply to your inquiry concerning the cultures which you sent me last spring for test, I will say that as you remember, the cultures were to be used for laboratory tests only, and not for field experiments. The cultures were given to advanced students, to have them isolate the organisms if possible, and to make pot cultures of the different varieties of legumes to determine whether the organisms were virulent or not. The cultures were obtained in pure culture from each sample sent. The pot experiments also show that the cultures were virulent in that nodules were formed on the plants tested while the control pots showed no nodules. The experiments were satisfactory in every respect."

L. B. JUDSON, N. Y., COLLEGE OF AGRICULTURE, says: "I take pleasure in stating that I have every confidence in your method of preparing cultures of bacteria for inoculating the various leguminous crops. I believe that the processes you use have all the value you claim for them, and that your method of stock bottles in which you send out cultures, is a very valuable device.

Your work to me seems full of great promise for the farming industry."

F. O. CLARK, BEREA COLLEGE, KY., says: "Your letter of October 21st inquiring as to the results obtained from the use of Farmogerm, is at hand. In our school garden we planted several plots in sweet peas and Canadian Field Peas, using Farmogerm on every other plot. I was quite surprised to find the plants grown in the plots where Farmogerm was used, were nearly twice the size of those on the other plot. This test indicates that your bacteria are of the right sort, and well up. Wishing you success in extending the use of Farmogerm and thus the use of legumes.

RED CLOVER

See the Difference in Growth.

Gentlemen—I am in receipt of your letter of October 8th, inquiring as to the results I obtained in the use of Farmogerm for alfalfa seed. I take much pleasure in advising you that I am an enthusiastic convert to Farmogerm, and that the results secured by its use were all that the most exacting could ask for. This stand was the best that I have ever seen and after harvesting sixty bushels of oats per acre that weighed 400 pounds to the bushel, which I planted as a cover crop with the alfalfa, I trenched the land and have just cut a crop of alfalfa of good quality and fair yield. The stand is the best that I have ever seen or grown, and I am very pleased with it.

Please accept my esteem, and best wishes for your continued success, believe truly, (Signed) H. G. LEAVITT.

P. S.—I planted 400 acres in all to alfalfa, all of the seed for which was treated with Farmogerm.

Grand Valley, Colo., Nov. 8, 1909.

EARL-THOMAS FARMOGERM CO.

Dear Sirs:—Your Company has been recommended to me by H. G. Leavitt, of Scottsbluff, Neb. I am writing to ask you to send me some of your pamphlets or any information to which you may have in regard to using your bacteria with alfalfa seed. We will plant about 200 acres of alfalfa in the spring, and I would like very much to use your bacteria in connection with the seed, as I have seen some wonderful results around Scottsbluff, Neb.

Hoping to have an early answer, Yours truly,

(Signed) R. HAVEMEYER.

Scottsbluff, Neb., Dec. 6, 1909.

EARL-THOMAS FARMOGERM CO.

Gentlemen:—It is my intention to plant between 400 and 800 acres in alfalfa this spring and I should like to inoculate all of the seed and, as you know am favorably inclined towards your "dope" as my foreman calls it. As you suggest, will you please send me a special estimate on quantities ranging from 400 to 800 acres, and oblige.

Yours very truly, (Signed) HAYWARD G. LEAVITT.

EARL-THOMAS FARMOGERM CO.

Gentlemen:—I put in a piece of alfalfa at Orchard Farm the past summer that has made a most remarkable growth. July 1st, 1000 pounds of lime was applied per acre and the same amount of basic slag. The seed was inoculated with the alfalfa bacteria you sent and soon on the 30th of July the pasture was ready for grazing. In forty-seven days the plants reached twenty-seven inches in height and in sixty days when cut they measured thirty-two inches. This is equal to any acre of irrigated alfalfa in the country. Shall put in more of it next year.

Yours truly, (Signed) GEORGE T. POWELL.

Gentlemen:—In reply to your inquiry of the 8th inst., I will say that I used Farmogerm according to the instructions given me, but the results were not the same between the different varieties of legumes on various kinds of land. Old worn out sand-land with yellow subsoil, stiff clay land, and black friable land. The season was very unfavorable: soon after planting there was a long wet spell followed by a drought that lasted until the present time. The consequence of the season is, many of the pea plants died from want of moisture and the weed is small but quite full of fruit, averaging a very fair crop. All these lands are old grown land that will not produce peas of itself, so I feel repaid for my trouble and expense in using Farmogerm, notwithstanding the unfavorable circumstances. The corn also was considerably benefited by Farmogerm, I consider it more beneficial to growing crops than any commercial fertilizer I have tried.

Yours truly, (Signed) E. E. SESSOMS.

Gentlemen:—Yours of the 8th before me and in reply am glad to say that I received a very fine stand of clover from seed inoculated with Farmogerm. The land is a clay, not very heavy, was well limed, sowed to buckwheat which was plowed in green, then last fall the piece was sowed to rye and timothy. This spring the clover inoculated with Farmogerm was sown broad-cast and it is now looking like a well-kept lawn, rich green. The clover looks remarkably healthy and growing.

I will need some more Farmogerm of 95 next season.

Respectfully, (Signed) R. P. WATSON.

FOR SALE BY

THE MOORE SEED CO.

339 MARKET STREET.

Moore Seed Co.
SEED CROWEES AND IMPORTERS.

FREE, a handsome collection of flower seeds, embracing many fine sorts.

IMPORTANT TO YOU, A FAVOR TO US.
American Poultry Journal

Oldest, Largest and Best Poultry Paper in the World
Volume 40; 64 to 164 pages monthly. Acknowledged authority on all poultry subjects.

If you want to make more money out of your fowls; if you want to get good results with less hard work; if you want to learn to breed for exhibition fowls; if you want to know what to do each month in the poultry yard, send for

AMERICAN POULTRY JOURNAL, 358 Dearborn St., Chicago

By sending this coupon you can get American Poultry Journal for 35c for one year (regular price 50c). This bargain can only be secured by sending in this coupon with 35c. If you secure another subscriber at 35c we will send you our ‘Hand Book of Useful Information” especially written for beginners.

All recognized varieties of Poultry, Turkeys, Ducks and Geese both Male and Female PRINTED IN COLORS

We will print in colors in American Poultry Journal every recognized variety of poultry, turkeys, ducks and geese raised in America, both male and female. Nearly 200 specimens. Something never before undertaken in the poultry world. These illustrations are beautiful in color and true in markings, relative size, correct shape and no poultry fancier can afford to be without them. Poultry men have long desired and demanded a complete set of colored pictures of fowls. This is absolutely the first and only opportunity ever offered to get them. The complete set cost us $5 000. Think of getting such a wonderful collection in a poultry paper for 35c a year. Write your name and address in space below and address your envelope to

Total amount of order,
We have over 1,000,000 Strong Two-year-old Roots ready for our Customers

$2.25 Buyers of 10, 50, 75 or 100-lb. lots of any variety of Asparagus Seed will be quoted special prices upon application.

STARKEY'S MAMMOTH EARLY PROLIFIC

ASPARAGUS

THE BEST AND MOST PROFITABLE SORT TO GROW

This highly valuable new variety has been grown early for a number of years by one of Philadelphia's most successful market gardeners. It was selected by him from the largest and handsomest asparagus ever sent to this market, from ten days to two weeks earlier than his neighbors could plant which he always realized very high prices. This asparagus has attracted much attention from dealers and commission merchants generally throughout the State, all anxious to get it. The color is notably different from the famous Barr's Philadelphia Mammoth or Palmetto, while the stalks are more tender and succulent. Its mammoth size can be realized from the fact that in whole crops three stalks will average a pound in weight, and it requires much less labor in cutting and bunching, thus lessening the expense of marketing. Everyone who ever saw this highly valuable variety pronounces it many times superior to any other known sort. It is beyond question the finest, largest, earliest and most profitable for the market gardener to grow. Stalks frequently measure two inches in diameter, and even when twelve to fifteen inches long are perfectly tender. The quality is exceedingly fine, and sells rapidly and remains in good condition several days after being ready to cut. It is very productive, throwing up a perfect mass of large-sized stalks of medium green color and very handsome appearance, and invariably commands a much higher price than any other variety. Our customers advise us that it never shows any trace of rust. 

Barr's Philadelphia Mammoth. Oz. 10c., 1/2 lb. 15c., 1 lb. 20c., 5 lbs. $1.00; two-year-old roots, per 100 60c., 1,000 $4.00.

Conover's Colossal. Oz. 10c., 1/2 lb. 15c., 1 lb. 20c., 5 lbs. $1.25; two-year-old roots, per 100 60c., 1,000 $4.00.

Donald's Elmira. Prices of seed: Oz. 10c., 1/2 lb. 20c., 1 lb. 50c., 2 lbs. 75c.; strong roots, two-year-old, per 100 75c., 1,000 $3.50, (50 roots furnished at 100 rates), 5,000 roots and over $4.50 per 1,000.

Palmetto. True stock. Oz. 10c., 1/2 lb. 20c., 1 lb. 50c., 2 lbs. $2.50; very strong two-year-old roots, per 100 60c., 1,000 $3.50; 5,000 roots and over $4.50 per 1,000.

Bournvallet's Giant. Very early; good quality. Oz. 15c., 1/2 lb. 25c., 1 lb. $1.00; strong two-year-old roots, per 50 60c., per 100 75c., per 1,000 $6.00.

Giant Early Argenteuil Asparagus. Oz. 10c., 1/2 lb. 25c., 1 lb. 35c. Two-year-old roots, by express or freight, 70c. per 100, $6.00 per 1,000.

ARTICHOKE

SUTTON'S SELECTED LARGE GREEN GLOBE. Pkt. 10c., oz. 25c., 1/2 lb. 75c., lb. 82.75.

SUTTON'S COLOSSAL ARTICHOKE ROOTS. The best and cheapest hog food known. It is without question the greatest root hog known to the world. Its yield is so enormous, bordering on the fabulous, that one can scarcely believe the quantity that can be grown from an acre of our Colossal Artichokes. Farmers who have given them a thorough trial the past year report yields from 40 to 1,200 bushels per acre. It cannot too strongly urge upon every farmer to plant a barrel or more this spring. Plant the Artichokes where you can allow them to remain, and your hogs, if turned into them, will grow fat and healthy, and will not know what sickness is. They need not be dug in the fall; the hogs should be turned in on them, and will help themselves by rooting for them. One acre will keep from 25 to 50 head in fine condition from October until April, except when the ground is frozen too hard for them to root. They are also highly recommended for milch cows, increasing the yield of milk and at the same time improving their condition. They are well adapted to any soil where Corn or Potatoes can be grown. One barrel will seed an acre, though we prefer 3 barrels to 2 acres, and they should be cut the same as Potatoes, one eye to a cut being sufficient, planted in April or May, in rows 3 feet apart and 1 foot in the rows, and covered about two inches deep. To destroy them, they should be plowed under when the plant is about a foot high, at which time the old tuber has decayed and new ones are not yet formed. They are not injured by freezing while in the ground. 1 lb. $1.00, postpaid. By freight or express, qt. 15c., pk. 50c., bu. $2.25, bbl. (enough for 1 acre) $6.30, 2 bbls. $15.00.
BEANS

No market gardener, trucker or shipper should plant any but our German, French, English, or King of the Early Market stringless varieties. They always sell at fancy prices. Other green-podded sorts never do.

MOORE'S GERMAN STRINGLESS

This superior variety is a prolific and continuous bearer and absolutely stringless. Very tender and of a distinct and delicious flavor. Very hardy and extremely early.

This most excellent variety was introduced by us into circulation in 1915, and is a distinct improvement in green beans, and at once becomes popular wherever known. The rich dark-green pods are produced in abundance, very uniform in size, very tender, plentifully meaty, stringless, very brittle and tender. It is almost a continuous bearer, and is among the first to give edible pods in the spring. The yield is enormous, and it is very early, and the handsome rich green pod a remain tender a long time. It is likewise an excellent sort for full planting, and is exceedingly popular wherever grown. It is practically mildew and rust proof. It is in great demand among truckers. Moore's German Stringless.

Moore's German Stringless me. It bears tremendous crops.

Moore's German Stringless bears quality until late into maturity. It has a delicate flavor exclusively its own. It is a fine shipper and the most profitable stringless.

Moore's German Stringless produces such beautiful tender pods; besides it is the most delicious shelled bean for winter use.

Early French Stringless

Extra Early, Exceedingly Prolific. Long, Straight, Dark-Green Pods

Retains its tender tenderness even when a little old. This new variety recently introduced by us has become famous in all the bean-growing sections of our country. At Paris, where we first saw it growing, it has superseded nearly all other sorts on account of its deliciousness. It cannot be recommended too highly for the local gardener or shipper, for it simply sells on sight. It is a true, stringless, round-pod bean, surpassing many varieties for earliness and quality. It is a very prolific variety in yield being highly prolific. The pod is of medium length, in color a very attractive dark green, and is unequalled by any other sort for tenderness and fine flavor. We enthusiastically recommend it to our many thousands of garden friends throughout the United States as being one of the best and most profitable green-pod beans obtainable. Pkt. 10c., qt. 50c., ½ lb. $1.00, pk. $1.75, bu. $6.50.

French Stringless

Beans sold for $2.00 a hamper, while my Valenties and Refugees only netted $1.00. The pods are long, straight and smooth and without strings. I will never plant another Valentine if I can help it.

A. O. SIMPSON, R. D., Portsmouth, Va.

French Stringless

was the first to pick with me. Every plant was fairly loaded with beautiful green pods, sold tender and of delicious flavor, and showed no string whatever until quite old. They retain their color and tendereness longer than either the Valetines or Refugees, sell more readily and at a higher price.

JAMES C. O'HARE, Market Gardener, Frankford, Pa.

MOORE'S ENGLISH STRINGLESS (Newington Wonder)

Extremely Early, Unusually Hardy, Wonderfully Productive, Finest Quality

A new early variety with long round green pods, entirely stringless, very meaty, delicious flavor, wonderfully tender, remarkably early. Enormously productive, continues a long time in bearing, valued for private gardens. This bean has been introduced to the market in its stringless form and has been grown steadily in popularity ever since. The bean is stringless at all stages of growth. It combines unusual hardiness and extreme earliness. No market gardener, shipper or merchant would plant any but our special strains of beans. All other sorts are obsolete. Profitable to market gardeners. Pkt. 10c., qt. 50c., ½ lb. $1.00, pk. $1.70, bu. $6.50.

Moore's English Stringless

Bean surpassed all my expectations. It was the very earliest and finest stringless, round green pods. The stringless bean in this section. It produced four, straight, absolutely stringless pods of the finest quality, and compared with the Red Valerie and Bountiful varieties, our market returns were about $2.00 per 100.

S. T. JOHNS, Freehold, N. J.

The Newington Wonder English Stringless

and French Stringless Beans have been giving me and my neighbor gardeners good satisfaction, they are the best selling sorts we ever had. We find them the best for either the first or last plantings. We intend to try Moore's German Stringless next year. Will want in about ten bushels.

NEARBOOK & CO., Johns Island, S. C.

KING OF THE EARLY STRINGLESS

Ready for picking in 40 days from planting. A grand variety for the Market Gardener.

A full round meaty pod. Distinguish from all other sorts.

Early Six Weeks (Round Pod)

This excellent variety is a great improvement over the old type, being ONE-THIRD LONGER THAN THAT VARIETY, POSES PERFECTLY ROUND, LIGHT GREEN AND STRAIGHT, and fully as early. It has the added advantage of being suitable both for early and late plantings, being extremely hardy. It will withstand early and late frosts which kill other varieties. Most desirable sort for the market gardener's fall crop, owing to its enormous yielding qualities, large and handsome appearance and tremendous yield. Our Red Valentine or Refugees, being superior to either in appearance. Pkt. 10c., qt. 30c., pk. $1.00, bu. $3.50.

BUTLER'S STRINGLESS, Green Pod

Q. 25c., pk. $1.00, bu. $4.50.

North Pole, Round Pod

Q. 25c., pk. $1.00, bu. $4.50.

Northfield, Round Pod

Q. 25c., pk. $1.00, bu. $4.50.

BUTLER'S STRINGLESS, Green Pod

Q. 25c., pk. $1.00, bu. $4.50.

EXTRA EARLY RED VALENTINE

Improved round pod strain. A great improvement over the old varieties. Q. 25c., pk. $1.00, bu. $6.00.

"We will mail postpaid any 3 ten-cent packets of Vegetable Seeds for 25c., or 7 for 50c.
The Handsomest and Most Productive Flat Potted Wax Bean Ever Grown

In this new very early variety introduced by us, we have one of the very best wax sorts offered to market gardeners and private families. It will sell twice as well and at a higher price than many other flat potted sorts. The pods are longer, broader and of a brighter yellow color than any other sort, very superior quality, tender and stringless. The vines are of vigorous growth, leaves dark green, hardy, and yield enormous quantities of long, handsome, flat, most pods, borne well up from the ground, and not bowing near the ground when grown to full size. It is easily grown in any ordinary garden, in the Davis or Fingoleot Wax or any other flat pod wax sort. It is very hardy and will stand more cold weather in the early spring than any other sort. We particularly recommend this valuable new sort to all our market garden friends. Pkt. 10c., qt. 30c., pk. $1.75, bu. $6.50. Special prices on 5 bu., lots and upwards will be made upon application.

THE MOST VALUABLE—Gentlemen: I have been growing beans for twenty-four years, and I find your California Rust-Proof Wax the most valuable ever introduced. I picked 1,050 lbs. of beans from one bushel of seed. —J. H. WEATHER, GLENOLDEN, PA.

MOORE'S KING OF THE WAX

This is a first-class wax bean in every respect, having originated with one of our Philadelphia market gardeners, who never shares the seed to his neighbors for one cent over than $10.00 per bushel. Plant of robust, branching habit, should be planted thinly, so as to allow plenty of space for branching. The pods are round and of a beautiful, bright golden transparent yellow color, very tender, stringless and entirely free from rust, and remain tender a very long time. Pods are long, thick, very attractive, very hardy and in Remarkable perfection, and continue to bear a very long time. It will mature fully as early as our famous California Rust-Proof Wax. As a market sort, it invariably brings the "top notch" price. We commend it to all our market garden friends. Pkt. 10c., qt. 30c., 4 qts. 55c., 4 qts. $1.00, pk. $1.75, bu. $6.50. Special prices on 5 bu., lots and upwards will be made upon application.

We will mail postpaid one packet each of the above three valuable wax beans for 25c. or any seven 10c. pkts. for 50c., or 13 for $1.00.

DWARF BEANS FOR SELLING

BISMARCK GREAT GERMAN SOUT Bean. Everybody relishes a good bean soup, but ninety-nine out of one hundred varieties of beans are too large and lack that rich delicacy of flavor that a soup bean should have. Now the German union is great for good soup. They are known the world over for that, and a bean soup is one of their great specialties. We know while traveling in Germany that everywhere bean soup was served, and the rare delicacy and savory this bean imparts. A pint of beans will supply sufficient beans to supply a good-sized family all winter, while for baking there is no bean side of the stars that can get up to it in quality and richness of flavor. Pkt. 10c., pt. 30c., qt. 30c., by mail postpaid. By express, pt. 35c., qt. 30c., 4 qts. $1.00.

BLACK TURTLE SOUP BEANS. If cooked in the form of a soup until the bean and skin be soft, they will have the exact taste of soup made from the famous Diamond Back Turtle. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $1.00.
SUPERB NEW BUSH LIMA BEANS
MOORE'S NEW GIANT

Sturdy Erect Bushes Filled with Luscious Green Beans, Prodigious Yields, Early and Continuous Bearer, Handsome Pods 4 to 5 inches in Length

Both pods and beans are twice the size of Kummerle, Thorburn or Dreer's Bush Lima. It is of stiffly erect habit. It branches freely with all the branches held upright, and the pods high above the ground, no pods or beans discolored from resting on the ground.

Moore's New Giant Bush Lima. The beans are ready for use as early as those of the Burpee Bush Lima, bears tremendous crops and furnishes the most delicious beans for the table earlier than most pole varieties. The pods contain from five to six handsome large deep-green beans of the most luscious quality and owing to the fact the beans being so closely packed in the pod, they can be used very easily.

Moore's New Giant Bush Lima is a great acquisition to the home gardener, in fact it is a necessity in every garden; they require absolutely no poles or brush. They will give supreme satisfaction to all who grow them. It is a veritable pick and comes again until killed by frost.

Moore's New Giant Bush Lima, not only produces immense crops but has additional merit over all other sorts of the "Potato Lima" types both tall and bush.

Even when of full size the beans are tender, juicy and sweet of flavor when cooked. This cannot be said of the Challenger, Dreer's or Potato Lima sorts. On account of its close, compact and upright habit it can be planted one-third closer than the old Burpee, Kummerle or Dreer's Bush type.

Pkt., 15¢, pt. 35c., qr. 40c., qt. $1.55, pk. $3.55, bu. $9.00. If by mail add 6c. per pt. or 15c. per qt. on all peas or beans.

Moore's New Giant Bush Lima is destined to become the principal bush variety with all who grow for market or shipping. It is altogether unique and your claim of superiority is well-founded. I found it two weeks earlier than Dreer's Bush, in a bag in size and yielding from a third to a half larger crop. It is not only early but it continues in full bearing until cut down by frost. The pods are borne in large prominent clusters and filled with delicious tender green beans which retain their sweet flavor until the end of the season.

DAVID MYERS, Pleasantville, N. J.

Moore's New Giant Bush Lima is a true wonder. It is the thickest bean I ever saw. It is far ahead of Kummerle or Dreer's Bush variety. Kummerle was a seven days' wonder with all the market gardeners in this locality; it created a veritable sensation with every one who saw it. It is big in every way—big beans, big pods and crops, and last but not least it brought big prices. I had no trouble to get $1.50 per basket for your GIANT BUSH, while it was hard to move the Kummerle, Thorburn or Dreer's Bush at 90¢. The beautiful appearance of the dark green pods insure ready sale at any time. I planted May 15th and picked the first full-size pod July 5th. One bush yielded me 177 pods by actual count and I believe very few less than this.

Z. V. PATTERSON, Richmond, Va.

Moore's Big Pod Bush Lima is quite similar to your Wilkoy's Prize Pole Lima in that it yields a large bulk of pods and beans; 20 hills of your BIG POD BUSH yielded during the season 69 baskets, the Fordhook 60, Dreer's Bush 42, and the Burpee's Bush 51 baskets. I picked the first fully developed beans from your BIG POD BUSH just seven days earlier than the others. You have certainly given it a good name, big pods, I should say so, and all the pods are big and filled with luscious big green beans, bigger in fact than any pole limas I ever saw.

SIDNEY JOHNSON, R. F. D., Also, N. J.

Walters' Thick Green Pole Lima grew. The pods were from 4 to 6 inches long and were produced in numerous large clusters. Very few pods had less than 4, and some 6 large, thick, green beans. We averaged 6 cents more per basket on the WALTERS THICK GREEN than we did on the King of the Garden or Ford's Mammoth. For home use or market we regard it the most valuable of all pole limas.

S. A. BROOKS, Washington, D. C.

Moore's Big Pod Bush Lima. (See page 7.) Should be planted by every lima bean grower in the land. It is a real seven days' wonder and it might be aptly termed the eighth wonder of the world, for no other bean, being 10 days earlier than any other large lima, either pole or bush, makes it so valuable to either the private planter or market gardener. One of our customers writes, "I have tested all varieties and know where I speak; give me your Moore's Big Pod Bush Lima for early, and a money maker."

We mail postpaid any 10 cent packets for 35c., or 7 for 50c.

Send $1.00 and select seeds in packets or ounces to value of $1.50; better still, send us $2.00 at select packets or ounces to value of $3.00, all mailed postpaid.

Look carefully look over pages 51, 52, 53, 54, 55, 56

Wise Buyers think not of what they pay, but of what they get for what they pay. Experience has taught them that, dollar for dollar, Moore's Seeds make the best investment.
Moore’s Profit-Making Lima Beans—Every Market Gardener Should be Careful to Plant Our Specially Selected Varieties

MOORE’S NEW BIG POD BUSH LIMA

In this we offer you the EARLIEST, LARGEST and BEST of all LARGE BUSH LIMAS. The pods are truly enormous in size, filled with beautiful luscious green beans larger than any bush limas ever produced before.

The plants are uniformly upright. The plant has heavier foliage, and is of more vigorous growth than our IMPROVED LARGE BUSH LIMA or BURPEE’S BUSH LIMA. Fully grown bushes measure 2 or more inches high and about the same across the top. It will outyield the above sorts from a third to a half. It thus makes it of immense value to the market gardener.

Moore’s New Big Pod Bush Lima when compared with the older sorts is radically different; the pods are borne in clusters, and the beans are much larger, while the beans either green or dry are about twice as thick and of the same luscious flavor as our Giant Bush or Walters’ Thick Green Pole Lima. The beans either fresh or dried are of a delicate greenish white color, and are ready for use from 8 to 10 days earlier than the earliest pole lima. We would like to tell you many more nice things about it if we had the room. Pkt. 15c., qt. 40c., 4 qts. $1.50, pl. $2.50, bu. $9.00. If beans or peas are to be sent by mail add 25c. per pint and 50c. per quart to catalogue prices.

Kummerle or Dreer’s Bush Lima. Generally known as the Potato or Thorburn Bush Lima. The pods come in clusters and are shorter in length than the Burpee Bush or Large Lima. The beans are crowded closely together in the pods and quite thick, similar to our Walters’ Thick Green Pole Lima. This is an old standard variety and has given universal satisfaction to our customers in the past. Market gardeners have always found it very profitable to grow, and it has been the delight of the cottage gardener. Pkt. 10c., qt. 30c., 2 qts. 50c., 4 qts. 90c., pk. $1.50, bu. $6.00.

Dreer’s Wonder Bush Lima. This variety was introduced by us in 1898, and is an improvement on Burpee’s Bush Lima. The plants are upright and compact in growth, and are completely covered with large pods, many of which contain four beans fully as large as the pole lima. Qt. 30c., 2 qts. 55c., 4 qts. 90c., pk. $1.50, bu. $6.00.

Burpee’s Bush Lima. True quarter strain. Qt. 35c., 2 qts. 50c., 4 qts. 90c., pk. $1.50, bu. $6.75.

Henderson’s Improved Bush Lima. Of hardy growth and very prolific, bearing continuously until the end of the season. Very extensively grown in some sections. Pk. 30c., qt. 50c., pk. $1.60, bu. $6.25.

Moore’s Improved Large Bush Lima. This large Bush Lima comes absolutely true from seed. It is pronounced by all good judges to be unquestionably distinct and superior in every way; it is of a splendidly vigorous, upright and bushy habit of growth, yielding luscious large Lima beans in great abundance, and equaling in size those of our famous Giant Prise Pole Lima. The bush grows 18 to 20 inches high, of stout growth and always erect. It is an immense yielder, the handsome large pods being well filled with from 3 to 4, and sometimes 5 very large beans of a beautiful green color, identical in size and luscious flavor to the well-known large pole lima. This strain produces beans on the table in from 10 to 11 weeks from the time of planting, and market gardeners will find no strains early nor more productive as our Improved. We are continually improving it every year. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $1.00, pk. $2.50, bu. $8.00.

CERTAINLY GOOD.—The Club Order I cut you for nine bushels of Moore’s Improved Large Bush Lima were certainly good seed. Both pods and beans were large and there was not a runner in the entire lot; and best of all they sold well.—S. C. COURTEN, EASTERN SHORE, VA.

SEND us $1.00 and select seeds in packets and ounces to value of $1.50, or send $2.00 and select seeds in packets or ounces to value of $3.00.

MOORE’S IMPROVED LARGE BUSH LIMA
Walter's Prolific Thick Green Pole Lima

A grand selection, possessing great merit. Of most delicious quality. Will always command the highest market price.

Our illustration herewith, which was taken from a photograph, aptly illustrates the shape and compact habit of the bean. It originated and was grown for many years by Mr. Henry Walter, one of the most successful lima bean growers of Gloucester Co., N. J., and who always jealously guarded his seed from "outsiders." By paying him an enormous price we finally induced him to grow seed sto-k which we now offer to our many market gardener friends. This variety invariably commands a higher price in all markets than any other sort, and it will be found very profitable to grow by all who plant for profit. The distinctive improvements are its remarkable productivity, delicious flavor, and the forming of the beans so closely in the pod. Vines vigorous and productive, with pointed leaves and white blossoms. Pods broad, straight and thick. Beans dark green, tender, sweet and juicy, medium size, broad and much thicker and greener than any other type of Lima, and formed very close together in the pod. This is an excellent sort for the family garden and the best of all sorts for canning purposes.

SHOTWELL'S IMPROVED. Our strain is much superior to the old type, a type of Dreyer's Improved or Potato Lima. The distinctive features of this are early maturity, large yield and extra quality. Pkt. 10c., qt. 30c., pk. $1.15, bu. $8.50.

KING OF THE GARDEN. Qt. 30c., pk. $1.75, bu. $6.75.

EARLY LEVIATHAN (New). Early and productive. Pkt. 18c., qt. 30c., 4 qts. $1.00, pk. $1.65, bu. $7.00.

CAPE MAY GIANT. An extremely valuable new variety which should be known to every lima bean grower. Very early, wonderfully profuse bearer and vigorous grower, beans large, pods borne in clusters of superior quality and immense size and filled with immensely large beans of a beautiful green color, and always command fancy prices. Pkt. 15c., qt. 50c., 4 qts. $1.75, pk. $5.90, bu. $11.00.

FORD'S MAMMOTH PODDED. True stock. Qt. 30c., pk. $1.75, bu. $6.75.

DREER'S IMPROVED or CHALLENGER. Thick, round bean of fine quality and a heavy yielder. Pkt. 10c., qt. 30c., 4 qts. $1.00, pk. $1.75, bu. $6.75.
These Pole varieties should be sown 2 weeks later than the Bush varieties. They should be enriched with well-rotted manure in the hills; from 3 to 6 seeds are planted in each hill.

**GOLDEN CARMINE HORTICULTURAL STRINGLESS.** Exceeds in earliness, quality, handsome appearance and productivity. In this new strain we have a wonderfully robust grower. The pods are large, stringless, bright golden color when very young. The vines are vigorous and very prolific. The thick pods are handily marked and hang in great clusters over the whole length of the vines. Taken at any stage up to absolute ripeness the pods are stringless and quickly cook to an almost-finely-flaked condition. The quality is excellent, preferable to our variety to most of the dwarf "snap" or butter beans. Pkt. 10c., pt. 35c., qt. 40c., 2 qts. $1.00.

**SCARLET RUNNER.** Ornamental as well as useful. It grows 10 feet high, and produces bright scarlet flowers, followed by large shell beans. Pkt. 10c., pt. 30c., qt. 35c.

**IMPROVED DUTCH CASE KNIFE.** Early, productive, and excellent, whether used green or dry. Vines vigorous, climbing well. Pkt. 10c., pt. 20c., qt. 30c., pk. $1.00.

**NEW GOLDEN LAZY WIFE'S POLE.** It is nothing unusual to pick 5 bushels to 8 pecks from a single vine. The pods are 8 to 9 inches long, broad, thick, slightly, a beautiful yellow, and entirely stringless, surpassing all other varieties in this respect, and retaining these important qualities until almost ripe. Exceedingly fine, buttery and first flavored. The vines cling well to the poles. They commence bearing in great abundance when the vines are quite young, and continue to bear profusely the entire season. The beans when dry are pure white in color, and make a fine shell or winter bean. Pkt. 10c., pt. 25c., qt. 40c., pk. $1.00.

**YARD LONG, OR CUBAN ASPARAGUS BEAN.** Pods grow from 2 to 4 feet long and are produced in great abundance. In color they are a beautiful green; tender and delicious, so that they not only prove a great curiosity wherever grown, but also a desirable variety as well. The pods are broken into suitable lengths while young, cooked and served with a drawn butter sauce, much as asparagus. Pkt. 10c., 3 for 25c.

**TENNESSEE WHITE CORN HILL BEAN.** It is undoubtedly the best variety ever grown for planting among corn, thus securing crops easily from the same ground with but little additional labor. The pods are produced in clusters. We strongly recommend it to all our customers as a distinct, valuable and highly desirable pole lima bean. All who have home gardens should plant it. Pkt. 10c., pt. 25c., qt. 40c., pk. $1.00. In saying that this bean is even more prolific than its green-podded namesake we do not overstep the bounds of truth. It commences to bear when scarcer widely than the average bush variety, and keeps on producing until killed by frost. In some comparatively frostless districts it has continued in bearing from June to December. The illustrations show the height of the vine and its enormous productivity. It is a rampant grower, one vine filling a pole with a mass of vines densely loaded with fusious beans. They are solidly meaty, entirely stringless, and when cooked, deliciously rich and buttery. The seed is brown, closely resembling that of the Kentucky Wonder. Pkt. 10c., pt. 25c., qt. 40c., 2 qts. $1.00, 4 qts. $1.25, pk. $2.50.

**WREN'S EGG BEAN.** Stringless pods hang in enormous clusters. Beans large, beautifully splash and spotted with red, and of the highest quality. It is capable pole bean, taken to the pole exceptionally well. Being stringless it makes an excellent snap bean at any stage of growth, and when ripe is unsurpassed for baking or boiling. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.15.

**OLD HOMESTEAD OR KENTUCKY WONDER.** It is enormous productive, the pods hanging in great clusters from top to bottom of the poles. It is entirely stringless, and the pods are of a silvery green color, resembling the popular Refugee Bush Bean. Vines vigorous, climbing well, and very productive, bearing its pods in large clusters; pod bright green, very long, often reaching 8 or 10 inches, nearly round when young, and very crisp. An early and very prolific sort, with shiny pods which are excellent for snaps. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $1.00, box 25c.

We will send postpaid any three 10c. packets for 25c., or 7 packets for 50c.
Selected Pedigree Varieties.
Our early Beets are famous everywhere.

THE THREE MOST PROFITABLE SORTS FOR YOU TO GROW—
they are the kind that make money for those who sell them. You will be pleased with any or all of them. The up-to-date grower will plant some of each of the three following.

Wesley’s Earliest Market Beet. One of the most wonderful early dark blood beets of the century. A handsome dark blood, finely grained, short, and round, grown early and late planting. The largest dark red early beet ever grown. Meets a long-felt want among beet growers. Every beet salable. Always brings the highest market price. This excellent beet is an improved form of Bastian’s “Early Blood Red Beet,” so extensively grown in the south of France for early shipment to the Paris and London markets, where it is held in high esteem for its first-class marketable quality. It is a source of great profit to the French market gardeners, as well as to all others who grow it. Top of medium size, root very symmetrical and will please all who plant it. An enormous yielder. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50.

Nutting’s Early Extra Gem. Mr. Nutting’s success and fame as an early beet grower has extended over a long period of years, and the giving of this grand new early beet to the public through us we have purchased his entire stock—he considers the crowning effort of his life. His neighbors have frequently offered him fabulous sums for this seed, so highly do they prize it for its extreme earliness and fine red color and fine quality. Its especial valuable features consist in its being two weeks earlier than the Bastian, Lentz, Dewing’s and Egyptian or Detroit strains, together with its being much better adapted to growing under sash, owing to its very few and small leaves, thus rendering it very profitable to the market gardener. It will invariably command the highest market price, and not infrequently sells at a higher figure than any other sort. For a garden beet it is unsurpassed. The quality is the highest, being very tender, sweet and juicy, even when the leaves die off from age. It will also be found to be a very good forcing beet, as our numerous testimonials will show. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50, 10 lbs. $6.00.

New French Trevis. Positively the earliest dark blood variety ever introduced and we recommend every one of our 65,000 market gardener friends to plant it largely—it will make big money for them all. It is asymmetrical as a small orange and is in its prime when almost three inches in diameter. Skin very smooth, of violet red color; flesh of a dark blood color, leaf stalks long, slender and of a light red color. It can be grown very close together and like our Nutting’s Early Extra Gem is well adapted for growing under sash. We doubt if any seedsmen will ever be able to produce an earlier beet than this. Marketable.beets in thirty days is its record. Owing to its very rapid growth it will be found very profitable for late summer sowing. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50.

Arlington Favorite Extra Early. (Our Special Stock.) This very early dark red variety has many points in its favor for market gardeners. The top is short, small and well adapted for growing under sash; for open ground planting it will be found one of the finest dark red extra early globe-shaped sorts obtainable, much superior to many existing varieties. The roots are perfectly smooth, of beautiful round shape, intense blood red skin and flesh, fine grained and very sweet. It is earlier than Bastian, Dewing’s or Lentz, and will be found valuable for sowing for an autumn or winter crop. It never becomes woody nor stringy and sells at top notch prices. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50, 10 lbs. $6.00.

American Egyptian. Much superior to the old type of imported seed. This is much earlier, has a shorter top, not so flat, and will not crack. Oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50.

CROSBY’S IMPROVED EGYPTIAN. Very fine stock. Oz. 10c., ¼ lb. 25c., lb. 50c., 25 lbs. and over 45c. lb.

BASTIAN’S EARLY HALF LONG. True seed grown by Bastian. Very choice strain. Oz. 10c., ¼ lb. 15c., lb. 45c., 10 lbs. 90c.

CROSBY’S ALL SEASONS. (New.) Fine dark red tender, very sweet. Oz. 10c., ¼ lb. 25c., lb. 50c., 5 lbs. $4.50.

BASTIAN’S EARLY RED TURNIP. ½ lb. 15c., lb. 45c., 5 lbs. $4.00.

SELECTED EXTRA EARLY LENTZ. Original stock seed grown by Lentz. Much superior to that ordinarily sold. Very tender and sweet, fine producing market sort. Oz. 10c., ¼ lb. 25c., lb. 50c., 5 lbs. $3.50.

DEWING’S IMPROVED RED TURNIP. Our strain is extra good. Oz. 10c., ¼ lb. 25c., lb. 50c., 25 lbs. and upwards 55c. lb.

LENTZ TURNIP. Flesh pale red. Oz. 10c., ¼ lb. 15c., lb. 40c., 10 lbs. $3.50.

EGYPTIAN. Of good quality when young. ½ lb. 15c., lb. 40c., 10 lbs. $3.50.

EXTRA EARLY ECLIPSE. ¼ lb. 20c., lb. 50c., 10 lbs. $4.50.

TAYLOR’S LENTZ. Very dark blood red, very sweet and good size top. Good fall and winter sort. Oz. 10c., ¼ lb. 25c., lb. 75c.

CRIMSON GLOBE. Oz. 10c., ¼ lb. 25c., lb. 75c.

LONG SMOOTH BLOOD. Late intense dark red. Oz. 10c., ¼ lb. 25c., lb. 75c.

DEWING’S IMPROVED BLOOD TURNIP. Oz. 10c., ¼ lb. 25c., lb. 75c., 5 lbs. $3.50.
Silver Asparagus Beet. This is a most delicious vegetable, with a very delicate flavor and slightly acidulous taste. The stalks and midrifs are cooked and eaten the same as asparagus, while the young leaves are cooked and eaten like spinach. They are found in almost every garden. It will never disappoint you, Mr. Market Gardener. Pkt. 5c., oz. 10c., 3½ lb. 25c., 6 lb. 65c.

Moore's Superior Sugar Beets and Mangel Wurzels. Specially grown for feeding pedigree stock.

New England Milk and Butter Sugar Mangels. The feeding of this variety will increase your dairy profits from 25 to 30 per cent. It contains less water and more sugar and nutritive matter than any other mangel. In England, where it is considered indispensable for dairy farming, large dairy farmers state that they are not only able to obtain a higher price per gallon for milk from cows fed on this mangel, but also that the cows produce fully one-third more milk and butter and are in much better condition fed on this milk and Butter Mangel, than if fed on hay alone. The largest yield of cattle food ever known has been obtained from mangels. Chemical analysis show it to contain 20 per cent sugar, while other sorts only analyze from 12 to 14 per cent. It is a compact grower, and ground by well fertilized, this variety will stand closer cultivation than any other. The root and top are red and very smooth. Oz. 10c., 3½ lb. 20c., 6 lb. 45c., 10 lb. 80c., 20 lb. $1.50.

Danish Long-keeping Sugar Mangels. The flesh is a deep golden yellow and is of high fattening value as well. Sheep and most stock have a preference for it over the others. It is the longest and best keeping of all mangels. The root will keep in perfect condition until June. The yield per acre under best cultivation is simply enormous. It is especially suitable for calcareous soils. Oz. 10c., 3½ lb. 20c., 11b. 60c., 5 lbs. $2.25, 10 lbs. $4.00.

Broccoli. Sutton's Snow-White. This valuable new sort is a decided acquisition. The immense large, close, snow-white heads are of spotless purity, alike valuable for a spring or fall crop and a sure cropper where cauliflowers are uncertain. Those who grow for market will find this variety unusually profitable to cultivate. Pkt. 25c., Oz. 75c., oz. $2.50, ¾ lb. $8.00, 1 lb. $15.00.

Extra Early White Cape. Heads medium size, close, of creamy white color. Pkt. 10c., oz. $1.50.
HIGHEST QUALITY CABBAGE SEED

New Early Gem Cabbage

Procured only from
THE MOORE SEED CO., Philadelphia

A valuable new acquisition for all who grow early cabbage. Earliest hard heading cabbage known. A great boon to the market gardener. All who plant EARLY CABBAGE should plant this. It means big money to all who plant it.

The season, using large size of this head, the leaves are very fine, and so close to the head. So compact is its growth that 1.50 heads can be grown to the acre in consideration by all, viz: its compactness of growth. Notwithstanding the large size of this head, the leaves are very fine, and so close to the head. It has always been our custom to say that we have the very finest strain of this important variety and it pleases us to state that we have a really superior strain for our Market Garden Friends and we hope that we will have the opportunity to get our extra stock of this valuable early variety. Pkts. 10 c., oz. 30 c., 1/2 lb. 85 c., lb. $3.00.

Large Early Ox-Heart. For many years past the true type of this valuable cabbage has not been offered by any American seedmen. We are proud to say that we are now enabled to offer our patrons the true type of this famous and valuable old sort. We pronounce it the very best early Ox-Heart Cabbage in existence. The heads are nearly twice as large as the Early Jersey Wakefield, often weighing fifteen pounds and nearly as solid as our Boston Early Hard Head, and of very compact growth. It also stands the cold better than any other sort. You can grow leaves, thus admitting of close culture—upwards of 12,000 can be planted to an acre. Our market-gardeners and outdoor gardeners should give it a trial and we guarantee that they will be pleased. It is particularly adapted to thin, light soils. This is a great acquisition, as every cabbage grower will at once recognize. Pkts. 10 c., oz. 30 c., 1/2 oz. 45 c., 1/2 lb. 85 c., lb. $3.00.

Boston Early Hard Head. This variety nearly equals Jersey Wakefield in early heading, and forming very neat, large and hard head. Very uniform in shape and general appearance, fine grained, small, short stump, few loose leaves, thus allowing them to be set out near together; it also has a very valuable quality of remaining much longer in good condition than any other sort. New Early Flat Brunswick. A grand new early cabbage from Germany. Every head as uniform as if moulded, and remarkably solid even when young. The shape and habit of growth is well shown in our illustration herewith. It is ready to cut as early as our Early Ox-Heart, somewhat larger, equally fine flavor and delicate texture. A remarkably compact grower, on well manured ground it can easily be planted 20 inches apart. Its uniformity in shape, solidity and large yield per acre makes it especially valuable for market growers. It always sells for an extra price. We earnestly commend it to all our many thousands of customers, who, we are in a position to say, have been money savers on our large stock. Pkts. 10 c., oz. 30 c., 1/2 lb. 85 c., lb. 3.00.

Large Early Ox-Heart. For many years past the true type of this valuable cabbage has not been offered by any American seedmen. We are proud to say that we are now enabled to offer our patrons the true type of this famous and valuable old sort. We pronounce it the very best early Ox-Heart Cabbage in existence. The heads are nearly twice as large as the Early Jersey Wakefield, often weighing fifteen pounds and nearly as solid as our Boston Early Hard Head, and of very compact growth. It also stands the cold better than any other sort. You can grow leaves, thus admitting of close culture—upwards of 12,000 can be planted to an acre. Our market-gardeners and outdoor gardeners should give it a trial and we guarantee that they will be pleased. It is particularly adapted to thin, light soils. This is a great acquisition, as every cabbage grower will at once recognize. Pkts. 10 c., oz. 30 c., 1/2 oz. 45 c., 1/2 lb. 85 c., lb. $3.00.

Improved Early Summer. Our own highly selected type. Pkts. 10 c., oz. 30 c., 1/2 lb. 85 c., lb. $2.50.

Philadelphia Early Wensingtondale. Much superior to imported seed. Solid heads, with short stumps. Pkts. 5 c., oz. 30 c., 1/2 lb. 50 c., lb. $1.

Early Spring. Medium size flat heads. Pkts. 10 c., oz. 30 c., 1/2 lb. 75 c., lb. $2.50.

Henderson's Succession. (True Stock.) Our stock is unusually fine. Pkts. 10 c., oz. 30 c., 1/2 lb. 75 c., lb. $2.50.

The Lupton. (Originator's own seed.) Pkts. 10 c., oz. 20 c., 1/2 lb. 60 c., lb. $2.00.

The House. Carefully grown seed, good late sort. Pkts. 10 c., oz. 30 c., 1/2 lb. 85 c., lb. $3.00.

Please Read

Having made a specialty of growing Cabbage Seed for a great many years, for seed purposes, we know how important it is fully to understand the growing of this important crop. We would like to impress upon our customers that success is certain when soil and season are favorable. Our one aim has always been, and is, to sell at reasonable prices, and as low as any reliable firm in the American Seed Trade who has an honest name for offering only strictly first-class Cabbage Seed to their customers.
We Offer You the Best Cabbage Seed in the World

NEW MODEL SUMMER CABBAGE

The grandest summer cabbage in existence. In the illustration we display the finest type of summer cabbage in existence, whether for medium early, late or winter use. We have grown this variety for many years, and have found it to be the best and most reliable summer cabbage we ever grew.

Pkt. 10c., oz. 30c., ½ lb. 85c., 1 lb. $3.00.

"I have been planting your Model Summer Cabbage for 5 years. It is the best and most reliable cabbage I ever grew."—S. M. Wilcox, R. F. D., Freeville, N. Y.

Moore's New Early Stonehead Cabbage

A highly Valuable Novelty.

Will surely please all who plant it. A good type all by itself. An early, very hard heading variety, maturing from 2 to 3 days later than our Early Oxheart. Somewhat globe shaped, small ribbed leaves, small, very close and of fine, delicate texture, can be planted very close, about 20 inches in the row. A money maker for market gardeners, and very suitable for the home garden. Heads medium size, heavy and hard sold as a stone—our customers say it is a sure solid header, always produces a crop, the heads though hard never burst. The superb hard heads are excellent for making stew or sauerkraut, and owing to their great solidity keep well when stored for winter use. A first type for selling in basics. It is now extensively grown in all parts of the country and is universally pronounced a great success. Pkt. 10c., oz. 30c., ½ lb. $1.00, 1 lb. $3.00.

IMPROVED EARLY RED DUTCH EXPERT

By careful selection we have greatly improved this sort in size and color, and our improved strain will give universal satisfaction for an early crop, will mature about 3 weeks earlier than our Regular Redhead Dutch. Very solid red heads of medium size. Good market sort. Pkt. 10c., oz. 30c., ½ lb. 50c., 1 lb. $1.75.

RED ROCK

An old American variety. Not so large nor solid as our Large Dark Red Danish Drumhead. Pkt. 10c., oz. 30c., ½ lb. 60c., 1 lb. $2.00.

BOSTON EARLY HEAD CABBAGE

No One Should Miss Planting This.

This superb variety nearly equals Jersey Wakefield in curiness, and forming very much larger heads. It is a very distinct type of cabbage and highly praised by hundreds of the most successful market gardeners all over the country. Very uniform in shape and general appearance, fine grained, small short stump, with few loose leaves, thus allowing them to be set out near together. It also has a very valuable quality of remaining many longer than any other, after fall maturity, without cracking or bursting. It is likewise an excellent sort for winter, and is probably the heariest of all the cabbages in cultivation. It makes a fine basket cabbage. Try it.

Pkt. 10c., oz. 35c., ½ lb. 75c., 1 lb. $2.50. 5 lbs. and upward $4.25, per lb.

BRUNSWICK NETTED SAVOY

The Hardest Heading, and Best Variety for Early or Late Crop. Heads large, very compact, solid and deliciously tender and sweet, and well adapted for either early summer or late autumn and winter crop. Entire "pits" of it will keep in perfect condition until May. Walter F. Fenton, of Conshohocken, Pa., writes: "I have grown all the advertised kinds of Savoys, but found no other half so good a keeper, it being in good market condition on the 15th of May. It also offers to our other kinds of Savoys in growing from another hard as a rock starting late frosts in the field better than the Leec or Marylv strains. Its rich, sweet flavor of surpassing excellence and fine, curly, netted look, cause it to outsell all other varieties. Rent has not been valuable for early or late crops as well as a market variety, and is quick to develop. Try it.

Pkt. 10c., oz. 25c., ½ lb. 75c., 1 lb. $2.50.

AMERICAN DRUMHEAD SAVOY

Our American grown seed is much superior to the imported Drumhead. A large head, larger and later in bearing, furrowed, without a row.

Pkt. 10c., oz. 30c., ½ lb. 50c., 1 lb. $1.75.

Market Gardeners well know how difficult it is to get good and satisfactory strain of Savoy cabbage. But you will have no trouble whatever if you use our successful varieties.

SUREHEAD CABBAGE

We are headquarters for this famous cabbage which was first introduced 33 years ago (1872), and our stock is as good as it ever was. It produces large round flattened heads of the Flat Dutch type, and is reliable and marketable for its certainty to head. It is all head and always sure to head, we have never had any complaints against it. The heads are remarkably uniform, extremely hard, fine in texture, and ordinarily weigh from 10 to 15 pounds each. It is very sweet flavored, has but few loose leaves, keeps well, is good for shipping, and is just the variety and quality to suit all lovers of good cabbage. Extra selected seed. Pkt. 10c., oz. 25c., ½ lb. 90c., 1 lb. $2.00.
Moore's Famous American Grown Cabbage Seed

Moore's New Model Cabbage

and white, making it a most desirable form for kraut, as well as for all other purposes for which cabbage is used.

4th. Hardiness. In this respect we have never seen a type which would favorably compare with Moore's New Model. The most severe winters ever known in this section did not inflict the slightest injury to the Moore's New Model. While all other kinds suffered terribly, not a head of this was lost, and while others have partially or totally dropped out, our fields of this give promise of an enormous crop; in fact, it is already secured, and at the present writing ready for the harvest. We think this point of hardiness of great importance to the shipper.

5th. Earliness. This type is remarkable for its quick-growing habit. We have noticed particularly this type, and find that it will mature its heads fully two weeks earlier than any of our late growing kinds. Let us be fully understood in this matter. When set plants of any of our winter cabbages on July Ist, Moore's New Model need not be sown before July 18th to August 1st—a quick growth for a winter sort. This excellent new variety is adapted to all climates, all soils—like all other cabbages thrives best in good rich soil. Price of Moore's New Model Cabbage: pkt. 10c., 3 pks. 25c., oz. 40c., ½ lb. $1.60, lb. $3.50.

HOLMES' HOUSER CABBAGE.

This famous cabbage has gained steadily in popular favor. No other variety can approach the Houser in quality, size, productiveness, smallness of heart and keeping qualities. It is remarkable what enormous crops are produced from this particular stock. To keep this seed pure requires a great deal of attention and selection, in no small part that we have contracted with Mr. Houser, the originator of this cabbage, to grow for us yearly one pound of stock seed, for which we pay him about $5. This seed is then sent to our various stock growers, where it undergoes the second selection. Our contract with this grower is that he shall not allow a single grain of this particular seed to be sold to any other seedsmen; consequently the pure and genuine stock can be had only from us direct, or from some of our regular wholesale dealers, to whom we sell the seed. It is very fine-grained, sweet-flavored, has but few loose leaves, is good for shipping, and is just the variety and quality to suit market-gardeners, farmers and all lovers of good cabbage.

A WARNING.—It is absolutely necessary to plant out the Houser Cabbage two weeks earlier than any other late sort, as it requires this much longer to mature than the Flat Dutch types or any other late variety.

Seed grown from the original as selected stock and procurable only from us or one of our well-known dealers. Pkt. 10c., oz. 35c., ½ lb. $1.25, lb. $4.00, by mail, postpaid, to your address.

MOORE'S DANISH “ROUNDHEAD” CABBAGE.

An Earlier Shorter Stemmed Type of the Famous Royal Danish “Ballhead.” Of more robust growth, the heads are heavier and of unusually fine quality. The original Royal Danish Ballhead Cabbage (introduced to us many years ago) is esteemed for the extreme solidity and great weight of fine heads as well as for its medium quality. This variety has been grown most successfully only in a comparatively cool location. Danish Roundhead has less outer foliage and is better able to resist blight, being, in most sections, as vigorous in growth as the best American types. The heads average larger and mature nearly two weeks earlier. The heads are unusually solid, and beautifully white when trimmed. They are splendid keepers when stored away for the late winter and spring, at which time the fine heads bring the highest market price. Crop short. Pkt. 10c., 3 pks. 25c., oz. 40c., ½ lb. $1.15, lb. $4.00.

MOORE'S ALLHEAD EARLY CABBAGE.

Moore's Allhead is the earliest of all large cabbage, and considerably larger than any other early summer cabbage that is equally as early. The deep flat heads are remarkably solid and the most uniform in color, form and size of any variety. The hard heads grow so free from spreading leaves that fully one thousand more heads than usually with large cabbage can be obtained to the acre. It is really an all-year-round cabbage, being equally good for winter. Allhead Early is considered by many the best second-early cabbage—and we know all varieties. If plants everywhere only knew the excellence of Moore's Allhead Early Cabbage, even our large supply of seed would not suffice to meet the demand. It is undoubtedly altogether unequalled in many sections as an early summer Cabbage, and is fully as good for winter use, being really an all-year-round Cabbage. Our claims as to the merits of the Allhead have been fully sustained by reports from planters everywhere. The small illustration herewith of a single cabbage comes from a photograph. Pkt. 10c., oz. 30c., 2 ozs. 50c., ½ lb. 85c., lb. $3.00, postpaid.
THE WORLD'S BEST CABBAGE SEED

IS GROWN BY AND CAN ONLY BE HAD FROM US

NEW ROYAL DANISH BALL HEAD CABBAGE

PROCULABLE ONLY FROM THE MOORE SEED COMPANY, PHILADELPHIA.

The True Danish Round Head Type. It is the best of all the Danish cabbages. Early, hard head, short stem and the best keeper of all. Always commands a higher price than any other type of Danish cabbage. 40.00 pounds per acre is not unusual. The round heads are nearly round, very hard and solid, and the best keeper of all the types of Danish or Hollandier cabbage. A very robust grower, close outer foliage, never rots or blights in the field, and about two weeks earlier and shorter stem than the old type. The heads when trimmed are of a beautiful, attractive clear white. Pkt. 10c., oz. 30c., 1/2 lb. 85c., lb. $3.00.

WHAT ENTHUSIASTIC GROWERS SAY OF IT.

THE BEST CABBAGE IN NEW YORK STATE.-T. F. Raymond, Haines, Burlington, N. J.

"I am both a grower and a shipper of cabbage. I planted 21 acres of your New Royal Danish Ball Head, and all who saw it, as well as myself, pronounced it the best strain of Danish Cabbage in New York State. My crop averaged 35 tons per acre, and I did not lose one head from rot or blight."-

S. J. THOMAS, ONTARIO, N. Y.

THE EARLIEST TO MATURE.—"I planted three kinds of Danish Cabbage last season, including your Royal Ball Head, which was ready to cut twelve days before the other. For solidity and long keeping it beats anything in my twenty-years' experience."-

PETER YOUTVILLE, LEBANON, N. Y.

DEALERS ALWAYS PREFER IT.—"To answer to your inquiry, I find my customers decidedly prefer your Royal Ball Head, which is due to its great tenderness and delicate, sweet flavor. The heads remain firm and the leaves retain their crispness longer than the German Export, or Dutch Round Head sorts. I find dealers always prefer it to any other cabbage they can get."—JAMES CUSTICK, IRONDEQUOT, N. Y.

HAINES' PERFECTION LATE BEAUTY

1. It is the surest heading American variety of cabbage. 2. It is known to flourish on all soils, north, south, east or west. 3. It is planted by more gardeners than any other late sort. 4. It is almost proof against the destructive cabbage worm. 5. It is the best winter keeper for the southern states. 6. It is the best to grow for home market. 7. It will produce the greatest money value per acre. 8. It is the best for the family garden.

HAINES' PERFECTION LATE CABBAGE.

CHAMPION LATE FLAT DUTCH. Good winter keeper. Short stem and large head. Pkt. 5c., oz. 20c., 1/2 lb. 60c., lb. $2.00.

PREMIUM LATE FLAT DUTCH. Oz. 15c., 1/2 lb. 40c., lb. $1.40.

DANISH ROUND HEAD. The large heads are unusually solid and beautiful white when trimmed. They are splendid keepers for late winter or spring use, at which age they are remarkably fine heads and sell for the highest price. Pkt. 10c., oz. 35c., 1/2 lb. $1.00, lb. $3.50. SEED US $1.00 AND SELECT SEEDS IN PACKETS AND OUNCES TO VALUE OF $1.50.

NEW RUSSIAN ROUND GIANT. Large size, deep round heavy heads. Extra choice seed. Pkt. 10c., oz. 25c., 1/2 lb. 75c., lb. $3.50.

DEALERS ALWAYS PREFER IT.—"To answer to your inquiry, I find my customers decidedly prefer your Royal Ball Head, which is due to its great tenderness and delicate, sweet flavor. The heads remain firm and the leaves retain their crispness longer than the German Export, or Dutch Round Head sorts. I find dealers always prefer it to any other cabbage they can get."—JAMES CUSTICK, IRONDEQUOT, N. Y.

CREATED A GREAT SENSATION.—"Your New Royal Danish Ball Head Cabbage has created a great sensation among the cabbage growers here. No rot, no blight, no failures, no loose heads. It is 100 per cent pure. I had a little over ten tons on half an acre. It is all head, no stalk, no outside leaves, and it keeps in perfect condition until May."—JAMES CLEMSKE, IRONDEQUOT, N. Y.

CARROTS—Best Market Sorts

American Red Altringham. A handsome cylindrical-shaped carrot of good size. It is of a rich, dark orange color, and grows to a large size, and is smooth and very close in texture, with no core. It is a first-class carrot for all soils, and it is claimed that, under good cultivation, it will yield the largest weights per acre with the smallest length of roots that can be grown. For sowing in the autumn, under glass, it has no equal. (See cut.) Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 90c., 2 lbs. $1.70.

Danvers Pointed. A most excellent variety for either field or garden culture; large, symmetrical roots of a deep orange-red, in size between the Long and Long Orange sort and the Redwood and straight, and free from roughness. The tops are small, considering the size of the roots. It will be found superior to the Danvers Stump Rooted variety as a market sort, and much more productive. Our customers will find this a very fine type of carrot, and it has the same flavor as the old Danvers variety, following marks of the highest breeding. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 90c., 2 lbs. $1.70.

DANVERS HALF LONG. (Extrm Stock.) Very smooth and fine in texture and easily dug. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 70c., 5 lbs. $2.25.

IMPROVED ST. VALERY. The roots grow very regular and smooth; not as productive as our Long Red Surrey. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 65c.

Long Red Surrey. A great improvement on the various types of Long Orange Carrot, and a careful selection from the best formed and deepest-colored roots; it is larger, better flavored, of a deeper orange color, and more certain to produce a crop than any type of long carrot; flesh very sweet and tender; very productive, and never becomes hard or woody at the heart. The roots grow very regular and smooth; they are of good size, being from six to eight inches in length and two inches in diameter at the top, tapering gradually from the shoulder to the tip of the roots. In color shape, size, and flavor it is the ideal sort for a market gardener's late crop. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 90c., 2 lbs. $1.70.

RUBICON HALF LONG. A wonderful producer. Oz. 10c., ½ lb. 25c., lb. 75c.

IMPROVED INTERMEDIATE. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 90c., 2 lbs. $1.50.

MOORE'S CORLESS. (New.) Absolutely without woody core, delicately flavored, pointed root about 6 inches long, fine color, excellent for bunching. Oz. 10c., ½ lb. 30c., lb. 1.25.

Reselected Danvers Half Long. Seed grown by a leading Philadelphia market gardener. Stump rooted, very smooth, fine in texture, extra dark color, finest quality, best market strain and heaviest yields. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 90c., 2 lbs. $1.75.

French Red Forcing. (See cut.) An excellent dark red corless variety, about 3 inches long, very well shaped, very sweet and tender, very productive; a large acreage is grown each year and is of the best and most profitable sort for sowing under glass during the autumn or early spring. Can be allowed to remain quite thick in the ground. Fine trade will pay an extra price for this variety. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

FRENCH MARKET. Fine grained and good flavor, ½ inches long, stump rooted. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 70c.

CARROTS—For Stock Feeding

We rank Carrots as high as hay and grain for feeding live stock. One acre of good carrots equals $30 bushels of oats and an acre will produce from 20 tons of roots. We have hundreds of acres annually in Philadelphia and other large cities feeding Carrots once a day all winter and spring. Carrots fed to horses and other stock give their coats a gloss and add to the fleshing of mules, and cattle are always in good condition. Great value to dairymen, in that they greatly increase and prolong the flow of rich milk. All stock fed on carrots require less grain and are of special value for feeding during winter months.

Large Red Belgian. This new variety is undoubtedly the best of all the sorts for feeding stock. This attains the largest size, and will yield more mutton and keeps better than any other sort grown. Uniformly smooth in form; they are cultivated as a dark orange; flesh rich, solid, crisp, and nutritious. If it is to be grown in any soil, and we predict that it will soon become a general favorite as a cattle carrot, and we pronounce it the best of all sorts for stock feeding. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 70c., 2 lbs. $2.00.

New Giant White Australian. This new variety is undoubtedly the best of all the white sorts for feeding stock. It attains the largest size, and will yield more mutton and keeps better than any other white sort grown. Uniformly smooth in form; they are easily harvested. Flesh rich. Pkt. 5c., oz. 10c., ½ lb. 20c., lb. 50c., 5 lbs. $2.50.

WHITE VOGUES. This is a field carrot, and especially suitable for soils that are not very deep. Pkt. 5c., oz. 10c., ½ lb. 20c., lb. 50c., 5 lbs. $2.25.
CAULIFLOWER

MOORE'S ITALIAN GIANT EARLY SUREHEAD CAULIFLOWER

Italian Giant Early Surehead is the very best early Cauliflower in cultivation, either for forcing under glass or outdoor planting. It excels in earliness, size and uniformity, and is the best variety to produce in the early fall for sale. It is the earliest and best for forcing under glass. This variety is very productive and is therefore the most profitable.

Selected Early Dwarf Erfurt. Small, compact, dwarf, for open ground, producing pure white heads of fine quality. Sold in lots of 1 oz.

Gilt Edge Early Dwarf Erfurt. Excellent for forcing under glass as well as growing out doors and a great favorite with many critical growers. Produces very large heads.

Improved Early Snowball. Extra quality. A really fine variety generally. Sure to head. We have the finest possible strain of this prominent variety. Sold in lots of 1 oz.

Champion Dry Weather Cauliflower

This is an entirely new and valuable type of Cauliflower, producing large, solid, heavy, pure white heads a few days later than our famous Italian Giant Early Surehead.

CHERVIL. Plant and use similar to parsley. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 80c.

CORN SALAD—FETTICUS or LAMB’S LETTUCE

Large-Seeded Italian Broad-Leaved. The best and most productive variety for market. Oz. 10c., ¼ lb. 30c., ½ lb. 50c.

BROAD-LEAVED DUTCH. ¼ lb. 15c., lb. 40c., 10 lbs. $2.50.

COLLARDS—GEORGIA WHITE. Extra quality. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 70c.

CRESS, or PEPPER GRASS

FINED CULLED. (Pepper Grass.) Pkt. 5c., ¼ lb. 15c., lb. 40c.

Water Cress. One of the most delicious, delicate flavored of small salads. It does fairly well in very moist situations, but thrives best in shallow water, on edges of streams, where it grows most luxuriantly. Pkt. 10c., oz. 25c., ¼ lb. 50c., lb. $2.50.
GOLDEN SELF-BLANCHING CELERY

The verdict of all who grow it is, "It is the best that grows," no matter where it is planted—east, west, north or south. It is the best strain of Golden Self-blanching Celery that grows. It is particularly well adapted to growing on heavy muck lands that have been reclaimed from swamp lands.

It always grows solid, robust, very crisp and of good flavor. It is less affected with hot, dry weather than other old strains. The stalks are numerous, large, solid and of a remarkably beautiful golden-yellow, and interlaced with numerous inside shoots or hearts of the same handsome yellow color and fine quality. Its beautiful appearance and fine quality always insured

Our strain of this is acknowledged by all who plant it—and they are thousands—to be the finest and parent in existence, and far superior to any other. The stalks grow much thicker and taller and more solid than the old sort, and are of a more beautiful and richer waxy golden-yellow color. Very solid and of a delicious nutty flavor. The beautiful appearance of this strain, which is of strong, vigorous habit, is well shown in the illustration. Our strain contains no green, has an abundance of hearts or inside shoots, is always solid; pithy or spongy stalks are unknown. No strain can surpass it, and ours will give the highest satisfaction to all who grow it. An excellent keeper and shipper. If you grow for home market or shipping you should not fail to plant our seed. It is the best you can get. Those who plant it always get satisfaction. Pkt. 10c., 3 for 25c., oz. $1.00, ½ lb. $3.00, lb. $15.00. Crop very short.

GOLDEN SELF-BLANCHING. Imported seed; same strain as offered by other leading seedsmen. Pkt. 10c., oz. 75c., ½ lb. $2.00, lb. $8.00.

See our Special Offer of Seeds in packets and ounces on page 47.
THOUSANDS OF MARKET GARDENERS

THROUGHOUT THE UNITED STATES ACKNOWLEDGE OUR Celeries TO BE THE FINEST IN EXISTENCE, AND USE NO OTHER

Moore's Selected Boston Mammoth White Plume Celery—The Purest and Best White Plume Celery in the World

This is an entirely new strain, having originated with a highly successful market gardener near Boston, who sent it to us for introduction. It has now been in our possession for nearly ten years, and we have found it remarkably prolific, hardy, and healthy. It is remarkable for its robust size, as it grows unusually tall and thick, while the number of hearts it produces is simply astonishing. It has no netting, and for its unusual earliness it remains in perfect condition as late as March 20th. It is a very rapid grower, "whitens up" earlier, and is ready for market sooner than the old sort. The ribs are thick, long, straight, remarkably tender, crisp and rich flavored, and possess the beautiful, light, white color which is so desirable. It is absolutely pure, contains no green whatever and will surely give extra satisfaction to all, as it is the finest type of White Plume Celery in the world. Market gardening is a plant it once, plant it always, because it always sells so well. Pkt. 10c., oz. 30c., ½ lb. 85c., lb. $3.00.

SOLD FOR AN EXTRA PRICE

"I had the finest crop of Boston White Plume Celery last fall from your seed that was ever raised in this section. It was truly beautiful and acknowledged by everybody as the best for its size, had plenty of stalks, pure white, two feet long, crisp and of elegant flavor. I sold every stalk at an extra price."

O. B. DANGERMAN, Jersey City, N. J.

MOORE'S NEW SILVER SELF-BLANCHING CELERY

Combines the grand qualities of the three most popular celeries grown: The sturdy, solid habit of our California Mammoth Solid Golden Self-Blanching; the exquisite color and earliness of our Boston Mammoth White Plume, and delightfully rich flavor of our Sweet Nut. This grand new celery is easily described as a Golden Self-Blanching plant with White Plume coloring. It possesses the robust, sturdy, compact habit of Golden Self-Blanching, the stalks being even thicker, more solid and heavy, with immense solid hearts and all brittle, crisp and tender, free from string or pitliness, and of delightfully rich flavor. The foliage is tipped and variegated with white, while the heart, inner stalks and leaves are naturally white. It may be easily and quickly blanched by leaning boards on either side of the row. Its extreme earliness renders it valuable celery for the market gardener, and it does not "burn down" even in the hottest weather. We are the only growers in the country who produce this celery, and it is, therefore, a new one. For side tests with White Plume and Self-Blanching; it outclassed them all in earliness, flavor, size and solidity of heart, and height of stalk and head, standing usually six inches higher than White Plume. Its foliage is green and white, its stalks are not stringy, tough or bitter, but tender, brittle, very sweet and of a nutty flavor. Leading Philadelphia market gardeners have it on the market June 25th. The seed can be sown earlier than any other sort without running to seed; this alone is a highly valuable feature to the market gardener. It is sure to bring fancy prices. Pkt. 10c., oz. 40c., ½ lb. $1.35, lb. $3.50.

Moore's New Giant White Arrezzo Celery. We enthusiastically pro-
ounce this the best and most profitable of all celerie's for winter use. It is of unusually vigorous growth, making immensely thick and heavy stalks and large heavy hearts, all remaining a beautiful light green until blanched by earthing up or being stored for winter. It blanches to a clean white, while the stalks are so strong and crisp that they may be cut all the way down and re-cut, without breaking or stringing. The most bountiful and beautiful flavor surpassingly rich and nutty. Any market gardener who wishes the best and most profitable winter celery can get will find it in our Moore's New Giant White Arrezzo. Pkt. 10c., oz. 40c., ½ lb. $1.35, lb. $3.50.

New Broad-Ribbed or Sweet Nut Celery. The most deli-
celery ever introduced. It is the sweetest, crispest, tenderest, finest flavored and most solid of all celerie's. No other seed equals it in these valuable qualities. Again, it will not burn down under the sun as a habit is a very desirable feature, as all celery growers well know. It is a strong, vigorous grower, distinct and handsome in appearance, of an exquisitely beautiful cream colored habit and color, so soft and smooth, as to be difficult to non-e. Edible almost to top of the stems. We commend it to the private planter, who requires the highest quality, and to the market gardener, who wants to have the best for his customers. We furnish them in 10c. to 50c. sizes. For early or late use. Blanches almost as freely as our famous Boston White Plume. Pkt. 10c., oz. 35c., ½ lb. 75c., lb. $2.50.

M. & S. Matchless Giant Perfection Long-Keeping Golden Heart. A variety of rare merit. The most desirable type of Golden Heart Celery known to the trade. Remarkable for its many long, broad, thick ribs and numerous "inside hearts" of the finest golden color. This variety blanches easily, keeps remarkably long in perfect condition. The ribs are unusually solid, firm, crisp, tender and beautiful in appearance. This variety has been produced by careful crossing and high culture between the Dwarf Golden Heart and our White Plume, by one of the best celery growers in this country. In quality, appearance and size this leaves nothing to be desired, and we recommend it as one of the best for market and home use. For early or late use. While its fine flavor and beautiful appearance make it very desirable for private use as well as the market gardener. It is very hardy and is held in high esteem among our home gardeners. Pkt. 10c., oz. 35c., ½ lb. 80c., lb. $2.00.

COLUMBIA GOLDEN HEART. Pkt. 10c., oz. 30c., ¼ lb. $1.00, lb. $5.50.

LONG ISLAND MAMMOTH LARGE-RIBBED GOLDEN HEART. Pkt. 10c., oz. 30c., ¼ lb. $1.00, lb. $5.50.

WHITE PLUME. Extra selected stock. Pkt. 10c., oz. 30c., ¼ lb. 65c., lb. $2.00.

SCHUMACHER CELERY. Selected. Pkt. 10c., oz. 25c., ¼ lb. 80c., lb. $3.00.

W. B. WHITE. Pkt. 10c., oz. 15c., ¼ lb. 50c., lb. $1.75.

SOUP CELERY. For flavoring. Oz. 3c., ½ lb. 45c., lb. $2.00.

GOLDEN HEART or GOLDEN DWARF. Selected stock. Oz. 25c., ½ lb. 40c., lb. $1.50.

IMPROVED GIANT P-SHAL. Oz. 30c., ¼ lb. 60c., lb. $3.00.

VERY NEW Tuliptown. Very early. Two weeks earlier than White Plume or Self-Blanching. Good hot weather sort. Pkt. 15c., ½ oz. 40c., oz. 75c., 1¼ lb. $2.00.

WHITE WALNUT. The color is a beautiful clean white; of exceptionally fine, delicate nutty flavor, solid and broad, very hardy and easily blanched. Stalks are broad, solid, heavy and positive, will not split, free from ridges and stringiness, to which merits it adds its beautiful coloring, golden yellow, rose tinged. It is a good keeper and of superior quality. Pkt. 10c., oz. 30c., ¼ lb. 85c., lb. $3.00.

NEW PLUS Ultra. Best market sort. Very large and smooth globular-shaped roots. The most profitable sort to grow. Pkt. 10c., oz. 30c., ¼ lb. 85c., lb. $3.00.

APPLE SHAPED. Oz. 15c., ½ lb. 40c., lb. $1.35.

PRAGUE. Selected stock. Pkt. 10c., oz. 25c., ¼ lb. 50c., lb. $1.75.

Celeriac, or Turnip-Rooted Celery.
SUGAR CORN

TO MARKET GARDENERS

It is just like coining good money to plant this corn. It is positively the earliest table corn ever introduced. Over 200 carloads of this corn were shipped to New York City alone last season. Big profits await all who plant it.

Moore's First Early Table Corn. Every market gardener who planted the earliest table corn of good quality can get should not fail to plant this exceedingly valuable sort. In our Moore's First Early we have a truly remarkable and profitable extra early variety. It is positively the earliest table corn ever introduced. It is the hardest of all varieties of corn, and cold, wet weather has little or no effect upon it. On account of its extreme hardness it can be planted from two to four weeks earlier than Crosby, Minnesota, Cory, Fresno or other varieties of sugar corn. We particularly caution our market garden friends to plant it at least two weeks earlier than they usually do their sugar corn, if their door would secure all the advantages of this profitable extra early sort. Again, don't fail to plant it early. The stalks grow about six feet high, and nearly always have ten, and sometimes four well developed ears, which are extra large, and few will bear very close planting. Ground should be well fertilized to secure its wonderful productiveness. The grain is deep, pearly white, very tender, sweet and juicy, considering its extreme earliness. The ears mature very rapidly and are best taken to pull the ears while young. It required long and patient care, as well as the expenditure of much money to develop this variety. We assure our market garden friends they can easily amass many fortunes if they plant it liberally for large profits not to be soon forgotten by large markets. Big profits await all who plant it early, and we advise our many thousands of market garden friends to plant it early. Let it be got now, and easier, better or quicker than by planting Moore's First Early Table Corn. It is ten days earlier than Cory; besides worms do not bother it. There is no other early sort half so good, no other early sort that will make you half the money. Pkt. 10c., qt. 35c., qt. 65c., postpaid. By express or freight, pt. 20c., qt. 35c., 4 qts. 90c., bu. $1.50.

REAPED BIG PROFITS. John Soffert, Baltimore, Md., writes: "Myself and five of my neighbors sent your catalogue out for another box of corn this year for four hundred of your Moore's First Early Corn. We planted it April 1st, commenced shipping June 26th, and reaped big profits. The quality was fine. It is miles ahead of Cory, Fresno, Adams or Kinston. Ears were remarkably large and perfect. You will note we took your advice about planting it early."

Shallcross' New Five-Eared Sugar Corn. A truly remarkable production now introduced by us for the first time. Just think of it—five good, well-developed ears of deliciously sweet corn on one stalk, yes, some stalks even loaded with six ears. We know this sounds strong; nevertheless it is true—yes, every word of it. This is a splendid money maker for any market gardener and a great novelty, and desirable, too, for the kitchen garden. It is early also—yes, 10 days earlier than Evergreen. It is a magnificent corn and will be a great bonanza to all who plant it. We want you and all your neighbors to plant it. You will surely regret if you do not follow our advice. This and our Moore's First Early Table Corn will make you big money. It cannot be too much recommended. Just try a peck or a bushel; the more the better for your family mail, postpaid. Pkt. 15c., pt. 25c., qt. 40c., qt. 65c., by express or freight, pt. 20c., qt. 35c., 4 qts. $1.00, pk. $1.50, bu. $7.00.

Hyde's Earliest Sugar. The best of all the early varieties for market. Height 5 to 6 feet. Good size ears of medium rather than good quality. It follows closely our Moore's First Early. We advise every market gardener to plant some of this valuable early sort. It is sure to please. Pkt. 10c., qt. 25c., 4 qts. 75c., pk. $1.25, bu. $5.50.

Hickman's Extra Early Three-Eared. A remarkably valuable early variety for market, excellent quality, very productive, yielding from 4 to 6 bushels per acre. It is the result of many years of careful selection to secure earliness combined with large size, productiveness and fine quality by one of the most successful large sugar corn growers in Gloucester County, N.J., it is sure to please all who plant it. It is so strong that families in "milk" a long time. Matures immediately after Hyde's Early. Pkt. 10c., pt. 15c., qt. 35c., 4 qts. 65c., pk. $1.00.

Howling Mob. Earlier and better than Cory or First of All. Pkt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., 4 qts. $1.00, 1 bu. $2.50, 2 bu. $5.00. ADAMS EARLY EXTRA. Qt. 15c., pk. $1.00, bu. $4.00. (Postage 20c. per pt.)

Cape May Early. Large ear, sure cropper, mas a pearly white. Good market sort. (Postage 20c. per pt.) Pkt. 10c., pt. 15c., qt. 25c., pk. $1.25, bu. $5.00.

CHRYSTIE'S EARLY. Qt. 20c., pk. $1.30, bu. $4.25.

STABLER'S EARLY. Qt. 20c., pk. $1.30, bu. $4.25.

EARLY MAMMOTH WHITE CORN. Qt. 20c., pk. $1.30, bu. $4.25.

TRIUMPH. Qt. 20c., pk. $1.30, bu. $4.25.

EARLY EVANGEL. Qt. 20c., pk. $1.30, bu. $4.25.

EARLY BONANZA. Fine market sort, large ears of juicy quality. Qt. 25c., pk. $1.25, bu. $4.50.

$2. All our Sugar Corn is of 1910 crop. Moral: Buy your corn from us and be sure of your crop.
Moore's New Snow White Evergreen Sugar.

This is without doubt the most valuable Sugar Corn introduced for many years past. It is white as chalk, white marble in color, very pure and clear. Those who have seen the boiling ears say, "I never saw any as white." All the large, handsome ears are filled with very deep thin grains of pearly whiteness and sweeter than any Sugar Corn grown. To see it is to buy it.

The largest Sugar Corn Seed grower in the United States wrote us that there was NO BETTER strain of White Evergreen Corn grown than our Moore's Snow White.

Moore's New Snow White Evergreen

Should be planted by all

Market gardeners, canners and all lovers of good sugar corn who will find it to represent the highest ideal—edible, sweet, tender, fine quality and productiveness. It is just the corn you have long been waiting for. Ears contain sixteen or more rows of beautiful and delicious deep grains. Two and occasionally three attractive large ears are produced on each stalk. Another valuable feature is the grains retain their tenderness and their sweetness longer than any other late sort. It is profit and satisfaction to all who plant it. It always brings fancy prices.

Our seed is limited, and we hope our many thousands of customers will send their orders in early, as we wish every customer to have plenty of this wonderful variety. Generally speaking, those who come first are best served. Pkt. 10c., qt. 25c., 4 qts. 75c., pk. $1.40, bu. $5.00.

Early Zigzag Evergreen. (Hancock's.) Much superior to the old type. Deep grain and true large ear. Pkt. 10c., qt. 20c., pk. $1.70, bu. $4.00.

Stowell's Evergreen. Pkt. 10c., qt. 20c., pk. $1.50, bu. $4.50.

New French Honey Sugar. Pronounced by those who grow it, to be the most delicious sugar corn ever grown. It is a strong, vigorous grower and heavy yielider, with white grain of great size. It has 10 to 14 rows, and comes in after the earlier varieties. No stalk has less than two large ears. Just the sort for the market trade, especially for the retail market. We have a plentiful stock on hand which we are now selling direct to the consumer. Excellent sort for the family garden. We cannot say too much in its praise. Pkt. 10c., 15c., $1.00, pk. $8.00, bu. $30.00.

Price and Perfection Early Sugar

One of the best second early varieties for market. Excellent quality, very productive, yielding mostly two beautiful long ears per stalk. It is the result of many years of careful selection to secure productiveness combined with large size, productiveness and fine quality. The grain is deep and remains in "milk" a long time. Pkt. 10c., qt. 35c., 4 qts. 70c., pk. $1.25, bu. $4.50.

Cooper's Large Early Shoe Peg

We have obtained this delicious sort from Mr. Thomas Cooper, Newport, R. I., who has grown quite wealthy by marketing it to the most critical buyers in Boston and New York. The productiveness of this sort is simply prodigious. When grown on good ground and well suckered, ears of 10 inches in length are often developed. The cob is very small, the grain deep and of rich flavor. Stalks bearing 4 ears are not uncommon. We cannot recommend this sort too highly to all our customers. The ears are just the right market size and is a "mint" for all who grow for summer hotel trade. Pkt. 10c., 15c., 25c., 4 qts. 70c., pk. $1.25, bu. $4.50.

Moore's Late Concord, or Main Crop Sugar. It is strictly an evergreen sort; in remaining long in edible condition it ranks with the best, and is admitted to be the most "everlasting evergreen" of all sweet corns. The ears are one large size, mostly 2 to a stalk, grains deep exceptionally tender and sugary, and has the advantage, as we said before, of remaining lovely in the green state than any other variety. At the time of stock has been carefully grown and selected. Pkt. 10c., 25c., 4 qts. 70c., pk. $1.25, bu. $4.50.

Baltimore Market. A great favorite with Baltimore market gardeners, who prize it for its remarkably heavy yielding qualities. If the mail add 10c. per quart. Pkt. 10c., 20c., 50c., 1.00, bu. $4.00.

Sweet Corn for Fodder. Cattle highly relish it, and when fed on it keep in fine condition and give an abundance of milk. Price subject to market changes. Qt. 10c., qt. 75c., bu. $2.00.

COUNTRY GENTLEMEN. Pkt. 10c., qt. 25c., pk. $1.25, bu. $5.00.

HYDE'S EGYPTIAN. (True.) Pkt. 10c., qt. 15c., pk. $1.00, bu. $4.00.

LATE MAMMOTH. Fine stock. Pkt. 10c., qt. 15c., pk. $1.00, bu. $4.00.

If to go by mail add 10c. per quart on all varieties of Sweet Corn except where noted.
Field Corn

POOR MAN'S CORN

A NEW 90 DAY VARIEY

YIELDS NUMEROUSLY 60 TO 120 BUSHELS PER ACRE

MANY OF OUR MARKET GARDEN FRIENDS MAY NEED GOOD FIELD CORN SEED. YOU CAN GREATLY INCREASE YOUR CROPS OF CORN FROM 20 TO 50 PER CENT. BY A JUDICIOUS CHANGE OF SEED. THE LATEST IMPROVED VARIETIES ONLY ARE THE MOST PROFITABLE SORTS TO GROW. WE OFFER YOU THE BEST FOR OTHER SORTS SEE OUR SEED BUYERS’ GUIDE.

..Double Your Corn Crop...

ADVANTAGES OF CHANGING SEED CORN

There is perhaps no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as a field corn, provided the change is to a well-selected, high-merit type. Our best customers will not plant their own raising of seed at all, but buy of us every year. They can grow nearly double the crop on the same land that they can from their own raising, and of better quality and more salable in the markets. Always “Change your seed” is the motto of all prosperous farmers.

POOR MAN’S CORN

Possessing Magnificent Properties, Splendid Qualities and Tremendous Possibilities. The Most Valuable New Field Corn in the World To-day.

This great corn is the result of a series of crosses and subsequently by a continuous systematic selection, accumulating and perpetuating the superior merits of its parents, we have evolved a superior new variety, which we take great pride in introducing to the trade. It is greatly assisting the poor farmer who has little money with which to buy fertilizer. It is strong, rich soil, but has not the size. It is of good size, handsome, with large, deep grains of a rich orange color, and very small red cob, rarely producing less than two growing per bushel and shells easily. It is also adapted to a greater variety of soils than any other varieties, producing unusually well on light or heavy land, where other varieties would not thrive. It is a fine variety which we elected corn in 85 days, planted May 25th. One hundred and thirty bushels shelled corn to the acre, a common good crop ground, with no extra, but not extra, cultivation. Moreover, it commands the highest market price. It is destined to be planted largely. You should be among the first.

Kansas Golden King Early Dent Corn.

This glorious corn combines solid merits, grows large ears and matures early. The ear grows larger than the Leading Corn, and on poor, thin soil will yield 40 per cent. more. For many years we have made the varieties of field corn a careful study and through investigation we have seen samples of corn grown in nearly every State in the Union, and personally tested with the object to secure an early maturing variety that would yield the most shelled corn to the acre and at the same time command the highest market price. We are confident that we have attained this end in the Kansas Golden King Early Dent Corn from the Great Eib Horn Valley, Kansas. Will mature in from 80 to 85 days, stalks vigorous, growing from 6 to 10 feet high without exhausting the soil, and as it roots deeply, it will stand the drought better than any other late sort. The grains, as shown in the illustration, are unusually deep, and when dry 81 well-selected ears will make a bushel of shelled corn. This variety will yield from 10 to 20 bushels more corn to the acre than any other late sort, and matter whether planted on high or low ground, its yield is equally marvelous. From 60 to 10 bushels per acre is not uncommon yield on good corn ground. It is sure to please all who plant it. Price, carefully saved for seed, pt. 30c., lb. 50c., 3 lbs. 1.25c., postage paid. By express or freight, qt. 75c., 4 qts. 45c., pk. 75c., 3/4 bu. 81.20, bu. 82.25.

North Dakota Extra Early Prizetaker Dent

This is without doubt the earliest yellow dent corn in cultivation, bright orange color, short leave stalks growing from 8 feet high to 5 feet high. All the desirable ears, small red cobs, deep grains, very rich in oil and starch, and the most prolific of the northern parts. It will make better fodder than any other known variety and a stock corn to eat with evident relish. It ripens earlier, dries out quicker, stands the late drought better, and will yield more. No. 1 shelled corn than any other early variety and three well covered ears on a stalk is no uncommon thing to see in this sort. Seventy pounds of ears when shelled weighed 43 pounds leaving the cobs to weight 24 pounds. No extra early yellow dent corn in America can get up to it in earliness and big yields. For the last 10 years it has never failed on account of early frost. It was at harvest every time. It will mature as early as Early Yellow Canada or Longfellow flint. We cannot too strongly urge its merits upon our farmer friends. Price of the North Dakota Extra Ear Prizetaker Dent Corn, carefully saved for seed, pt. 30c., lb. 35c., 3 lbs. 1.00c., postage paid, by express or freight, qt. 15c., 4 qts. 40c., pk. 75c., 3/4 bu. 81.20, bu. 82.25.
Figure it Out for Yourself

It costs but 35 cents for seed for 1 acre, freight included, for any of our improved varieties of seed corn; 50 acres of Diamond Joe's Big White will make you a yield of 4,000 to 5,000 bushels. 50 acres planted to common varieties will make you 1,500 to 2,000 bushels. Here is a difference of 2,000 to 3,000 bushels or less than a CENT PER BUSHEL FOR THE INCREASED YIELD, or a hundred times the cost of the seed. Figure it out for yourself.

DIAMOND JOE'S BIG WHITE

This wonderful new variety of white corn was originated and first introduced 4 years ago and is now acknowledged by farmers, planters and corn growers everywhere as the "King of all White Corn" for light, thin or sandy land. When we catalogued the corn the first year, although we had about 8 thousand bushels of it, our entire stock was exhausted long before the season was over. Since then we have grown it much more extensively, but each succeeding year the demand for it has increased until we have always sold out long before planting time was over. Those who were fortunate enough to secure some of this corn won a prize, and everywhere doubtless they thrived on light land and without exception were well pleased. In fact it would make one gape with astonishment to see and read the reports that come to us about the wonderful yields this corn has made on thin or sandy soil. From nowhere comes a word of disappointment, but all are enthusiastic and loud in its praise when hunking time comes. DIAMOND JOE'S BIG WHITE" is incomparable with any other white corn we have ever before grown or handled in all our 40 years' experience. It is especially well adapted to old, thin, or sandy land, and on good strong corn ground there is no variety in the world that makes more big bushels of good, sound, well matured corn to the acre. It is absolutely free from barren stalks, every stalk bearing 1 to 3 well developed ears. It is very early to maturity, making itself anywhere in from 90 to 100 days. It will thrive and do well in extreme drought. In short, "DIAMOND JOE'S BIG WHITE" is a superior variety of corn from every point of view over any white corn in the world. If you are looking for a white corn that will make you the most bushels and the most money on light land, plant this now and order enough to plant your entire crop. It's the white corn that will do it, Pkt. 10c., lb. 30c., 3 lbs. 85c., by mail, postpaid; pk. 75c., bu. $2.50, 2 bus. $4.75, by express or freight at purchaser's expense.

LONG'S DROUGHTPROOF

A New Yellow Dent Corn

Redist Drought and Scorching Heat better than any other yellow variety. More corn fields have been ruined by the drought and hot sun killing the tassel and pollen this past season than the writer has ever known, and especially is this fact true in the great corn belt. This magnificent new yellow dent corn went through 6 weeks of growing weather without a drop of rain, and the best the most severe known in this section, and it has made a crop where other sorts failed on account of dry weather. All fields that leaned towards the hot sun burned up. The pollen on these fields was killed, therefore the silk was not fertilized, result, no grains on the cob. On the other hand, a large field of this wonderful strong-growing variety, which leaned toward the sun, kept green and yielded over 100 bushels per acre. We do not hesitate to say that all points considered—its beautiful color, small cob, long yellow grains, large ears—taking all points combined, it is the finest drought-resistant yellow corn ever introduced, and each customer who gives it a trial will be fully convinced that it is the best 50 to 100 day corn he ever planted.

Droughtproof Corn is phenomenally excellent, and must be tried by all farmers. It will yield big crops wherever corn can be grown. We advise all our friends to try it.

Pkt. 10c., lb. 30c., 3 lbs. 85c., by mail, postpaid; by express or freight, not prepaid, pk. 75c., bu. $2.50, 2 bus. $4.75.
Moore's Earliest. Remarkable and Highly Valuable Early Cucumber. Has yielded $1,100.00 per acre. The superior and the best shipper of all White Spines. It is the variety that will return you the most money, no matter where you ship it. As an extra early White Spine Cucumber there is no strain equal to this. It is truly an evergreen, retaining its beautiful dark green color until fully ripe. It is a sport from our famous Green Fourmier Cucumber. We have devoted a number of years to the careful reselection of the finest specimens for seed purposes, and herewith offer it to our many thousands of customers. Color is dark olive green, white or light spines running from blossom end. It is the earliest and finest formed of all the strains, and the best for home market or shipping. It is smooth, tender, crisp, remains green on the vine and after picking. It is very hardy. We recommend this as the best strain of extra early White Spine for the market gardener. It seems to be peculiarly adapted to both northern and southern soils and climates, always developing symmetrical fruit of a beautiful dark olive green color, from six to ten inches in length. At the same time it gives the earliest picking and the largest crop of any known variety. The vines are robust and very free from disease, which is so devastating to many varieties. Indeed, the fact of its combining every good quality, its ready and quick sale in our market at double common sort prices, its fine appearance and its remarkable, astonishing productiveness led us to give it the name of Ideal. We can heartily recommend it to all who desire a really matchless cucumber for shipping long distances, as it holds its beautiful dark green color longer than any White Spine hitherto introduced. Our word for it: Every cucumber grower should plant it. It will yield more money to the acre than any other sort. Pkt. 10c., oz. 15c., ½ lb. 45c., 1 lb. $1.50, 5 lbs. $6.50, postpaid.

Important to the Planter. All our Cucumber Seed is very carefully grown under our own supervision, from very carefully selected stock seed. No two crops of seed are grown in succession on the same ground, thus avoiding all possibility of blight from this source. We also practice this policy in growing all our tomato, melon and potato seed. The careful and intelligent planter will at once realize that this method renders our seeds much more valuable than seeds grown in the usual way by others, and market gardeners, large planters and associations will get none but the very finest quality of this important seed from us, and we are prepared to furnish any quantity our largest planters may require.

MATCHLESS WHITE SPINE

(Private Stock)

This private strain we have had over ten years, and it is the most thoroughbred, uniform and shapely variety known among the White Spine type, not only for first early but for general crop as well. In purity it is unequalled. Vines are vigorous growers, heavy and long continuous yielders. Keeps green much longer than the yellow varieties. No sort exceeds it in crispness and flavor. Every market gardener and shipper knows how difficult it is to secure pure cucumber the last of the season. A matchless strain. Being absolutely without mixture, we are sure it will be quickly appreciated by all critical growers. Selected seed.

Early Fortune. Originated near Baltimore, Md., and is a fairly good type of early long White Spine. Our stock is very pure. Oz. 10c., ½ lb. 25c., 1 lb. 75c., 10 lbs. $7.00.

Burrell’s Early Klondike. Early, smooth, long and of good deep green color: good shipper, pure stock. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 75c., 5 lbs. $3.50, 10 lbs. $6.00. Large buyers of any kind of cucumber will be quoted special prices upon stating quantity wanted.

California Gem. A remarkably fine sort of the White Spine class. A great favorite in all markets. Long and symmetrical. Its wonderful yield, coupled with the high price it sells for, makes it very profitable for the grower. A real good thing.

PEACEFUL WHITE SPINE. Heavy cropper. Oz. 10c., ¼ lb. 20c., 1 lb. 70c., 10 lbs. $6.50.

LONG GREEN TURKEY. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 75c.

DAVIS PERFECT. New. Oz. 10c., ½ lb. 35c., 1 lb. $1.35.

ARLINGTON WHITE SPINE. A rich dark green color, averaging seven to eight inches in length. Very fine type. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 75c., 5 lbs. $3.00.

EARLY SHORT GREEN. Oz. 10c., ½ lb. 25c., 1 lb. 75c.

NEW EVERGREEN. White Spine. Oz. 10c., ½ lb. 25c., 1 lb. 75c., 5 lbs. $5.00.

Boston Market or Prize-Taker. A great favorite in the Boston market. Immensely productive, fine picking variety. In length it is medium, between the White Spine and Long Green. Very thick through and full at both ends, presenting a beautiful type. An excellent market sort.

Fordhook Famous. Always straight and well formed, they never turn yellow, and critical buyers are willing to pay an extra price on market for these unequaled fruits. The grower says it is undoubtedly the finest long-fruited strain in cultivation.

Important to the Planter. All our Cucumber Seed is very carefully grown under our own supervision, from very carefully selected stock seed. No two crops of seed are grown in succession on the same ground, thus avoiding all possibility of blight from this source. We also practice this policy in growing all our tomato, melon and potato seed. The careful and intelligent planter will at once realize that this method renders our seeds much more valuable than seeds grown in the usual way by others, and market gardeners, large planters and associations will get none but the very finest quality of this important seed from us, and we are prepared to furnish any quantity our largest planters may require.

MATCHLESS WHITE SPINE!
recommend it as a color; the young fruit being dark green, straight and tender, makes an excellent pickel, market gardener and those who have home gardens. Every one who grows cucumbers will be delighted with it.

Moore's Gladiolus Cucumber. This cucumber is held in great esteem by the wealthy variety and surpasses all others of its class for its delicious flavor, and size. A single plant will often yield fifteen magnificent long, crisp cucumbers, from ten to fifteen inches in length. It is pre-eminently the finest sort grown for sliping, being rare, brittle and crisp in all stages of growth. It is of a beautiful clear dark green color, very even and smooth and straight. The green cucumbers are fit to eat at any stage, the flesh is entirely white, very clear, peculiarly crisp, tender and brittle. It is likewise a grand sort for "salting" or pickling and will always outsell any similar sort. Pkt. 5c., oz. 10c., ½ lb. 35c., lb. $1.25.

Paris Early Cluster. This is the most remarkable and valuable of all pickling cucumbers, and our illustration gives a very clear idea of its wonderful productiveness. For several years we have made cucumbers for pickles a study, testing and originating new sorts for this purpose, and now we think we have perfection in our Paris Early Cluster. It is short (just the right length), bearing in numerous clusters near the root, of fine form, solid and crisp in texture, excellent in quality, and combines all the elements to make it a superior pickles as well as for sliping. Its productiveness is marvelous, cropping from 50 to 60 bushels per acre on good ground. We attempt to show that gardeners will find it by all means the best offered in America, and to always command the highest market price. Over 5,000 of our customers planted this valuable variety in 1908, and all pronounce it the ideal sort for commercial pickling purposes. Pkt. 5c., oz. 10c., ½ lb. 50c., lb. $1.00, 5 lb. $4.30.

English Pickling. The vines are excess- elving habit; enables the hanging fruit to grow perfectly straight; the cucumbers are thick, tender, and of delicate flavor. When young make attractive pickles. Pkt. 10c., oz. 20c., ½ lb. 50c., lb. $1.50.

WEST INDIA GHERKINS. A very small, oval, prickly sort, distinct from all others. Pkt. 5c., oz. 10c., ½ lb. 35c.

Queen's Golden Cucumber. New, extensively grown in China and exceptionally by the estw, owing to its many delicious qualities. We have occasion to state that one of our customers having a garden will give it a trial. Pkt. 10c., oz. 20c., ½ lb. 50c., lb. 60c.

Japanese Climbing Cucumber. It bears abundantly throughout the season, while the climbing habit enables the hanging fruit to grow perfectly straight; the cucumbers are thick, tender, and of delicate flavor. When young make attractive pickles. Pkt. 5c., oz. 10c., ½ lb. 50c., lb. 80c.

New Giant White Cucumber. The flesh is very solid, pure white, with exceptionally few seeds, and is exceedingly crisp, of most superior flavor. Pkt. 5c., oz. 10c., ½ lb. 40c.

Serpent, or Snake Cucumber. A remarkably and very interesting curiosity. The cucumbers grow curled up like a snake with the head protruding and sometimes are six feet in length. Pkt. 5c.

DANDELION

The Dandelion resembles Endive and is sometimes cultivated for spring greens, or for blanching for salad, also a valuable remedy for diabetes. Many market gardeners, and especially those near large cities, will find this to be a very profitable crop.

FRENCH or CABBAGING. An improved thick-leaved early variety, double the size of the common dandelion. The only sort worth planting. Very profitable to grow for market. Pkt. 10c., oz. 25c., ½ lb. 50c., lb. $1.25.

FENNEL

CELERY-ROOTED FENNEL. Cultivated same as parsley. Thickened part of the root should be covered with soil, similar to celery. Pkt. 5c., oz. 35c., ½ lb. 30c.

MONTAGUE'S GREENHOUSE

This is a grand American variety for greenhouse culture. It is the result of years of careful selection by Mr. Montague, the most successful commercial cucumber grower in America. It has a wonderfully rich, glossy green color, and is far superior to any other American forcing sort. Wonderfully productive, tender, smooth, very even and regular in form; besides it brings the highest market price in every market. Fruit will average from seven to ten inches long. You will find it just right. Pkt. 10c., oz. 35c., ½ lb. $1.20.
Superior Varieties of Egg Plant

Our Highly Bred and Critically Selected Types are Superior in Color, Shape, Size and Productiveness, and Unequaled for Home Market or Shipping. Our Varieties are Money Producers

**NEW EGG PLANT**

**AIOPEOSES EARLY BLACK BEAUTY**

This is said by many of our Customers to be the King of Egg Plants, especially to those who grow for market. It is no less valuable to those who grow for their own table. This is the result of years of careful selection from our well-known New Jersey Improved, which has given such universal satisfaction to the many thousands who have grown it. Moore's Early Black Beauty is absolutely the most productive and best selling large black fruited Egg Plant grown. The skin is of a beautiful deep lustrous black color and does not turn yellow in transit; flesh very white, tender and of superior quality. The entire plant is spineless, of a low, stocky branching habit, a continuous producer and very thrifty growth, with no disposition to blight like the older sorts. All say it is a perfect "Beauty." No seed saved from diseased plants. Always sure to yield a heavy crop, and very desirable for shipping. Southern market gardeners and shippers will find this variety the very best in cultivation. It will average from $6 to $10 fine fruits to the plant. The best variety of Florida planters. Mr. T. Lane Moore, Manager for John Simon, Commission Merchant, Philadelphia, says: "Your Moore's Early Black Beauty Egg Plant is the finest that comes to this market." There are many other strains, but we regard this as being the best. Pkt. 10c., oz. 25c., $1.40, lb. $4.00.

**IMPROVED NEW YORK SPINELESS**

We have a very superior type—none better in fact—of this noted variety. It is a continuous producer of large, handsome, purple fruits. Pkt. 10c., oz. 25c., $1.00, lb. $4.00.

**EARLY PURPLE TOKIO**

(New.) This grand new sort is from 5 to 8 days earlier than any other large fruited sort. This is a highly valuable feature, besides it is the most productive sort we ever saw. Each plant will yield from 13 to 20 beautiful large fruits a season. It will thrive anywhere an egg plant will grow, and it is being more extensively grown every year. Hundreds of Our Most Critical Growers Prefer It Even to Our Famous Moore's Early Black Beauty. Fruit round, of a handsome purplish black; very few seeds; early; enormously productive and superior quality. We believe it to be the ideal sort for the market gardener and shipper. A Good Keeper and the Best Long Distance Shipper We Know Of. Pkt. 10c., 3 Pkts. 25c., oz. 50c., $1.50, lb. $5.50.

TESTED SEEDS

All our seeds are carefully tested before being sold to our customers. We make many thousands of soil tests in greenhouses, cold frames, hot beds as well as laboratory, for vitality. The germination must show a high standard of vigor, so that our customers can depend absolutely upon their trustworthiness in this very important respect; and the steady increase in our business from year to year is due to the constantly widening circle of Market Gardeners who have the highest confidence in the high quality and reliability of our seeds.

HORSE RADISH

ORDINARY KIND. Medium size roots, 8 for 20c., per doz. 25c., 90c. per 100. by mail, postpaid. By express, medium size, per 100, 30c., per 1000, $1.00. Large roots, per doz. 20c., per 100, 50c., per 100, $3.00.

MAMMERN-KREN or BOHEMIA. Much earlier and said to grow longer, thicker and smoother roots than the old sort. Will produce one third more to the acre. Skin thin, flesh very white. 50 roots, 30c., 100 75c., 200 $1.40, 500 $5.25, 1000 $10.00. If by mail add 30c. per 100.

KALE OR BORECOLE

This popular boiling green for winter and early spring use is being planted more largely each year as a market crop. Shipments from southern states reach northern markets during the winter months in large quantities, and in some sections it is almost as popular as spinach. We have found the following sorts to be the best for market.

Norfolk Green Curled Scotch. (Long Standing.) Beautifully curled, very hardy, immense yilder. The hardiest and best for fall sowing, to winter over in northern latitudes, heavy cropper. Pkt. 5c., oz. 10c.,½ lb. 25c., 1b. 80c.

Welsh Curled. Beautifully curled, long plume-like leaves, heavy and long continued yielder. If not cut too close to the ground it will yield continuously from spring until winter. Quite hardy; the best and most profitable sort for year-round as well as for market either North or South, enormous cropper. Pkt. 5c., oz. 10c.,½ lb. 30c., 1b. $1.00.

DWARF GERMAN GREENS. Not hardy north of Virginia. Pkt. 5c., oz. 10c.,½ lb. 25c., 1b. 60c.

SEA KALE. Pkt. 10c., oz. 25c., ½ lb. 75c.

KOHL-RABI or Turnip Rooted Cabbage

Earliest Erfurt White. The shortest leaved and best early market variety, being cuttely stringless, tender and sweet. The best variety for forcing in frames or outdoor culture. The best and most profitable sort for market either spring or fall. Pkt. 10c., oz. 30c., 1½ lb. 50c., 1b. $1.00.

Smoother WHITE SHORT-LEAVED VIENNA. Not as early as the above. Pkt. 10c., oz. 90c., 1½ lb. 60c., 1b. $2.00.

Smoother Purple SHORT-LEAVED VIENNA. Pkt. 10c., oz. 90c., 1½ lb. 75c., 1b. $3.00.

Market Gardeners will find the above types of Kohl-Rabi the finest procurable.

LEEK

Sir Ayton Castle Winter. (New.) The largest and best sort, of exceedingly fine quality and good flavor. The best for market or private use. The best winter keeper. Pkt. 10c., oz. 20c., 1½ lb. 60c., 1b. $2.00.

Large Improved New Giant Italian. Extra stocky and better than the London Flag. Pkt. 5c., oz. 90c., 1½ lb. 45c., 1b. $1.50.

Large London Flag. English grown, true. Pkt. 5c., oz. 15c., 1½ lb. 50c., 1b. $1.00.

"Your Sir Ayton Castle is a grand variety, the finest I have ever seen. Nearly a foot in length and 2 inches in diameter, and will get much larger. It is a good keeper." Mr. A. Willis, Frankford, Pa.
MONEY-MAKING LETTUCE

SUPERB VARIETIES FOR HOME MARKET OR SHIPPING. Each One Illustrated
Bigger Crops, Bigger Prices, Bigger Profits Are Assured to All Those Who Plant Moore's Lettuce Seed

THE BEST EARLY LETTUCE EVER INTRODUCED

White, buttery heads, crisp, tender and sweet. Our illustration shows its heading qualities to perfection. The best of all Early Lettuces for growing either in the open ground throughout the north or in Florida, or along the Atlantic and Gulf coasts. Thousands of acres of this valuable variety are now grown throughout the United States for home markets and shipping. Pkt. 10c., oz. 30c., ½ lb. 75c., lb. $2.00. Large buyers will be quoted special prices by stating quantity wanted.

MOORE'S EARLY CABBAGE HEAD LETTUCE

A Grand Large Early Cabbage Lettuce. Wins Praise from All Users.

Produces immense Solid White Heads, 8.10 and often 12 inches across. The Ideal Lettuce for first Sowing, either under sash, "cotton," or open ground borders. Unsurpassed as an early market variety for both Northern or Southern growers. Very tender and will remain in good condition longer than Big Boston. If you grow early cabbage to ship long or short distances, it will make you better money than any other sort.

It has required years of careful crossing and selection to bring this up to its present high standard. It is in fact an all season's lettuce, as the testimonials from some of the leading and largest lettuce growers in the United States show. Whether grown in the open ground, for summer or fall use, or in frames for spring or forced in cool greenhouses for winter use, it always gives both the grower and the user the utmost in satisfaction, producing during all seasons splendiferous results. All early sorts for growing in the open ground are adapted to the moist, sandy loam of the Southern States, were lettuce is produced in enormous quantities. A large tonnage of Moore's Lettuce is grown here. It is 99 per cent pure and I could not get along without it."—W. E. Smith, Baltimore, Md.

WHITE NORMANDY STONEHEAD

Heat resisting: a sure header; show to run to seed; not affected by the hottest weather. This superb new variety is due to us by one of the largest and most successful market gardeners in Normandy, France, where it is grown to the exclusion of almost all other varieties. Normandy is noted for its hot, dry summers. Notwithstanding this, the White Normandy produces large solid heads during the entire season. The plants have made it through the years in various parts of the country show it to be a remarkably valuable variety for the United States. The heads are large and firm, very tender, crisp and clear white inside, and of a beautiful shade of light green on the outside. It is well adapted for spring, summer and autumn crops, and will offer produce the finest marketable heads where other varieties fail utterly. It will withstand more cold weather in the open ground than any heading sort known, which makes it very valuable for a late fall crop in northern States, but to winter lettuce growers in the South this cold-resistant feature makes it invaluable. Pkt. 10c., oz. 30c., ½ lb. 75c., lb. $2.00.

CALIFORNIA GIANT FORCING

Every plant, and the heads are uniformly shaped, very large and thick through, and of a solidity equal to that of cabbage. Thick stem, firmly packed, with large, long, round, and solid heads. The leaves are slightly crinkled, of a beautiful white color, and for tender-ness it is unsurpassed by any existing variety. It heads very rapidly. A great favorite with Southern growers and market gardeners everywhere both North and South. It is especially valuable for open-ground culture and for growing under cotton or in late crop under sash. As a shipping sort it is the best cutter of all and always sells for an extra price. Every lettuce grower who plants it will be delighted with the results. It is in trial on good rich soil. Pkt. 10c., oz. 30c., ½ lb. 75c., lb. $1.50.

CALIFORNIA GIANT FORCING LETTUCE.
HOPKINS' BIG BOSTON LETTUCE

The King of This Type of Head Lettuce. Immense Heads as Solid as a Cabbage and of Superior Quality.

This magnificent strain of Big Boston Lettuce is the result of a very systematized and intelligent selection of some of Philadelphia’s most successful market gardeners. After giving it careful consideration, and having grown and tested ourselves, as well as in the largest lettuce growing sections of the United States, we have selected the best types that we decided to offer it to our many thousand market gardeners and customers throughout the world. It is a great keeper, a true impregnated hybrid, and we especially recommend it to all lettuce growers who wish a long distance. It seems to have little or no tendency to go to seed, which is a highly valuable feature for all lettuce growers. It will stand longer on the ground, and leaves in cold weather, being cut on any type of Big or Large Boston Lettuce you ever had. It is a grand success, and as one of its best qualities, it gives a greater amount of heads and with a view of producing larger heads, with leaves of finer and crispier texture, while heads only repeat big, and in giving our customers and more compact heads and heads that will stand longer without going to seed, and to have 100 plants produce 100 large, beautiful heads of superior quality.

NEW TURKISH BUTTER LETTUCE

The Great Hot Weather Lettuce. Immense Heads—12 to 15 inches across. Blanches Beautifully, is Crisp, Tender, Sweet and Absolutely Free from Bitterness. In short, it is the Acme of Perfection for a Spring and Summer Lettuce. It grows during hot, dry weather, when no other sort will.

Those who like a cabbage lettuce, with rich, buttery leaves of great substance, will be thoroughly satisfied with the new variety for Turkey, which is accurately shown in the illustration herewith, engraved from a photograph. It stands hot weather without becoming bitter or ruffly, and bears beautiful, large, solid, creamy white heads of superb quality and of delicious, rich, butter flavor, crisp, tender, succulent, with the result of many years’ careful selection and improvement by us. It is a deep root, resisting hot, dry weather to a remarkable degree. The outer color is a distinct apple green, and the leaves are very extensively grown by thousands of market gardeners in all localities of the country and from whom we receive glowing reports. It has come to stay, and is a standard main summer crop hot weather lettuce. It has few outer leaves, and we might very appropriately call it an AllHead lettuce. It is very early, and slow to run to seed, and it will stand in good condition fully two weeks after it has been up. It may be sown in late April for the other Big Boston or Mammoth Salamander. Most highly recommended for family gardens or the market gardener who wishes fancy prices for what he grows. We highly recommend it for early spring and early fall planting. It never shows any brown or black spots, and is free from blight. Pkt. 5c., oz. 15c., lb. 60c., lb. $1.00.

MOORE’S NEW SUMMER GEM

This is undoubtedly one of the largest heading varieties of all summer lettuces and particularly valuable for summer planting. The heads are large, from 12 to 15 inches across; form up rapidly and are of a beautiful creamy white color, very crisp and tender. Market gardeners in warm sections write us that it heads up uniformly and is among the most snails lettuces they ever had. Excellent for market gardeners. It should have abundance of water. Don’t fail to try it. Pkt. 5c., oz. 20c., lb. 50c., lb. $1.50.

Moore’s Summer Gem.
LETTUCE HIGH GRADE VARIETIES (Continued)

NEW ROMAINE CELERY

A GOOD NEW LETTUCE. Very profitable to grow. This new sort produces a sweet, tender, and compact head. Very free from bitter flavor, this lettuce is at once the best for market or for the table. Ordinary lettuce, grown in the open ground, generally leaves a bitter taste. squares the head, makes better, longer heads, and is valuable for market or home use. The head remains tender for a longer time. Our description of the variety in our catalogue includes a description of the New Romaine Celery. Pkt. 10c., oz. 15c., ½ lb. 40c., lb. $1.50.

PARIS WHITE HEART or TRIANON. Produces long-pointed, compact heads. The heads have to be tied to the plant. Oz. 15c., ½ lb. 35c., lb. $1.50. BIG BOSTON. We have a very fine strain of this important variety. See our description of our New Hopkins’ Big Boston on page 25. We solicit correspondence from large buyers and associations who plant this important variety. Pkt. 10c., oz. 15c., ½ lb. 40c., lb. $1.50.

PARIS WHITE HEART or TRIANON. Produces long-pointed, compact heads. The heads have to be tied to the plant. Oz. 15c., ½ lb. 35c., lb. $1.50. BIG BOSTON. We have a very fine strain of this important variety. See our description of our New Hopkins’ Big Boston on page 25. We solicit correspondence from large buyers and associations who plant this important variety. Pkt. 10c., oz. 15c., ½ lb. 40c., lb. $1.50.

CUT AND COME AGAIN. A very crisp, sweet and tender variety for sowing thickly in rows; it can be repeatedly cut during the season; excellent for market and for home use. Will make good heads if properly thinned. Should be cut about 2 inches from the ground. You will like it. Pkt. 5c., oz. 15c., ½ lb. 40c., lb. $1.50.

MORE’S SELECTED EARLY DUTCH BUTTER. (Private Stock.) A sure heading variety. The best strain of Dutch Butter for growing during winter and early spring under glass. Large solid heads of delicious quality. Sow every 5 lb. per cent. sure best for market purposes. Pkt. 10c., oz. 25c., ½ lb. 75c., lb. $2.50.

MAMMOTH SALAMANDER. Extra selected stock. Large heads, resisting summer heat. Very fine strain. Oz. 15c., ½ lb. 45c., lb. $1.50.

MAMMOTH SALAMANDER. Oz. 10c., ½ lb. 30c., lb. $1.00.

GRAND RAPIDS FORCING. Pkt. 5c., oz. 15c., ½ lb. 30c., lb. $1.00.

HARRIS WHITE SUMMER DRUMHEAD. Good summer sort. Large, solid, very tender heads. Pkt. 5c., oz. 15c., ½ lb. 45c., lb. $1.50.

MAMMOTH BLACK-SEEDED BUTTER. Extra selected stock. Oz. 15c., ½ lb. 30c., lb. $1.00.

MAMMOTH BLACK-SEEDED BUTTER. Extra selected stock. Oz. 15c., ½ lb. 45c., lb. $1.50.

MOORE’S MAGNUS BONUM. Oz. 20c., ½ lb. 60c., lb. $2.00.

BLACK-SEEDED SIMPSON. Oz. 15c., ½ lb. 30c., lb. $1.00.

ARLINGTON TENNIS BALL. Extra selected stock. Good shipper and grower. Oz. 15c., ½ lb. 60c., lb. $1.00.

HANSON. Good summer sort. (Rutledge’s Private Stock.) Early, rapid grower, very solid, compact white tender heads. This extensive grower of white lettuce should be most valuable for families and large lettuce raisers as it realizes a higher price than any other Boston grower. The most reliable and profitable of all the sorts of lettuce for growing in greenhouses. Pkt. 10c., oz. 75c., ½ lb. 2.50, lb. $8.00.

Boston White Hot House. (Rutledge’s Private Stock.) Rapid grower. Very solid, compact white tender heads. This extensive grower of white lettuce should be most valuable for families and large lettuce raisers as it realizes a higher price than any other Boston grower. The most reliable and profitable of all the sorts of lettuce for growing in greenhouses. Pkt. 10c., oz. 75c., ½ lb. 2.50, lb. $8.00.

SPECIAL FORCING GRAND RAPIDS. (Sloan’s Stock.) Better color and very compact. Pkt. 10c., oz. 25c., ½ lb. 50c., lb. $1.75.

NEW FRENCH POULTRY LETTUCE. Probably every poultry raiser knows how eager poultry are to eat lettuce, how they seem to enjoy it, and when opportunity offers, to actually fight for it. The French and Belgians are said to produce the finest, most tender, white porked lettuce grown, and largely attribute their great success to the great quantities of lettuce which they freely feed their fowls on. After considerable experience, we have become convinced of the value of this valuable feed for our customers. It is a very strong grower, a small spot of ground will yield a prodigious quantity of tender lettuce leaves, which are cheap, wholesome, and a pleasant food for poultry. It is a very good grower, and can be grown in cold frames or under glass for market or family use during the entire year. It is in demand for the market both in the North and South, and is extensively raised for family use during the entire growing season.

A FEW OF THOUSANDS

GENTLEMEN:—"I had the earliest and finest tomatoes in Henderson county this year, all grown from your seed."—J. A. HENDRICKS, H. D. 2, HENDERSON, T. A. HENDRICKS, H. D. 2, HENDERSON, TENN.

"Your Cabbage seed is the best in this section, and we pronounce your IXL Tomato all O.K. It's a wonder."—J. C. BELLAMY & SON, VICTORIA, FLA.

TWO RECENT NOVELTIES

THE WONDERBERRY. (We herewith give the introducer’s description of it.) Fruit more like a great, rich, luscious blueberry than anything else. Blue in color, fine in flavor and unsurpassed for eating raw, cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced, and is equally valuable for the North, South, East or West, as it ripens in the cold, hot, dry regions of the West, the Great Plains and the South, where fruits are always scarce, and is sure to have a place in every garden and on every farm. It is a great improvement, and will be valuable in the future.

HOLT’S MAMMOTH SAGE. The plants are of strong growth, attain a height of 1 foot the first season and spread so that a single plant covers a space 1 foot in diameter. They are perfectly hardy and make a still larger growth the second season. Our illustration shows a leaf of natural size; they are borne well above the ground, are strong in flavor, of unusual substance and of superior quality. It does not seed. Price, each, 15c., 3 for 25c., 7 for 50c., 15 plants for $1.00 by mail, postpaid.

A Leaf of Holt’s Mammoth Sage (Plants only).
NEW ORDWAY PINK

It gives us much pleasure to offer our customers a limited quantity of this grand new melon seed, which we have developed near Ordway, Colorado, and which we introduced in 1898. This new seed will make a mistake in planting it. It has a tough, thin rind, well-arched ribs and the fruit is of a reddish orange, very thick, fine-grained and spicy, not containing too much water or acidity, so the flavor cannot be excelled. Seed cavity small and even, the fruit is of the seed to the rind, which is not netted. The blossom end is well protected. Shape oblong, averaging six inches long and tapering at the ends. It is an excellent shipper and will carry nearly two weeks without ice. This melon has brought hundreds of growers highly profitable returns and it will pay you to grow it. Stock seed. Pkt. 10c., oz. 20c., 1/2 lb. 50c., lb. $1.50, 5 lbs. $7.50, postpaid.

Burrell Gem (Stock Seed). This seed is cut from melons of the finest possible selection, as to uniformity of size, shape, netting and quality. In fact it is saved with the same care as we exercise in breeding up a new variety. Pkt. 10c., oz. 20c., 1/2 lb. 50c., lb. $1.50, 5 lbs. $7.00, 10 lbs. $13.50, 25 lbs. and up at $1.25 per lb., postpaid.

Thoroughbred Rocky Ford Cantaloupe—Watter's Solid Net. The melons are very uniform in size. As grown for seed nearly one and one-half to two pounds per plant, a good one for shipers. For a market melon this variety is unsurpassed. A ripe melon is large, round, of fine texture, is of a rich golden color on the outside, and very fine on the inside. Seed cavity very small. Seed excellent. Stock seed. Pkt. 5c., oz. 10c., 1/2 lb. 30c., lb. $1.00, 10 lbs. $9.25, 25 lbs. $21.00, 50 lbs. and upward 50c. per lb.

Eden Gem Cantaloupe (Stock Seed). The earli-est Eden Gem made, this variety is a most desirable new melon. It has the highest yielding melons, as compared with all varieties grown in our fields. The melons are a uniform size and shape, and are as attractive on the market as any variety. Seed cavity small, seed excellent. Stock seed. Pkt. 5c., oz. 10c., 1/2 lb. 30c., lb. $1.00, 10 lbs. $9.25, 25 lbs. $21.00, 50 lbs. and upward 50c. per lb.

Rocky Ford. (Improved Netted Gem.) Oz. 10c., 1/2 lb. 25c., 1/2 lb. 50c., 1 lb. $1.50, postpaid.

Shipper's Delight. (Crawford's Strain.) Very early, good quality, immensely productive; sells for fancy prices. Oz. 10c., 1/2 lb. 40c., lb. $1.25.

MATCHLESS EARLY MUSK MELON

Positively the Earliest Green Fleshed Musk Melon Ever Grown, Outyielding All Other Small Sorts. Ideal Size for Dessert. A Healthy, Vigorous Grower. Exceedingly Prof. it. It is a small melon, weighing 1 to 1 3/4 pounds. The flesh is deep and thick, and light greenish in color, except the seeds, where it inclines toward yellow. The flavor is exceedingly fine. The skin is green, regularly ribbed and thickly netted. It is a self-pollinating variety, and can be grown with excellent success when well in, and at a slight cost. The fruit is of the seed to the rind, which is not netted. The blossom end is well protected. Shape oblong, averaging six inches long and tapering at the ends. It is an excellent shipper and will carry nearly two weeks without ice. This melon has brought hundreds of growers highly profitable returns and it will pay you to grow it. Stock seed. Pkt. 10c., oz. 15c., 1/2 lb. 50c., lb. $1.50.

Matchless Early Musk Melon
MUSK MELON—All Seed Carefully Saved from Selected Melons

FRENCH CANTALOUPE

We regard this as one of the very best and most profitable extra early melons in existence for market gardeners and shippers, and nothing among the green-fleshed varieties surpasses it for quality. We have the honor of introducing this singularly beautiful melon, which was placed in our hands by the raiser, Mr. Vancluze, of Paris. In quality this kind lasts all year, and every home garden should include it. Medium-sized, round, with salmon-red flesh, so rich, sweet and juicy that it needs to be eaten with a spoon. No other melon compares with it in eating qualities, and it is the sort of all others in the home garden. It is unique for marketing near home. They average about 1 1/2 lbs. each and will produce from 5,000 to 7,000 perfect melons per acre. Pkt. 5c., oz. 15c., 1/2 lb. 35c., lb. $1.00.

NEW EARLY HONEY SWEET

They grow very uniformly in shape and size, weighing about two pounds each, skin green and thickly netted. They are very thick-skinned, flesh of light green color, the inside surface, when cut open, being of a rich golden yellow color. In quality and appearance they are superior, being uniformly rich, sugary, and luscious. They are Extra Early, ripening a few days after the Muskless.

New Early Honey Sweet

Early. The vines keep green longer and produce better than any variety we have ever known. The melons, even if left on the vines a week after they are ripe and ready to pick, still retain their good quality. Pkt. 5c., oz. 15c., 1/2 lb. 35c., lb. $1.00, 5 lbs. $4.50.

Parker's Early. New. Very early, deeply ribbed, well netted. Wonderful uniformly productive. Oz. 16c., 1/2 lb. 30c., lb. $1.25, 5 lbs. $6.00.

Perfect Gem or Honey. The king of all the yellow-fleshed sorts. The handsomest, the best netted, the best shipper, the flavor the most delightful, and spiciest of all, and bounty to all who grow it for home market. Pkt. 5c., oz. 15c., 1/2 lb. 35c., lb. $1.35.

MILLER'S CREAM. Oz. 10c., 1/2 lb. 30c., lb. $1.00.

CREOLE PRIZE. Very large size; delicious quality. An excellent variety for a grower who sells direct to the consumer. Pkt. 10c., oz. 20c., 1/2 lb. 45c., lb. $1.50.

ACME or BALTIMORE. Thick green flesh, oblong, good shipper, free from blight. Oz. 10c., 1/2 lb. 35c., lb. 75c.

BURPEE'S SPIKY. Sweet, yellow flesh, oval, about 8 inches long by 6 inches in diameter. Very distinct. Pkt. 10c., oz. 14c., 1/2 lb. $1.55.

FORDHOOK

The flesh is very thick, of an attractive deep salmon color and surpassingly sweet to the very rind. The beautiful salmon flesh, while so surpassingly luscious, is not only very thick but it is extremely solid. The flesh, in addition, being very firm, is unusually firm, so that the fruits carry well to market. There are no musk melons (green-fleshed melons) that are better shippers. It is most vigorous in growth, very early and extremely prolific. The fruits are ready for market fully as early as our Honey Sweet. The vines grow vigorously and each vine sets from 3 to 6 melons immediately around the stem; frequently the fruits touch one another. The melons are remarkably even in size, weighing from 1 lb. 8 ozs. to two pounds each. They are always of the handsome form and attractive appearances displayed above.

"FORDHOOK" is so "thoroughbred" that there are practically no fruits unfit for market. Pkt. 10c., oz. 30c., 1/2 lb. 60c., lb. $2.00.

PAUL ROSE or PETOSKEY. Thick salmon-colored flesh. Oz. 10c., 1/2 lb. 35c., lb. $1.25.

IMPROVED NETTED GEM. Oz. 10c., 1/2 lb. 55c., lb. 60c.

NORFOLK BUTTON. New. Small, good quality, early. Oz. 15c., 1/2 lb. 50c., lb. $1.00.

EARLY JENNY LIND. Small, early. Oz. 10c., 1/2 lb. 30c., lb. 75c.

EMERALD GEM. Small, early, good quality. Oz. 20c., 1/2 lb. 50c., lb. $1.75.

Sutton's Scarlet Masterpiece. A red-fleshed variety of the most dainty and delicate flavor. A remarkably fine shipping variety. A favorite with southern growers.

LONG ISLAND BEAUTY. Early, good quality. A favorite in New York market. Oz. 10c., 1/2 lb. 30c., lb. $1.00.

McCleary's Large Jenny Lind. Oz. 10c., 1/2 lb. 40c., lb. $1.25.

EXTREME EARLY HACOSSACK. True, very good quality. Oz. 10c., 1/2 lb. 35c., lb. $1.25.

YELLOW-FLESHED OSAGE. Fine quality. Oz. 10c., 1/2 lb. 30c., lb. $1.00.

BANANA. Flesh, very thick, of a salmon color; in flavor remarkably Delicious. It looks almost like an overgrown banana, and, moreover, smells like one. Pkt. 15c. to 20c. A super melon, about 8 inches in diameter, and a diameter of 2 1/2 inches. This sort is not a mere curiosity, but is in such favor as to command good prices in all markets and is very desirable for family use as well. Pkt. 10c., oz. 15c., 1/2 lb. 40c., lb. $1.25.

Everyone Should Try Our

PARKER'S EXTRA EARLY (New)

Earliest of All! Yes it is the Earliest of All Musk Melons, Without Exception.

Our attention was called to this melon by a market gardener at Atlantic City, N. J., who for the past years has always had musk melons from 8 to 15 days ahead of his neighbors. These melons were a uniform size, of fine shape and appearance, beautiful orange-green flesh, extremely delicate, and sold readily in market at from $1.25 to $1.30 per basket, the profit on an acre being somewhere enormous, as all the melons were positively sold before other sorts came into the market.

This is the Earliest Musk Melon that we know of, and it will be sure to create a sensation everywhere.

It is nearly round, as may be seen by the cut, of good size, weighing about 1 1/2 pounds each. Of a dark-green color outside, well netted, while inside they are of a rich orange-green color, and we venture to say, with thicker flesh than any other extra early variety in cultivation, there being scarcely room for the seeds. As to flavor, they take the best flavor of all and are far ahead of everything else at present cultivated. It surpasses all other extra early in delicious flavor and unusual productivity of form and desirable shipping qualities. It has positively demonstrated itself as the earliest good melon in the world. We sold upwards of 5,000 packages of this earliest melon, and we know we have just that many thousand pleased, delighted, happy melon growers and we are confident that every one who has grown it has been most vigorous. All early musk melons praised it ahead of other sorts. We know that this Parker's New Early Early will please everybody growing same, whether growing one or two hills or whether growing 20 or 30 acres. We advise our customers to pinch off the runners.

If you want to make money on earliest musk melons, there is nothing in the wide world that you can plant that will give quicker returns than Parker's New Extra Early Musk Melon.

Pkg. 10c., oz. 30c., 1/2 lb. 40c., lb. $1.25.
OUR MELONS ARE GROWN EXCLUSIVELY FOR THE SEED
and every melon not true to type and shape is thrown out and destroyed. Every melon under 15 pounds in weight of the smaller varieties and 20 pounds of the larger varieties is thrown out. Not a seed is saved from the small and inferior melons. Not a melon is sold from the crop or shipped by any of our regular watermelon seed growers. Naturally it costs several times as much to grow seed this way than it does to grow the seed sold by other houses at a lower price.

We make a specialty of good, pure watermelon seed of the highest vitality which we grow on our own ground under the most favorable conditions. Next to our Tomato Seed it is our greatest specialty. Our seed is the best that can be grown, and if you want seed that will produce large, perfect, sweet and salable melons, we have it. If you want to grow watermelons fit to eat and to bring you the highest price in the market, use our specially selected and carefully grown watermelon seed.

Moore's Selected Watermelon Seed is the Best
Our customers will use over twenty thousand (20,000) pounds of our Superior Watermelon Seed for their 1910 Crops
Our watermelon seed is used by many of the largest planters in the United States, and we thank our numerous Southern customers for their very liberal patronage.

Alabama Sweet. One of the finest long shipping melons. Very popular among Southern melon growers of all the long shipping varieties, a delight to the eye. In general appearance it looks very much like the Kleckley Sweet—looks that make it sell on sight at the highest price. It is extra early, coming in almost at the same time with Seminole, and is one of the earliest medium to large size melons we have ever seen. It is of long shape with an intense dark green color, and a splendid shipper. Flesh is very fine grained, solid but free from stringiness. Pkt. 5c, oz. 10c, $1 lb. 25c, $1 lb. 50c, 5 lbs. $4.00.

Kleckley Sweet. An immensely popular melon of superb quality. Very desirable for home, table, and market use and nearby markets. Flesh bright scarlet with broad solid heart, crisp and sugary. Seed saved from selected specimens only. Pkt. 5c, oz. 10c, 2 oz. 15c, 5 lb. 25c, 1 lb. 50c, 5 lbs. $3.75.

Kolb's Gem. A large oblong melon, with dark green skin, faintly striped with light deeper shade; deep red flesh of excellent flavor. Pkt. 5c, oz. 10c, 3/4 lb. 25c, 1 lb. 50c, 5 lbs. $2.75.

Florida Favorite. A large oblong melon, with deep green skin, faintly striped with light deeper shade; deep red flesh of excellent flavor. Pkt. 5c, oz. 10c, 3/4 lb. 25c, 1 lb. 50c, 5 lbs. $2.75.

DEKE JONES. Heavy cropper; excellent shipper; flesh red and of good quality. Oz. 10c, 1/2 lb. 25c, 1 lb. 50c, 5 lbs. $2.50.

Arizona Wonderful Sugar. The melon is long, of good quality, large size; flesh of a bright red, and of a luscious sweetness not found in any other. The rind is usually thin and tough. It will be found a money maker by all our market garden friends. 10,000 seeds were produced on one acre. Pkt. 5c, oz. 10c, 1/2 lb. 25c, 1 lb. 75c, 5 lbs. $3.50.

Louisiana Melting Sugar. A large, heavy melon. Interior always solid, the edible portion extending to within half an inch of the skin; flesh brilliant red, sweet, tender, very fine and altogether quite superior. A very hard rind, and therefore a good shipper. Oz. 10c, 1/2 lb. 25c, 1 lb. 75c, 5 lbs. $3.00.

EARLY MARKET KING
Superior for Long Distance Shipping
THE EarLIEST LARGE MELON EVER GROWN.
MATURES 65 DAYS FROM PLANTING.
Notwithstanding the large size of this melon they will readily withstand packing seven layers deep, without injury, in a car; whereas the Kolb Gem or any other variety cannot be packed more than five layers deep for long distance shipping, thus fully proving it to be superior to all others as a shipper. Fruit large and heavy (thirty to fifty pounds). A melon large growers need not hesitate to plant largely. This is not only an early watermelon of fine quality, but it is also of large size. From seed planted on the fourth day of May, large, ripe melons were picked July 20th. Its eating qualities superior to all other early sorts, and always commands the highest market price. Pkt. 5c, oz. 10c, 1/2 lb. 25c, 1 lb. 75c, 5 lbs. $5.00, 10 lbs. $6.00. 25, 50 and 100-lb. lots will be quoted upon application.
We Produce Water Melon Seed for Every Market, for Every Soil, for Every Locality, for Every Taste, for Every Purpose and for the Most Careful and Critical Grower

THE NEW WATSON

It certainly gives us great pleasure to introduce this remarkably fine New Water Melon to our many thousand customers. It required many years of the most careful hybridizing and selection on the part of Mr. C. O. Watson to produce this, what he terms "The King of All" Water Melons, and to use his own language he "challenges the world to produce a better melon of its type, a better melon for growing, shipping or eating. This remarkable melon ripens in from 55 to 60 days and under good cultivation will weigh about 60 lbs.

It is best forevermore, the best and sweetest flavored melon in the world—indeed of all varieties. We have given it careful trials amid many large melon growers for several seasons past in the largest melon growing sections of the world, and they are all highly enthusiastic in its praise. We have never yet found a grower or consumer who was not delighted with it, and we feel you will join the same ranks if you give it a trial in your garden.

The skin is of a rich deep green, the flesh a beautiful deep red, crisp, juicy and melting and free from stringiness. It is very heavy, early, large, handsome, a strong vigorous grower, a good shipper and

long keeper. One grower planted 1,200 acres of this melon last year. All seed saved from specimen melons only. Pkt. $1.55, 3 lb. $3.50, 10 lb. $12.50, postpaid.

"THE NEW WATSON gave me and my customers great satisfaction. I took first premium at our fair on eating quality. It is the best flavored and crispest fleshed ever grown in this locality. The entire appearance is particularly pleasing and it has already become very popular."

-S. J. MAXWELL, MR. BANK, N. J.

GEORGIA BIG HEART

The New Shipping Melon. This is comparatively a new melon from one of the largest water melon growing districts in Georgia; it is admitted by all who have seen or handled it to be the coming melon for profitable long distance shipping, as well as for home market where large round melons are in demand. It is a large handsome melon, slightly oblong as our illustration shows. It will average from 20 to 25 inches in length and 12 to 15 inches in diameter. It is equally as good a shipper as the famous Kolb Gem. It commands a much higher price than Kolb Gem, Blue Gem, Triumph, Ironclad or Kleeckley Sucrets. The rind is a beautiful dark green, occasioned by the showing stripes and bands of a lighter green, changing to darker green when ripe. It is particularly distinguished by its solid "Big Heart" of delicious, bright red color and delicious quality, and entirely free from hard core. The centre or rind is solid from rind to rind and hollows or cavities are entirely absent. In our opinion it is a most desirable variety for shipping or hotel trade.

Early Big Heart is a good variety to plant anywhere, and for any market it will make big money for any careful grower, where water melons can be grown. Specimens weighing from 60 to 80 pounds are not uncommon. It is particularly well adapted for shipping in car lots. No matter whether you grow one acre or a thousand acres it will give you perfect satisfaction. The vine is a remarkably vigorous grower and blight was never known to attack it. All seed saved from specimen melons only. Pkt. $1.25, oz. 15c., lb. $3.50.

A GRAND NEW WATER MELON—FLORIDA GEM

This prince of water melons is the result of a cross between the Florida Mammoth and the Louisiana Mammoth Melon Sugar by one of Florida's largest and most successful melon growers, and who cleared over $7,000 in 2 years, growing and shipping these delicious melons north. Our seed stock was purchased from him, and we take pride in offering it to our many thousand customers throughout the world. Knowing it will be the means of their making many honest dollars by growing it for market. This fine new melon will average about forty pounds in weight and is of the highest table quality. It is remarkably productive and has received testimonials of those who have grown it. While it is of southern origin, it is equally well adapted for the north and will grow anywhere where water melons can be grown. The color of the outside is rather light with distinct dark markings. The flesh is of a pleasant brilliant red and decidedly solid, and will be found to be firm and very close to the core. The flavor is peculiarly delicious. While the rind is thin it is remarkably solid, and it is not difficult for the largest melon ever grown, and the vines will remain green longer than any other variety known to us and will also sell for higher prices in all markets than any other sort. We predict for it a wonderful future and earnestly recommend all melon growers to plant it. It is not subject to blight to the extent that other melons are, and will yield big crops on land where other sorts fail to produce satisfactorily. Pkt. 5c., oz. 10c., lb. 25c., 10 lb. $3.50, postpaid. Buyers of 25, 50, and 100 lb. lots of any kind of melon seed will be quoted special prices by letter.
Moore's New Majestic. The most valuable new watermelon of the day. It has come to stay, with all shippers. Large growers need not hesitate to plant it largely. True stock. Seed grown by the originator. The rind is dark green, lightly striped, flesh scarlet, very firm, solid, and of fusiform quality, and frequently attains a weight of eighty pounds. For the past three years this has proved to be the most profitable watermelon sent to the Northern markets. An acre of Majestics will net 100 per cent more money than an acre of Striped Dixies, Telgars, Sweet Hearts, etc. Last year we supplied seed for over 20,000 melons in South Carolina and for over 2,000 car loads in middle Southern Georgia. We mention this merely to show its popularity in large melon-growing centres. As a shipping melon it is in every way superior to the Blue Gem, of Alabama origin; also the old Kolb Gem. It’s beautiful appearance and good quality always inspires the highest market price. Every melon grower should plant it. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 75c., 5 lbs. $3.35. Buyers of 25, 50 and 100-lb. lots quoted upon application.

Arkansas Traveler. A large, long, weighty melon. Rind dark green, with waving stripes of black. Interior always solid, the edible portion extending within half an inch of the skin. Flesh brilliantly red, sweet, tender, crystalline, very juicy and altogether quite superior. Seed variable in color and small, ripening as an intermediate. A very hard rind, and therefore a good shipper. In color of flesh it is deepest red, in texture crystalline, in flavor sugary. The flesh is solid throughout, without any sign of either core or cavity, and the edible portion extends to within half an inch of the skin. Fine for late plantings to mature in August and September.

Harris' Earliest. In form this melon is oval to oblong. It is beautifully striped with dark green and gray stripes. It has bright red flesh, which is tender, sweet and delicious beyond description. It is very productive. It is the melon for everybody to grow who wants to be first. It bears shipping very well, and on account of its extreme earliness, handsome appearance and fine table qualities, it always finds a ready market at fancy prices. Our stock direct from Mr. Harris.

Miner's Black Pearl. The flesh is brilliant red, very solid, very sweet and delicious. Skin is a beautiful dark green; the rind is very thin, but exceedingly hard, which renders it valuable shipping sort. We supply seed to all our customers who wish a very dark-skinned melon.

New White Dixie. It possesses all the good qualities of the old Dixie, and is of much better quality. It is pronounced the finest of all watermelons for home use and nearby markets. The color of the seed is grayish brown, the flesh a clear brilliant red, very crisp, sugary, melting and devoid of all stringiness, the rind hard and thin. Another valuable feature is it will remain in good eating condition longer than any sort we know of. It will hold its own in the watermelon patch for years to come, and will always command fancy prices.
Moore Seed Co.'s Onion Seed is Unequaled in Quality

Moore’s Philadelphia-Grown Onion Seed is acknowledged by all who have ever grown it to be superior to that obtained from any other source in both strong vitality and purity. No one can appreciate the value of reliable seeds better than those who have been once disappointed, and too much care cannot be exercised in selecting your supply. There is no vegetable where the quality of the seeds exerts a greater influence upon the crops than onions. Our stock is all grown from choice bulbs, selected carefully by hand, and is unequaled in this country.

IF YOU ARE A GARDENER, MARKET GARDENER OR FARMER, YOU CAN MAKE MONEY AND LOTS OF IT IN GROWING OUR

AMERICAN-GROWN MAMMOTH (LONG KEEPING) YELLOW PRIZETAKER ONION

Our American-Grown Prizetaker seed we offer produces large, well-ripened bulbs the first season from seed. Flesh white, crisp and mild in flavor. The skin is thin, of a bright straw yellow. Form nearly a perfect globe, as shown in our illustration. Under ordinary cultivation this variety will yield bulbs nearly three times as large as the Globe Danvers, while under special cultivation we have raised specimen bulbs to weigh from four to five and a half pounds each. These are the large mild onions which are sold in small crates in early fall and are esteemed for their large size, handsome appearance, mild and delicate flavor. With ordinary culture the crop of Prizetaker Onions is not infrequently 1,200 to 1,500 bushels per acre, and often runs up to 1,800 bushels. Our Strain Prizetaker is by far the handsomest, most productive, most popular and best of all Yellow Globe Onions. It has a very small neck and ripens up without stiffness of the neck. In market it never fails to attract attention on account of its beauty, and is sure to bring a far better price than any other onion. It is a remarkably good keeper and can be profitably cultivated for shipping or home market in every state in the Union. Pkt. 10c., oz. 20c., ½ lb. 50c., lb. $1.40, postpaid. By express, $1.75 per lb.; 5 lbs. and over, $1.25 per lb.

New Zittau Extra Early White. The earliest large onion on earth. This is the biggest early onion money-maker ever offered by any seed man. You grow it direct from the seed and you will have bigger and better onions than any you may grow from sets and at one-third the cost of sets and one-half less labor. Big statements these, but every word the truth. 1,000 bushels per acre can easily be grown from seed of this variety, and in this latitude they can be had on the market by June 15th, when prices range from $1.00 to $2.00 per bushel for new onions. It is unquestionably the largest, handsomest, finest flavored, best shaped, finest keeping, most superior early onion ever introduced, and is an onion that will sell on its merits in any market. Pkt. 10c., oz. 25c., ½ lb. 75c., lb. $2.25.

White Barletta. Excellent pickling variety; very early, small, pure white and mild flavor. Very profitable for the local market gardener. Pkt. 10c., oz. 15c., ½ lb. 40c., lb. $1.40.

White Silver Skin. (Philadelphia Grown.) It is from this variety that the famous white sets are grown. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $3.00.

AUSTRALIAN BROWN. Very solid and of good quality. Oz. 20c., ½ lb. 35c., lb. $1.00. Large buyers will be quoted special prices upon stating quantity wanted.
GOOD ONION SEED is of the utmost importance. Fully realizing this, we make a Speciality of the BEST Onion Seed.

A dollar saved on the purchase of the seed is likely to be lost many times over when the bulbs are harvested. The first cost of the seed is a small item compared with the expense involved in the proper preparation, fertilizing, and cultivation of the soil. It costs as much to raise a crop of inferior bulbs from poor seed as to produce a crop of fine evenly ripened bulbs from a selected strain of seed. Our Onion Seed is absolutely unsurpassed.

SPECIAL PRICES. On Onion Seed in an quantity over what is quoted here will be promptly given upon application. On Seed has been a leading speciality with us for years. Write us. It may pay you big. We supply large quantities of seed to many of the largest growers in the United States.

MOORE'S GIANT SILVER KING ONION—Universally Popular

A LEADING VARIETY in ALL SECTIONS. PRODUCES ENORMOUS CROPS of ENORMOUS ONIONS, ALL CLEAN, SOLID, HEAVY AND PERFECT. NO "THICK NECKS." SURE CROP. LONG KEEPER, UNEQUALED SHIPPER. (New Early.) This is an entirely new type of Silver King from that introduced several years ago in that it is much earlier, which gives a decided advantage, especially for the market gardener. Large white onions can now be had for only two weeks earlier than on the old variety. It produces a superb, beautiful siliate white, with flesh of a particularly mild and pleasant flavor and so sweet that it can be eaten like an apple. No other white onion attains such a mammoth size nor uniformity so large. It is adapted to a wide range of climate. The popularity of this onion increases rapidly from year to year with onion growers everywhere. All who grow it unanimously say it deserves every word of praise that is bestowed upon it by its enthusiastic admirers among farmers, truckers and very especially those who eat it. As to the wonderful size, early maturity and fine eating qualities of this famous onion we cannot speak too highly. Every one desires of having the largest, handsomest and most profitable onions of the finest flavor will be more than satisfied with our Early Giant Silver King.

CHOICE PHILADELPHIA-GROWN ONION SETS. Philadelphia has long been famed, the country over, for growing the best onion sets, and we are prepared to furnish the choicest stock. Indeed, we include onion sets among our leading specialities, and spare no pains to produce them from thoroughbred seed and to keep them true to name. The peck and bushel prices on onion sets are subject to market changes. We always give low prices for good stock. Large buyers will please write for prices, stating quantity wanted.

YELLOW STRASBURG. Qt. 15c., pk. $1.00, bu. $3.00.

JAMES' LONG-KEEPING YELLOW. Qt. 20c., pk. $1.25, bu. $4.00.

WHITE OR SILVER SKIN. Qt. 20c., pk. $1.35, bu. $4.60.

ITALIAN ONION. Qt. 25c., pk. $1.50, bu. $4.60.

SEEDS AND SKIN. S1.50, bu. $3.75.

GARLIC. Qt. 30c., by mail 40c.
GOOD ONION SEED is of the utmost importance.

Fully realizing this, we make a specialty of the Best Onion Seed. A dollar saved on the purchase of the seed is likely to be lost many times over when the bulbs are harvested. The first cost of the seed is a small item compared with the expense involved in the proper preparation, fertilizing, and cultivation of the soil. It costs as much to raise a crop of inferior bulbs from poor seed as to produce a crop of fine evenly ripened bulbs from a selected strain of seed.

SOUTHPORT GLOBE VARIETIES

CONNECTICUT GROWN SEED. All superior stock. Good keeping qualities. Perfect shape. Large, heavy, solid and of uniform size.

SOUTHPOR WHITE GLOBE. Pkt. 10c, oz. 30c, ½ lb. 75c, lb. $2.75. 10 lbs. $25.00.

SOUTHPORT RED GLOBE. Pkt. 10c, oz. 30c, ½ lb. 40c, lb. $1.25. 10 lbs. $11.00.

SOUTHPOR YELLOW GLOBE. Pkt. 10c, oz. 30c, ½ lb. 40c, lb. $1.25. 10 lbs. $11.00.

JAMES' LONG-KEEPING YELLOW. A thick, flat onion, best of keepers, makes beautiful shaped sets. Pkt. 10c, oz. 30c, ½ lb. 60c, lb. $2.00. 10 lbs. $19.00.

MOORE & SIMON'S PHILADELPHIA GROWN YELLOW GLOBE DANERS ONIONS—FOR SETS. Very carefully grown and selected for producing sets of the proper shape, size and color and producing onions of equally fine quality. The sets grown this strain of seed will keep in good condition during the winter and spring longer than those from seeds grown in any other locality. Pkt. 10c, oz. 30c, ½ lb. 50c, lb. $1.75.

LARGE RED WETERSFIELD. There is no better strain of this important variety in cultivation than ours. Pkt. 10c, oz. 30c, ½ lb. 40c, lb. $1.25. 10 lbs. $11.00.

PHILADELPHIA EARY WHITE BUNCH ONION. The bulbs are of attractive form, flattened but thick through and of a beautiful silvery white; the flesh is savory white and so sweet and tender that they can be eaten raw like an apple. For bunching in the green state they cannot be surpassed. Very productive. Pkt. 10c, oz. 30c, ½ lb. 50c, lb. $1.75.

EXTRA SELECTED OHIO YELLOW GLOBE. Our own Ohio grown seed. Pkt. 10c, oz. 30c, ½ lb. 45c, lb. $1.25.

PHILADELPHIA YELLOW GLOBE DANERS. Selected stock, very productive. Pkt. 10c, oz. 30c, ½ lb. 60c, lb. $1.50.

ROUND YELLOW DANERS. A leading market variety. Pkt. 10c, oz. 30c, ½ lb. 35c, lb. $1.00.

PHILADELPHIA YELLOW STRASBURG, OR DUTCH. Bulbs quite flat, of a good size; skin rich yellow, turning to brown when exposed. Ripe very early, flesh white, and of white mild flavor; keeps well. It is one of the very best to grow for sets. Pkt. 5c, oz. 20c, ½ lb. 40c, lb. $1.25, 50 and 100 lb. lots will be quoted upon application.

BERMUDA ONION SEED

White Bermuda Onion. This is the standard variety for market crops for shipping. It is known as "White Bermuda." It is really a light straw color or pale yellow. Large pkt. 10c, ½ oz. 15c, oz. 25c, ½ lb. 75c, lb. $2.00.

Crystal Wax Bermuda. It is its color that sets it above all the other varieties. Its mild flavor makes it in favor with florists where that is important. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.00, 5 lbs. $9.50.

Red Bermuda Onion. It is identical in size, shape and mildness with our White Bermuda. The color is a pale, waxy red. Pkt. 10c, oz. 20c, ½ lb. 60c, lb. $1.75.

Louisiana Creole. It is of good size and of mild flavor. Color red. It is by far the best shipping onion grown in the Southern States. The yield is enormous. Pkt. 10c, oz. 30c, ½ lb. 75c, lb. $1.50, lb. $2.50.

Welsh or Winter. Sow in September or October. Will make beautiful large yellow, globe-shaped onions early the following spring. Oz. 20c, ½ lb. 60c, lb. $1.00.
MUSHROOM SPAWN

ENGLISH MILLTRACK. Per brick 15c. (by mail 25c.), doz. $1.40, 25 lbs. $1.75, 100 lbs. $6.50, 1,000 lbs. $60.00, 250 lbs. at 1,000 lbs. rate.

AMERICAN FIRE CULTURE SPAWN. Per brick 20c. (by mail 35c.), 5 bricks 90c., 10 bricks $1.50, 25 bricks $3.50, 50 bricks $6.50.

Mushroom Circular Free on application.

PARIS MARKET PARSLEY

Paris Market or Giant Curled Parsley. Our Paris Market Parsley is much superior to all other curled varieties. In color it is a beautiful brilliant green, leaf frowns large, delicately cut and handsome curled. The plant is half dwarf, hardy, a heavy yielder, being greatly improved by frequent cutting. It is by far the most profitable for market and is adapted to all soils, and best for long distance shipping. Best for forcing under glass and growing in cold frames. Every parsley grower should plant it. It sells for fancy prices. Pkt. 5c., oz. 10c., $5.00, 1 lb. $1.00.

Champion Dutch Erfurt. Extra curled, dark green and free grower, which we highly recommend for a summer crop, owing to the fact that it will not turn yellow. This is the only true "hot weather or summer green." Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. $1.00.

HAMBURG. Rooted. Long smooth roots, leaves plain. Oz. 10c., 1/2 lb. 25c., 1 lb. 60c.

EMERALD, or DWARF EXTRA CURLED. Double, very fine stock. Oz. 10c., 1/2 lb. 25c., 1 lb. 45c.

EXTRA DOUBLE CURLED. Dark green well curled leaves. Oz. 10c., 1/2 lb. 25c., 1 lb. 50c., $3.50 and over 45c. lb.

MUSTARD

MONGOLIAN CUT LEAVED. The most decorative, productive and best flavored of all. Neither sort half so good. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. $1.00.

SOUTHERN GIANT CURLED. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 45c.

CHINESE (True). Oz. 10c., 1/2 lb. 30c., lb. 60c.

PARSLEY

New White Maltese. This strain is the result of years of careful selection by a noted parsley specialist. It embodies all the points of excellence desirable to a market gardener in smoothness, earliness, shape, true hollow crown, extra sweet rich flavor, beautiful white-color, and a not too long nor too short. It does not crack open and is entirely free from all or any traces so common in other varieties and will usually bring from 50 to 100 per cent, higher prices. If you grow parsley be sure to get this seed from us. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c., 5 lbs. or more 75c. lb.

Ideal Hollow Crown. Medium length, smooth, hollow crown, fine grained, sweet and pretty appearance. Oz. 10c., 1/2 lb. 20c., lb. 50c., 5 lbs. and over 45c. per lb.

SUTTON’S STUDENT, or LONG SMOOTH. Heavy yielder. Oz. 10c., 1/2 lb. 30c., lb. 50c.

OKRA

Holt’s Prolific Dwarf. This is undoubtedly the best and most profitable variety for the market gardener or shipper to grow. Pods are well shaped, of proper size and entirely stringless. It is the earliest and most prolific of all. The best for light land. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 80c., 6 lbs. $2.50.

PERKINS’ LONG PODDED. Good quality. Oz. 10c., 1/2 lb. 35c., lb. 30c.

DWARF PROLIFIC. 1/2 lb. 35c., lb. 50c.

KLECKLEY’S WHITE LADY PINGER. Much superior to the old White Velvet. Very tender white pods. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 50c.

“Your Tomato seeds are the best in the world.”—O. H. KING, HAZELCOURT, MISS.

NEW PEPPERS

Myers’ New Early Ruby King

This is a big and valuable improvement on the type of Ruby King. From plants set out May 1st, the first large peppers for market were picked for market June 23d. Plant a vigorous grower and are completely laden with large handsome fruits five inches long, which are of a brilliant red color, very meaty, sweet and mild. They carry well and keep in prime condition a long time, and bear abundantly until killed by frost. It fills a long felt want for the commercial grower. Pkt. 10c., oz. 30c., 1/2 lb. 85c., lb. $2.00.

HOT SICILIAN

Texas Shipper. (New.) A remarkably thick-skinned variety, also a remarkably good bearer. It is not uncommon for a plant to carry from 90 to 40 marketable fruits at one time. Fruits measure about 6 inches long by 21/2 inches across the shoulder, and taper nicely to a blunt point. The flesh is twice as thick as Moore’s Prize-taker, and much firmer. The very thick flesh and peculiar shape makes it the best long distance shipper ever introduced. It will keep in prime condition twice as long as any other. Pkt. 10c., 3 oz. 50c., 1/2 lb. $1.00.

Hot Siciilan. (New.) Our illustration is only one-half the actual size of the fruit, which is borne in wonderful profusion and very hot in both the green and ripe state. There is a great demand for this type of pepper on every market, and we most earnestly hope every one of our market garden friends will give it a trial. Pkt. 10c., oz. 50c., 1/2 lb. $1.25.

New Tomato Pepper. There is a great demand for this variety in all large cities, such as Philadelphia, New York, Boston, etc. An enormous yielder, of mild and delicate flavor. Be sure to plant it if you raise peppers for profit. Pkt. 10c., oz. 50c., 1/2 lb. $1.00, lb. $3.00.

MYERS’ NEW EARLY RUBY KING

THE MOORE SEED CO., PHILA., WHOLESALE CATALOGUE FOR MARKET GARDENERS AND FLORISTS 39
BEST PEPPERS FOR MARKET

A GRAND PEPPER

Moore’s Mammoth Prizetaker

Moore’s in Southern Pride

Pedrick’s New Early Prolific

Italian Early Red

New Cardinal Potherb

READ For many years we have made a close study of Pepper growing for market with a view of producing the best varieties for the purpose, and our customers will find the varieties we illustrate herewith embrace all that will be found desirable and profitable.

PER in Cultivation. Like our Moore’s Mammoth Prizetaker Pepper introduced by us in 1881, it has come to stay. It is earlier than the Chinese Giant or Ruby King or Neapolitan, and notwithstanding its earliness it will continue to yield fine large peppers, which are longer and narrower than Ruby King, up until frost. Mr. Pedrick had one plant that yielded 227 full-sized fruits during the season. The fruits should be removed from the plants as fast as fully grown. The size and yield will thus be fully maintained throughout the season. The flesh is slightly pungent, and a glossy, brilliant red when ripe, and being first in market secures the highest price. Pkt. 10c., 3 for 32c., oz. 35c., ½ lb. $1.00, lb. $3.50.

Moore’s Southern Shipper. This is a highly valuable New Pepper, carefully bred and selected to meet the requirements of growers who ship their peppers in crates or small packages. The shape and size, which is approximately shown in our illustration, enable it to be packed to show up to better advantage in six and eight basket carriers than any other variety hitherto produced. It has become a great favorite with commission houses, dealers and consumers. Owing to these conditions it finds a more ready sale, and at higher prices than either the Ruby King, Neapolitan, Sweet Bull Nose or Chinese Giant. It stands pre-eminent as a shipping sort and is also desirable for home market. It is a money-maker for the grower, and we highly recommend it to all who grow peppers for profit. Since plants carry from 40 to 50 marketable fruits at one time. They are mild, carry well and keep in prime condition a very long time. It develops quickly, is a long continuous yielder and of great value to the market grower. Pkt. 10c., 3 for 32c., oz. 30c., ½ lb. $1.25, lb. $4.50.

Italian Early Red. This valuable new variety is the earliest type of Bull Nose in cultivation. It is valuable alike for the amateur and market gardener. In size it is about the same as the old Sweet Bell or Bull Nose. It is wonderfully productive. The plant is a perfect mass of peppers which are a beautiful glossy red. It is a highly profitable sort for the market gardener either for the home market or shipping, and either for the northern or southern shipper. The peppers are in great demand at very high prices wherever known. Flesh is extremely mild and sweet as an apple and continues to bear freely up to frost. While young the fruits are of a beautiful emerald green and carry long distances perfectly. It is the pepper for you to plant if you wish to make money. Pkt. 10c., 3 pks. 25c., oz. 30c., ½ lb. 85c., lb. $3.00.

RUBY KING. (Moore’s Selected.) Beautiful red pods, 6 to 8 inches long, averaging 3 inches in diameter. Flesh sweet and mild. Pkt. 5c., oz. 20c., ½ lb. 60c., lb. $2.00.

CHINESE GIANT. Producing monstrous fruits from 12 to 16 inches in circumference. Flesh thick, tender, mild, sweet and of a brilliant glossy scarlet. Pkt. 10c., ½ oz. 25c., ¼ oz. 45c., ½ lb. $1.50, lb. $4.50.

NEapolitan Early. Oz. 30c., ½ lb. 85c., lb. $3.00.

New Cardinal Potherb. This is just the best sort for bunching with potherbs; color a rich, glossy cardinal red. Strong and pungent. It is the most productive pepper we ever saw. Pkt. 10c., ½ oz. 20c., oz. 35c., ½ lb. $1.00.

BIRD’S EYE. Miniature hot peppers. Pkt. 10c., oz. 30c.

GOLDEN QUEEN or DAWN. Pkt. 5c., oz. 25c., ¼ lb. 75c., lb. $2.50.

RED CLUSTER. Pkt. 10c., oz. 25c., ¼ lb. 75c., lb. $2.50.

SWEET BELL or HULL-NOSE. Pkt. 5c., oz. 25c., ¼ lb. 75c., lb. $2.25.
Moore's Famous Market Peas

You should not omit to plant freely of this fine sort...

McLEAN'S FIRST OF ALL. This delicious variety originated in England and is the earliest Pea ever produced. It is strictly speaking, an extra early sort, and will mature ahead of the Gradus, Thomas Laxton, Morning Star, Lightning Extra Early, Royal Early or Scott's Excelor. It is wonderfully productive: a single plant has been known to produce 380 large-size pods. It requires no brush supports in the field, and will produce better on light land than any other early sort. The pods are large and well-filled with large, beautiful dark green peas of delicious quality. It is remarkably hardy and should be the first to be planted, and you will have the first peas in market and get the biggest price. Our crop this year being large we can offer the seed to our customers at a very low price. It is remarkably uniform and quite free from spots of any kind. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. 95c., pk. $1.85, bu. $6.75.

MOORE'S LIGHTNING EXTRA EARLY. The earliest and most productive of all extra early white seeded peas. Are planted annually by over 40,000 market gardeners throughout the United States. They will be found of equal value for late summer or autumn sowing, or where a pea crop is required to come off in the shortest possible time. The entire crop can be gathered in one picking. This valuable sort is so hardy that it can be planted shortly after the frost is out of the ground. Under favorable conditions peas can be picked twenty-nine days from sowing the seed. The yield of these peas is simply wonderful. Pkt. 10c., qt. 35c., ½ pk. $1.15, pk. $2.00, bu. $7.50.

THOS. LAXTON. Thos. Laxton is even sweeter and finer in flavor, while the large peas are of a deeper green they present a more attractive appearance on the table. The crop ripens only three to four days after Gradus. Pkt. 10c., qt. 45c., 4 qts. $1.00, pk. $3.00, bu. $11.00.

McLEAN'S ADVANCE. Second early; vines of strong growth, productive of long broad pods, well filled with green wrinkled peas. Qt. 30c., 4 qts. $1.10, pk. $2.00, bu. $7.50.

NEW PEA—PRIZETAKER. A fine new English sort, having invariably taken all the prizes for quality and productiveness, wherever exhibited; hence its name, "Prizetaker." Plant ½ foot high, of a branching habit and vigorous growth; pods long, round and well filled with large peas of very sweet and luscious quality; pods are produced in pairs, usually from sixty to eighty fine pods to a plant. Can be planted fully as early as our May Queen. Matures in about forty days. Its immense productiveness and fine quality makes it an excellent sort for the family garden and market gardener. This grand new pea is almost a continuous yielder, three full crops are always yielded by it; plants frequently yield 30 pods, and we have no hesitation in pronouncing it the most prolific and finest quality pea ever introduced among second early varieties. Once planted, always planted. Pkt. 10c., pt. 20c., qt. 30c., pk. $1.75, bu. $6.50.

EXTRA EARLY GRADUS, also called "Prosperity" Pea. Our strain will be found much superior to that usually sold by other seedsmen. Matures pods only a few days later than the small-podded round-seeded extra early; grows about three feet high. It produces uniformly large pods, measuring from four to four and a half inches in length, nearly round, and well filled with very large, handsome peas of the finest flavor. Much superior to the Thos. Laxton in quality. The peas remain tender and sweet for some time after they are large enough to use. Pkt. 10c., qt. 45c., 4 qts. $1.60, pk. $3.00, bu. $11.00.

ALASKA. Early and prolific. Qt. 30c., pk. $1.75, bu. $6.00.

LONG ISLAND MAMMOTH. Pkt. 20c., qt. 30c., 4 qts. $1.00, pk. $1.85, bu. $7.00.

READ WHAT THEY SAY:

BEING BUYING 20 YEARS..."I have been buying my early peas from you for the past 20 years and never missed having the earliest and best paying crop of peas in the county. I can also say the same of your tomatoes, nothing to equal them."—DAVID MYERS, DOLPHIN, N. J.

GETS BETTER PRICES..."I have tried about every pea to be had, but I always get better prices for your choice sorts than the common ones I get at my country store. I find it pays well to buy your choice varieties."—SOLOMON LOY, MARKET GARDENER, ENGLISH CREEK, N. J.

FINEST IN EXISTENCE..."Your new dwarf pea, May Queen, is certainly the finest pea in existence. I do not believe there is another pea that can compare with it for earliness, size and flavor. I made the first picking on May 19th, and on June 21st I picked the first mess, and they were the sweetest, tenderest and most delicious peas that we ever tasted. They are all and more than you claim for them."—LEWIS L. WILEY, PHILADELPHIA, PA.

"McLean's First of All Pea was the earliest of all extra peas with me last year. I planted 5 varieties and it was 4 days ahead of them all. I realized $250.00 from 2 acres."—FRANK SMITH, PENSACOLA, N. J.

"Your Fillbasket Pea is the finest we ever planted. We have planted it on heavy soil without manure and on light soil with manure. Growth always 3 to 4 feet high with 24 to 28 pods to a vine, averaging 8 to 12 peas as big as hazel nuts to a pod—quality grand. They attract great attention from all who saw them and they averaged me 50 cents more per hanner than Telephone or Thomas Laxton."—G. C. STOCKHAM, ELENA, N. J.

IS WORTH $25.00 PER POUND..."Your Carter's Golden Rattles are worth $5.00 per pound to anyone who knows catalogues. They always sell for good prices and give my customers good satisfaction. They never get hard or woody; always tender, sweet and juicy."—LEVY KRAUSER, BUTLER, PA.

JUST COINED MONEY..."Every grower here uses your Tomato seed, they are far ahead of any ever used here. Your Moore's King of the Early and Royal Early Peas. Just coined us money last year."—ADAM G. BUTLER, HUMBOLDT, TENN.
MOORE’S HOME GARDEN PEA. If you want a long podded, extremely early, wrinkled dwarf pea of the finest quality and productive habits, this is the pea for you. It is extremely productive, filling large bushels in 30 days. It literally fills itself with large pods, ripening very evenly and being of excellent flavor. It is very early, testing in 46 days. 1000 bushels—now, that's a great many, but our market gardeners and private planters require more than that of Moore's New Home Garden Pea Seed every year. They say there is no other pea just like it, hence its great demand. It’s early, too, and of delicious quality. The distinct merits of this pea over any other variety are its extreme earliness, combined with its abundant production of fine peas of delicious flavor. Its strong points are its delicious richness of flavor, its extreme earliness, its dwarf habit, needing no staking, and its large-sized pod. One of its distinctive features is its unusually regular habit of growth. It is of uniform height, so smooth and level in its growth that a row resembles a well-kept hedge. It is also a magnificent variety for market gardeners to grow; as the pods are large, it fills up a bushel quickly and brings a very fine price in the market.

M. & S. May, Queen.

MOORE’S ROYAL EARLY.

This popular new large-podded early pea of finest quality matures pods only two or three days later than the small-podded extra earlies; will produce 100 per cent. larger crop, much better in flavor, and will be a pleasing revelation to all who plant it. It is the result of much careful, expert work, of selection and reselection. Grows about thirty inches high. It produces uniformly large pods, measuring from four to four and a half inches in length, nearly round, and well filled with very large, handsome, beautiful green peas of fine flavor. The peas remain tender and sweet for some time after they are large enough to use. The illustration herewith was engraved from a photograph, being exactly natural size. It is wonderfully prolific. No pea grower for home garden or market should be without it. It is a money maker for all who plant it for first early, second early, or fall crop.

MOORE’S NEW PEA, MAY QUEEN

It is the most delicious dwarf English pea in the world for the cottage garden and unsurpassed as a fine market sort. This grand new English dwarf wrinkled pea is one of the very best peas we have ever grown. It is extremely early, growing 17 inches, and literally fills itself with large pods, all ripening evenly and of excellent flavor. It is very early—earlier than the American Wonder—testing in forty-six days. When once tried, no other dwarf sort will be grown. No words of praise are too extravagant for this wonderful dwarf pea novelty. It is grand beyond description, of delicious flavor and heavy cropping. Its strong points are its delicious richness of flavor and dwarf habits. It is very hardy and flourishes everywhere. It is also a profitable variety for market gardeners, as the pods are large; it fills up a bushel quickly, and brings the highest prices everywhere. Pkt. 10c., qt. 25c., qts. 75c., 4 qts. $1.40, pk. $7.75, bu. $10.00.

Mammoth Melting Sugar

The vines grow four to five feet in height. Very productive of enormous pods, which average five to six inches in length and one and a half inches broad. Perfectly dry, and boiled like string beans and served with butter sauce, they have a luscious flavor. Pkt. 10c., qt. 25c., qts. 45c.

HAD GREAT SUCCESS.—"I always had great success with your peas. I planted thirty bushels of your peas last year in five separate varieties and realized handsomely from my investment."—HERBERT P. CLARK, Pea Grower, N. J.
We grow the Largest Assortment of DELICIOUS PEAS of any Seedsmen in America. You will get the World's Best if you buy from us.

This is a grand new acquisition among second early peas. It gives us great pleasure to introduce this new English Pea to our many customers. The illustration herewith shows the marvelous productiveness of this wonderful new variety. The vines are of strong growth, three feet high, and are of a remarkably branching habit. It is a continuous or everlasting yielding; in this respect it closely resembles our famous Petreaker. The magnificent large green pods often contain as many as twelve peas, which are of the most delicious quality and possessing a delicate aroma, so highly appreciated by all epicures and admirers of this, the "Queen of Vegetables." Our Bountiful Pea is far superior to any of its class, and is destined to occupy the front rank with all who want excellence in flavor, the very essence of tenderness and maximum of yield. Pkt. 10c., qt. 30c., pk. $1.50, bu. $5.50.

A GREAT SUCCESS

Your new May Queen is a great success for quality and yield; in fact all your seeds do remarkably well with us. Gardener to Capt. H. C. Fleming, Boston, Mass.

MOORE'S DAISY. This is truly a gem for the family garden; unsurpassed for quality and productiveness, ten to twelve inches high, the smoothest wrinkled sort known. The vine is literally covered with extra fine plump pods, containing from seven to nine green peas of superior flavor. Pkt. 10c., qt. 30c., pk. $1.25, bu. $5.50.

IMPROVED SERATAGEN. The pods are long, broad and somewhat flattened, resulting in fine quality, true stock, 3½ ft. Pkt. 10c., qt. 30c., pk. $2.25, bu. $5.50.

NEW GIANT PODED MARROW. This new pea has given satisfaction to all who have planted it. It grows about two feet high, and bears handsome pods, filled with large, deep green peas. Pkt. 10c., qt. 30c., pk. $1.00, bu. $3.50.

MOORE'S FILLBASKET

Introduced by us in 1890, the grand new pea has been very much admired. The illustration herewith shows a pod of an engraved exactly natural size. The vines are of strong, sturdy growth, 4½ to 5 feet high, and of a decidedly branching character and bear an enormous crop of magnificent large green round pods, each containing eight to twelve peas, of remarkable size and very rich and sugary flavor. It has been appropriately termed the "Fillbasket" on account of the extraordinary quantity of large pods that it produces. We have had many letters in praise of its great productiveness, the extra large size of the pods, and the delicious quality of the peas. It is unquestionably the very best large podded pea ever introduced. Pkt. 10c., qt. 30c., pk. $1.00, pu. $5.50.

NOTT'S EXCELSIOR. An extra early, dwarf, wrinkled pea. Pods one-third longer than American Wonder. Pkt. 10c., qt. 30c., pk. $1.25, bu. $5.50.

MOORE'S ADVANCE. Satisfactory. ADVANCE, 4½ feet. Pkt. 10c., qt. 30c., pk. $1.00, bu. $3.50.

Large buyers of Peas will please write us for special prices, stating quantity wanted.

New Early Sugar Marrowfat Pea

In our annual trials of peas, numbering many hundreds of rows, this variety was conspicuous among them all for its astonishing profusion of pods, which are large and handsome and bountifully filled with dark green tender peas of the true delicious marrowfat flavor. In England, where we obtained our stock seed, it is extensively grown by the nobility, who prize the Sugar Marrowfat above all others of its class. It is the earliest of all marrowfats and will satisfy the most exacting who strive for the best quality. We recommend it to all who plant for home use or market; one of our best introductions. Height, two feet. Maturing about one week after our Lightning Extra Early. Pkt. 10c., qt. 35c., 4 qts. $1.15, pk. $2.00, bu. $6.50.

YOUR NEW EARLY SUGAR MARROWFAT PEAS ARE A REAL DAINTRY. Its delicious quality is a revelation to all who eat it.

JAMES SYLVESTER WORTHINGTON

Chestnut Hill, Pa.
Grown for seed in the far North, 10 to 12 bushels to the acre. 1 peck will plant about 125 hills. Michigan Grown Seed Potatoes.
Our seed potatoes have been carefully grown, especially for seed, on light, sandy loam, entirely free from all disease, in the extreme north of the State of Michigan, and will give the best possible results to all who plant to.

Prices vary with the market. Special prices given by letter on lots of five barrels and over. We give full legal weight.

...Advantages of Changing Seed Potatoes...
There is no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as the potato. They seem to take a new life and prove wonderfully to the change is to a well-selected stock, and the further north it is grown, the better.

Our best customers will not plant their own raising of seed at all, but buy of us every year. They can grow nearly double the crop on the same land that they can from their own raising and the tubers are smoother, handsomer and of better quality and more salable in the markets. A good change of seed a ways pays. The yield is frequently doubled thereby.

Potatoes by mail. The price of all varieties is 30c. per lb. or 3 lbs. for 75c., correctly labelled, and sent, postpaid, to any address in the United States.

FILLBASKET EXTRA EARLY Originated by crossing our famous Snowball and Quick Crop. The Fillbasket Potato soon proved itself to be a very popular and profitable sort for home use and shipping and has forced its way among our large planters. Those who grow it for the market find it to be twice as profitable as Early Rose, Hebron, Triumph or Early Ohio. It always commands a higher price than other sorts and besides it is an enormous cropper, as our photo illustration shows. It is, as its name would suggest, a remarkably quick grower, of the most approved shape—viz., a very smooth, full tuber, with no slim points nor projections to waste in preparing for the table, or waste in handling. Sufficiently elongated to make a good baker, it is not too much so to serve well boiled. It is an ideal general purpose potato. In color, it somewhat resembles the Prince Edward Island Rose. When cooked, the flesh is pure white, dry and flaky. ½ pk. 36c., pk. 75c., ½ bu. $1.25, bu. $2.50, bbl. $4.50.

NEW EXTRA EARLY POTATO The Bovee A GREAT CROPPER.
It takes a leading place among the heavy cropping varieties, an unusual thing among first early. It is even earlier than Early Ohio, and compares favorably with Triumph. True stock. Pk. 65c., bu. $2.00, bbl. $4.50.

QUICK CROP VERY PROFITABLE FOR EARLY MARKET.
It is several days ahead of the Early Rose, and is a special favorite with farmers and marketmen. Maturing early, brings highest prices, and the land can be used for other crops; does well on any soil suitable for potatoes. The tubers grow compact in the hill, are easily dug, very few small ones nearly every one marketable size; few eyes which are even with the surface. Skin a delicate pink color; they keep firm until late in the spring. Many of our Southern growers have planted this variety almost exclusively for early shipment North. With heavy manuring, close planting and good culture, a very large and profitable yield can be expected; 300 to 500 bushels per acre is not an unusual yield. Pk. 75c., bu. $2.00, bbl. $4.50.

SUTTON’S EARLY MONARCH (New)
Under ordinary cultivation, this variety has by actual test produced 463 bushels per acre.

This new early potato is now attracting wide attention. Its points of excellence, as claimed, are its earliness, wonderful productiveness, vigor of growth, quality, smoothness and handsome shape and appearance. It receives its name from its originator, Mr. Sutton, a noted potato hybridizer. It is a pink or flesh colored potato, of the shape indicated by the illustration. The shape is very uniform. It matures from early to second early, and in table quality is white, dry and mealy. It is as perfect in shape as the Snowball, and probably about one week later. The introducer says that the Early Monarch takes a leading place among the heavy cropping varieties, an unusual thing among first early. Our own observations on Early Monarch are favorable, and we do not hesitate to commend it highly. As a variety for planting for second early or late crop, it is without an equal. The tops are comparatively short and stocky, and the tubers are all bunched together in the hill, and are of good size and quality. ½ pk. 40c., pk. 75c., ½ bu. $1.25, bu. $2.25, bbl. $4.50.
Moore's Early Snowball Potato

They are fully a week in advance of any other kind in earliness and are the heaviest croppers.

Moore's Snowball can always be marketed, at least ten days before the top dies, as the new potatoes commence to grow before the tops are six inches high. Another great merit lies in its great keeping properties, remaining solidly fresh until the new crop is dug, and will often remain in the cellar without sprouting until June 1st. Hills of new potatoes of a fit size for table use can be dug in six weeks from the time of planting if weather for growing has been favorable, and the tops thoroughly ripened in from eight to nine weeks, with crop fully matured.

Moore's Early Snowball was produced from a seed ball taken from a vine of the Snowflake, growing between Early Rose and Early Ohio. Tubers are oblong, skin a beautiful pink color, flesh white; upright, strong vines, with tubers growing compactly in the hill. We have never tested a kind which possessed the desirable points of an extra early, large yielding, high quality potato like Moore's Early Snowball. Our grower informed us early last season, when all early crops were but half grown, that Moore's Early Snowball and Fullbasket had set much more and that the tubers were double the size of any extra early varieties he had planted, and adds, "We should save seed for a larger planting next year." 1 lb. 30c., 3 lbs., 75c., by mail postpaid; pk. 70c., ¼ bu. $1.25, bu. $2.20, bbl. $4.75, 2 bbls. $9.00, 5 bbls. $22.00.

Moore's New Early Bonanza Potato

Extremely prolific and fully a week earlier than the Early Rose. Color a beautiful white, and very mealy when cooked; size, medium to large. Growth very smooth and uniform. The shape is very well shown in our picture. This potato is in exceedingly high favor with market gardeners everywhere, and especially in the South. It makes a handsome early potato for either barrel or basket, its beauty, good quality, extreme earliness and great productivity make it highly profitable, no matter where grown. It is equally desirable for the home garden, where good quality is always appreciated. In point of maturity it follows our Early Fullbasket and Snowball.

We sell it by mail, postpaid:
1 lb. 35c.,
3 lbs., $1.00.
By express or freight:
Pk. 75c.,
¼ bu. $1.20,
bu. $2.25,
bbl. $4.50,
2 bbls. $8.50,
5 bbls. $21.00.

Moore's New Early Bonanza Potato

The great drought resister. We mean just what we say about it being a great drought resister. It stands hot, dry weather better than any other sort. We have seen Early Rose, Hebrons, Irish Cobblers, Green Mountains, Ohios, etc., cease growth entirely and fail to produce even 10 per cent. of a crop in dry seasons, while Moore's Early Bonanza vines stood up green and vigorous and produced a tremendous crop of beautiful potatoes. Thousands of market gardeners will bear us out in this statement. In growth the vine is dense and robust, but compact. This is favorable to close planting. It is also a magnificent main crop potato. There are many people who plant but one variety. To such we would not hesitate to recommend Moore's Early Bonanza, on account of its being a splendid potato when early, a splendid potato when used in the summer or fall or winter. It is a perfect keeper—none better. There are rarely any small potatoes in a hill. Many of our customers say it is way ahead of any other sort as an all round potato for early or late. It seems to be disease proof; neither scab nor blight has attacked it. A good thing, did you say? We should say so, my friend. It is here to stay, and we believe you are like us, in that you know a good thing when you see it and that you will plant it, and plant lots of it, too. Just one more word—It will pay you big to plant it, be it a peck or a hundred bushels.
IT PAYS TO PLANT GOOD EARLY POTATOES

New White Rose

This new potato is no experiment; we have watched it for five seasons, and pronounce it the best long white potato we ever raised. It never shown the first sign of blight, and in point of yield is ahead of all other long white sorts. This potato is a coss between the Early Rose and White Rose, is medium early and early medium, is of a rich, dark green in color and absolutely blight proof. It seems also to be proof against the potato beetle as well. There are no pests of any with the White Rose, all hills yielding about the same throughout the whole field. In cooking qualities it is second to none. When cooked it resembles Early Rose and is equally good. It is very productive of the long white varieties and will yield 200 to 400 bushels per acre on any good land. Its unusually fine appearance and its high "market" prices make it very popular.

New Morning Star

This handsome new variety is the finest in quality of all the long shaped early potatoes, as well as the very earliest variety combining large size. We have tested it several seasons and find it earlier than the Hoosil or F. E. Island Rose, fully as large and vastly more productive. The color is a very light pink. Its exceedingly fine table and cooking qualities make it a great favorite with all, housekeeper and growers well. We have several records of yields exceeding 500 bushels per acre. The tops die down quickly after the last frost and are removed before the second crop; consequently of great value to market gardeners. We know all customers who plant it will be well pleased with it. The other feature is its adaptability of all kinds of land. Please order early. Ph. 75c., ½ bu. $1.50, bu. $2.00, bbl. of 165 lbs. $4.50. Special prices for large quantities will be quoted by letter.

New Northern Star

This grand variety originated near Van Buren, Aroostook County, Maine. So eager were potato growers to obtain seed of it that they paid $5.00 per barrel for it, and considered it cheap at that. The vines are strong, and, with exceptionally deep green foliage, making a robust bush, and where other sorts are cut down by blight. It will bring a higher price than any other sort. It is the quickest and finest cooking late potato we ever tested, as well as the most productive. It has fine white, thick-set, and very white, and is very productive. It is a very good potato, which makes it a very profitable variety for the planter. It will pay every potato grower to plant one or more barrels of this magnificent variety, so that they can sell seed at double rates. We have had it in perfect condition as late as August 8th. Don't fail to include it in your order. It makes the better for you and your bank account. Ph. 65c., ½ bu. $1.20, bu. $2.00, bbl. $4.00.

Clyde's Early Fortune

The shape is nearly round. The vines resist drought to a remarkable extent and the crop is matured before the hot dry summer sets in and is remarkably free from second growth. Planted with the Bovee the Eureka matured ten days earlier, and the vines were entirely dried up while those of Bovee made a second growth. It is a week earlier than Early Rose or Hebron, and is an excellent keeper for so early a potato. We have eaten tubers which were in good condition the spring following. The firm white flesh is of good flavor when cooked, but not equal to Sutton's Early Monarch. The tubers are quite broad and of a shortened oblong form, thick through, with few eyes. The skin is smooth and of a snowy whiteness. It is well adapted to all sections of the country and especially so on light soils. Per lb. 30c., 3 lbs. 75c., postpaid. By express or freight: Per pk. 65c., bu. $2.00, bbl. (165 lbs. net) $4.50.

New Early Harvest Potato

This exceedingly promising new potato was sent out for trial to some of our customers, under the name No. 17. The reports received were very flattering. The name, Early Harvest, is bestowed in honor of its originator, Clyde Somervell, a leading potato specialist of New York. It is handsome, medium early, highly prolific and very desirable in every respect. In character, Early Harvest potato has the same parentage as Empire State. It is somewhat on the order of the Beauty of Hebron, but is the same shape as the Quick Crop. Some of the blood of the M. & S., Early Snowball flows in its veins. In a word, it is high bred all over. The eyes and sprouts indicate vigor and youthful strength and the table quality is superb. Last, and most important, it is a heavy cropper. Mr. Wm. Parsons, an experienced potato grower of Delaware Co., Pennsylvania, who has grown the Early Harvest for several years, says: "It has, in fact, for several years outyielded all old standard and new varieties." He, moreover, testifies that the tubers are free from both blight and rot, owing to the vigorous growth. The vines are bountiful of fresh vitality and we recommend Early Harvest as a money maker. From our personal observation we highly endorse it for light sandy land and sandy loams along river bottoms. ½ pk. 35c., pk. 70c., bu. $2.00, bbl. $4.50.

Hybridized Potato Seed

We offer a very fine strain of Potato Seed, the product of numerous hybridizations, one of the best of the new and old varieties in cultivation, to which we have added the best selections from prominent English, French and German potato growers. All notable new varieties are obtained from hybridized seed. We frequently purchase at good prices promising seedings grown from seed purchased from us. Price, postpaid, pkt. 50c., lbs. 25c., bbls. 10c. For information on planting, cultivation, etc., on each packet.

GET FANCY PRICES AND BIG MONEY FOR EARLY TRUCK

AUSTIN'S PATENT PLANT BED PROTECTING CLOTH—SUBSTITUTE FOR GLASS—WILL AID YOU

This will be found an excellent substitute for glass (at one-tenth the cost) in protecting from frost all kinds of seeds and plants on which glass sashes are used in early spring. The patent treatment given the cloth fills the threads and fibres and preserves them from decay, and, to some extent, gives rigidity. It is a great value to market gardeners and truck planters. We have supplied it to our customers in all sections of the country, and with hardly an exception that it has been used, farmers have been satisfied and forwarding all kinds of seeds and plants for which glass sashes are used in early spring, etc. It will be found to be of great value to our customers, especially in the South, who grow cabbage, egg plants, lettuce, pepper, tomato and other plants that are very tender.
Digging an 800 Acre Field of MOORE'S EARLY DIAMOND POTATOES
The best general cropper on light or heavy soils

"MOORE'S EARLY DIAMOND" is surely a drought resister and apparently free from all blight. We had an unusually dry season and my planting of 30 barrels struck the driest part of it. Still they were way ahead of other varieties planted alongside, in yield and earliness. Bliss Triumph yielded at the rate of 118 bushels, Cobblers 16 bushels and Jersey, 20 bushels per acre. There were very few seconds in the Bassano on account of their beautiful appearance. Buyers have paid extra money for them."—W. O. BURK, BRIDGEPORT, N. J.

NEW BLOOD that is what we have in our EARLY DIAMOND—fresh and strong blood. Thousands of farmers are using seed that is so run out there is no profit in growing the crop. MOORE'S EARLY DIAMOND is fully capable of infusing new life and profit into the potato business.

Price 1b. 30c., 3 lbs. 75c., postpaid; pk. 70c., 1/2 bbl. $2.00, bbl. $4.25.

NEW JERSEY SEED SWEET POTATOES
New Jersey grown Sweet Potatoes are everywhere acknowledged to be the best in quality, being much dryer and sweeter than those grown in the South and West, while their keeping and shipping qualities are away ahead, and will always bring the highest market price. We make a specialty of seed sweet potatoes, growing our stock exclusively in New Jersey. We pack for shipment in boxes and barrels, with greatest care; and wish it distinctly understood that customers take ALL RISKS after we deliver in good condition to the express or railroad company here. We do not ship until about planting time unless special orders afield. 1,000 plants furnished at $1.00 rate.

EXTRA EARLY CAROLINA, JERSEY "UP-RIVERS," EARLY NANSEMOND and NEW EARLY EXTRA ACCOMAC. Each, per pk. 80c., bu. $2.35, bbl. $4 50.

Plants of the above ready after May 1st; 60c. per 100, by mail, postpaid; or express, 35c. per 100, $2.50 per 1,000.

NEW GOLDEN SWEET. It is better adapted for cultivation in the northern states than any other variety. Price, per pk. $1.00, bu. $2.75, bbl. $5.00. Price of plants, ready after May 1st, 75c. per 100, by mail, postpaid; or 40c. per 100, $3.00 per 1,000 by express.

IMPROVED VINELAND BUSH SWEET POTATO
The Improved Vineland Bush Sweet Potato is shorter and more chunky in shape than the old variety. It originated on the farm of Mr. Martini, the extensive sweet potato grower of New Jersey, from the well-known Early Nansemond and Old Vineland Sweet Potato. It is a perfect bush variety, with no inclination to spreading, resembling a bean bush very closely. They are most abundant bearers, good flavor, handsome rich yellow color and excellent keepers. Customers say: "They’re a great improvement over all other potatoless varieties."

Plants of the Improved Vineland Bush Sweet Potato ready after May 1st; 50 for 60c., 100 for 80c., by mail, postpaid, 75c. per 100, $1.00 per 1,000, by express. (500 plants at 1,000 rates.)

We will make special prices by letter for larger quantities—we write before you buy. We are headquarters.

KNISEL’S RED QUEEN. An excellent short or chunky variety with pretty red skins and deep yellow flesh, sweet and meaty. Very productive and good keeper. Generally regarded as the best eating sort of all. Plants ready after May 1st; 65c. per 100, by mail, postpaid; or express, 40c. per 100, $2.50 per 1,000.

No tubers for sale.

when the money is remitted with the order. This generous offer does not apply to seeds in bulk, by the quarter pound, pint or upwards, nor to flower seeds in trade packets; the latter are net.
Pumpkins are now largely cultivated for market purposes, and are found to be very profitable. They are usually planted in fields of corn or potatoes, but may be profitably raised in fields by themselves. They also make very profitable and healthy food for stock. We hereafter illustrate some of the best market varieties.

Large Cheese. Of fine grain and excellent flavor. Fkt. 5c., oz. 10c., 3/4 lb. 20c., lb. 60c.

Tennessee Sweet Potato. Of medium size, pea-shaped, colored white, lightly thick, creamy white, finely grained, dry, brittle and of excellent flavor. When cooked it has somewhat the appearance of sweet potatoes, but of more delicious taste. Fkt. 5c., oz. 10c., 3/4 lb. 20c., lb. 60c.

Cashew. Long, yellow crookneck. Good keeper. Fkt. 5c., oz. 10c.

Genuine Mammoth, or True Chilian [Also called KING OF THE MAMMOTHS.] It grows to an enormous size, three feet or more in diameter and one hundred to two hundred pounds or more in weight. Skin deep yellow; flesh very thin. Fkt. 34c., oz. 10c., 3/4 lb. 30c., lb. 80c.

Winter Luxury Pumpkin. Few, if any, pumpkins can equal the Winter Luxury for cooking—in fact, one of our growers who knows all varieties is emphatic in stating that “it is the best pumpkin grown for pies.” The flesh is very thick, sweet and fine flavored, making the most delicious pies. Color a golden russet, finely netted. Flesh deep golden, sweet and tender. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 80c.

Japanese Pie Pumpkin. The seed cavity is extremely small. The seeds are curiously sculptured in the manner of Chinese letters. It is a very productive variety, ripens early, of medium size, good keeper and weighs fifteen to twenty pounds. Flesh is a rich salmon color, unusually fine grained, and when cooked or stewed is almost as dry and mealy as a sweet potato. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 80c.

Mammoth Golden Cashew. (New.) The flesh is a rich yellow color, solid, finely grained, very thick, sweet and excellent for pies, and equally good for baking. They are very hardy, and seldom bother them. Can be grown without the corn, and yield a much heavier crop than most other sorts. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 80c.

Large Connecticut Yellow Field. Easily grown alone or in the corn. Oz. 5c., 3/4 lb. 10c., lb. 30c., 10 lbs. 30c.

New Boston Golden Sugar. Pumpkins. They are round in shape and very slightly ribbed. The skin is of a rich golden-orange color, very beautiful. Flesh of extra fine flavor, and very fine and tender. It is a fine keeper. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 80c.

Mammoth Etampes Bright Red. This giant variety, also from France, is quite celebrated and has been grown in this country to an enormous size. It is of a bright, glossy red color. A splendid variety to grow for exhibition purposes. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 90c.

Yankee Cow Pumpkin. This valuable pumpkin will be found a great boon to farmers with dairies, large or small. It greatly increases the flow of milk, besides imparting to it a rich yellow color, and really adds to the flavor and color of the butter of all cows fed upon it. Twelve tons to the acre is common. If land be manured liberally a full crop can be grown among corn. It is a most excellent keeper and will be sure wealth to all who grow and feed it liberally. Oz. 10c., 3/4 lb. 20c., lb. 45c., 5 lbs. 81c. 75.

Thanksgiving Pie Pumpkin. On account of the extra thickness the yield in pounds is double that of other kinds. The flesh is orange in color, fine grained, sweet and has the delicious pumpkin flavor essential to the making of first-class pumpkin pie. The name “Thanksgiving” was suggested by the almost universal custom of having pumpkin pie at the Thanksgiving dinner. Fkt. 5c., oz. 10c., 3/4 lb. 30c., lb. 90c.

New Persian Golden Giant. Produces truly gigantic globeshaped fruits. The skin is of a beautiful rich salmon color, while the firm grained flesh is highly colored, of a deep yellow, sweet flavored and very thick. The pumpkins attain an enormous size and will attract great attention when placed on exhibition. Fkt. 5c., oz. 15c., 3/4 lb. 45c., lb. 110c. 50.

How to Grow Mammoth Pumpkins

Plant in rich soil three to four seeds in a hill; make holes twelve inches deep, six inches apart, when the plants have four true leaves go to double or two of the strongest plants to each hill. As the vines develop and flower and small pumpkins come in turn, remove all but one of the best pumpkins on each vine. By doing this the full strength of each vine will go into one pumpkin and produce a large specimen.
All our seed is grown from transplanted roots only, which insures the greatest possible perfection. Our seed will therefore give more truthful satisfaction than that obtained elsewhere.

**MOORE’S QUICK SELLING**

The general verdict of radish growers is that it is the quickest selling radish ever had; hence we named it "Quick Selling Radish." Our illustration shows its natural size and shape. The color is a very brilliant and attractive red, very crisp and tender; usually matures in twenty-eight days from time of sowing. It is the most valuable new radish introduced for many years. The appearance at once striking to all, and it should be grown by every market gardener and amateur. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 75c., 5 lbs. $3.00.

**MOORE’S SCARLET GEM**

This variety is indeed a perfect gem. It possesses all the qualities of radishes and is a very early and suitable variety for growing under glass. The leaf is of a beautiful scarlet color, and the radish is very crisp and tender. The mature plant will become pithy with age, and the radish will remain attractive and useful for a very long period. It is one of the finest varieties ever introduced, and we recommend it to all radish growers. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 75c., 5 lbs. $3.00.

**WHITE ENGLISH SUMMER**

A very desirable radish for summer use, remaining solid and crisp after spring sorts are over. Top of medium length. Much used in England. Very crisp and sweet. It is well adapted for summer use during any season of the year. It is a rapid grower, has a small top, can be planted closer than most white summer sorts—and it finds ready sale. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 60c., 5 lbs. $2.00.

**NEW PINK LADY FINGER**

They grow perfectly straight and smooth, ranging from four to five inches in length. Their attractive pink color is due to the combination of a very short, very solid and rapid growth. It is the ideal white radish for all purposes. It is remarkably sweet, tender and juicy. This is the best extra early white radish ever produced, and is the only white radish that can be successfully grown in New York City and vicinity. For the cottage, garden or market purposes we consider it a great improvement. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 60c., 5 lbs. $3.00.

**EARLY SCARLET GLOBE**

It is grown very largely, to supply the enormous demand in Philadelphia, New York, Boston and other markets, where its brilliant color and attractive shape have secured for it a prominent place. Our strain of this important variety looks better in the bunch and holds its color longer than any other. Our stock is not equalled by any to-day, and is selected carefully for the most critical trade, some grower buying as much as 600 pounds annually for forcing purposes. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 60c., 5 lbs. and over at 50c., lb.

**BRIGHT RED TURNIP RADISH**

This is unquestionably one of the best forcing varieties for growing in cold frames and hot beds; also very desirable for fall planting. It is of a brilliant scarlet color, with very short and small leaves, tender, crisp and juicy, with the best quality all that could be desired. Will mature in ten to twelve days, and can be grown very thickly in the row without like other sorts it will well through-out the year. It does not become spongy nor pithy quickly. You will be pleased with it. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. 75c., 5 lbs. $3.50.
MOORE'S NEW SCARLET BALL. This is a very distinct and highly desirable new radish of our own introduction and one which we recommend to every grower of radishes. Shape perfectly spherical, very small, firm root, short, small, barely and a very attractive vivid scarlet color, flesh pearly white, solid and deliciously crisp, mild and tender. It attains about twice the size of our celebrated Bright Red Forcing Turnip. It positively will not grow below or play; remains deliciously crisp and juicy for weeks; a fine market variety for any season of the year. Well adapted for cool or warm borders or open field culture. We respectfully urge every one of our customers to plant it. Pkt. 5c., oz. 15c., $1.00.

IMPROVED WHITE LADY FINGER. This is unquestionably the finest long white radish for sowing at any season of the year. We found it growing in a field of our Quick Selling which we had planted for seed. In color it is a beautiful, true white. It is of very rapid growth, and remarkably crisp, brittle and tender; will stand longer before going to seed than any other white sort equally desirable for the home garden and as a market sort it will be found invaluable. Pkt. 5c., oz. 15c., $1.25.

FELTON'S SELECTED WHITE BOX. Very small, top, early, solid, good shape; fine for sash or open ground. Felton's own stock. Pkt. 5c., oz. 10c., $1.50.

IMPROVED WHITE STRASBURG. Our stock is much superior to that ordinarily sold. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

ADRIAN'S WHITE BOX. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

WHITE VIENNA. Oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

PHILADELPHIA GARDENER'S LONG SCARLET. Very popular in the Philadelphia and New York markets. The long, slender, handsome radishes are of the most brilliant scarlet coloring. Flesh purest white, crisp and juicy. The best long scarlet radish; they are ready to pull in about twenty-five days. Oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

RED CHANTERLE DU RHÔNE. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

CINCINNATI MARKET. Extra fine stock. Oz. 10c., $1.25. 25c., lb. 50c.

SCARLET TURNIP WHITE TIPPED. Oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

FRENCH BREAKFAST. True imported. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

PARISIAN BLACK SPANISH. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

WHITE CHINA. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

ROUND BLACK SPANISH. Very choice. Home grown. Oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

WHITE SWAN'S EGG. All radishes. We, however, especially recommend it as the best of all white winter radishes from seed sown early in August. The skin and flesh are both snow-white, crisp, bristle and of best quality. If buried like apples it will keep in perfect condition until spring. Excellent market stock. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

EARLY WHITE DELICACY. This new sort is a cross between Wood's Early Prime and Improved White Strasburg. A most distinctive character is its tall, rich, transparent, waxy appearance. The shape is long and pointed, the most developed for bunching, being what might be called half turnip rooted. The color is bright white, with the waxy appearance above described, and the texture is very firm and solid. Its about one week later than Simon's Old Irony, but after they are ready for market, they remain in marketable condition for three weeks. For a fine, mild and crisp, extremely well adapted for forcing and early marketings. Pkt. 5c., oz. 10c., $1.25. 25c., lb. 50c., 100 lbs. $5.00.

NEW SWEDISH BUTTER RADISH. Every one having one or more milk cows should plant this valuable radish. We know of no root crop that will insure as good health or prevent disease in milk cows like this. It is a great milk and butter producer both in the tops and roots and readily eaten. Flesh white and compact. Acts as a fine stimulant and causes perfect digestion, thus increasing the flow and quality of the milk. The roots contain a length of 10 inches by 6 inches in diameter. The yield per acre is double that of other white or turnip. Can be stored like mangled beets or turnips during winter. Sow 3 oz. to the pound, direct, in rows of 16 inches apart or broadcast in July 15th to August 1st. Pkt. 5c., oz. 10c., $1.25.
RHUBARB OR PLE PLANT

Giant Extra Early Paragon. In growth it resembles Victoria and is quite as large and productive as that well-known variety, but the Rhubarb is more upright in habit, and in the open ground comes earlier into use. Another and still more important merit is the beautiful color—a rich, bright red, and this characteristic remains after cooking, even when forced in absolute darkness. The sticks are large and exceedingly tender, and have a delicious flavor. Altogether this fine variety possesses a combination of qualities which will make it a necessity with every progressive market gardener. Just as desirable for the family garden, it is an enormous yielder and sells at "top-notch" prices. One of our customers took $1,500.00 from one acre of this sort. Extra strong roots 10c., 3 for 25c., doz. 1.00, 100 75c. Add 5c. per root if to be mailed. Seed, pkt. 10c., oz. 30c., 1/4 lb. 75c., lb. 50c.

CRIMSON WINTER. A large red-stalked, compact-growing, immensely productive variety and the earliest; quality unusually juicy, rich and spicy. Pkt. 10c., oz. 30c., 1/4 lb. 80c., lb. $1.00, 100 75c. Strong roots, each, 10c., oz. 30c., 1/4 lb. 50c., lb. $2.50. LINEARIS. Small stalks of very superior quality; rich red color. Pkt. 10c., oz. 30c., 1/4 lb. 50c., lb. $2.50.

VICTORIA. A very large, thick, red-stalked late variety of fine quality. Pkt. 5c., oz. 15c., 1/4 lb. 40c., lb. $1.25.

Large roots of Linearis or Victoria. Doz. 75c., 100 $1.00, per 1000 $10.00. Add 5c. each if to be mail. Rhubarb Roots are a great specialty with us and can readily supply 100 or 10,000. Write us for prices, stating quantity wanted.

TRUE ESSEX RAPE.

Valuable for Cattle, Sheep and Hogs

This is a highly valuable forage and should be fed by all who grow any kind of live stock for food purposes. Under favorable conditions it is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average 1 acre will carry fifteen to twenty sheep or hogs eight weeks to two months. When on the rape they should at times have access to salt, but water is not necessary. In the Northern States it should be sown from April to end of August for full pasturing, but as it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pastures. In the latitude of Philadelphia it should be sown in April, or in July or August. Its fattening properties are probably twice as good as those of dairies, and for sheep the feeding value of rape exceeds all other plants we know of. At the Michigan Experiment Station, 130 lambs were pastured for eight weeks on 100 falls of rape, sown in July, and showed a gain of 2,800 lbs., or at the rate of 3 lbs. per lamb each week. The growth is enormous and makes excellent green food for all kinds of poultry. To secure the best results the necessary nitrogen should be applied in drills. Sow 4 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. 1 lb. by mail 30c., pkt. 5c., oz. 15c., 10 lbs. $1.00, 50 lbs. $2.25, 100 lbs. $6.00.

SORREL

Large Leaved French. Cultivated for its acid flavor, and much used in salads. Pkt. 5c., oz. 10c., 1/4 lb. 30c., lb. $1.00.

Swiss Chard. This is a variety of Beet grown for its leaves, which, boiled, form delicious greens; the tender ribs are esteemed when cooked and are used like Asparagus. Pkt. 5c., oz. 10c., 1/4 lb. 15c., lb. 40c.

New Giant Thick-Leaved Hardy Winter Spinach.

Weeding and cultivating a twenty-five acre field of our Belgium Evergreen Long-standing spinach for seed, with Planet Jr. Special Hand Wheel Hoes No. 15. Price $3.00.

SALSIFY

Moore's Giant White Russian. This is the largest, smoothest and most profitable in cultivation. Roots pure white in color, three times larger than the ordinary Salsify, of very superior quality and fine flavor, flesh very fine grained, tender and of more pronounced and agreeable oyster-like flavor. Irresistible to market gardeners. The tops remain in good condition until the following spring. The seed should not be sown so early as other varieties. This variety was sent us by the American Consul at Petersburg, Russia. It is the exclusion of all other sorts. Pkt. 10c., oz. 30c., 1/4 lb. 45c., lb. $1.00, 50 lbs. and over $1.40 per lb.

Improved Mammoth Sandwich Island. Our improved strain is remarkably fine and superior to any other strain. Pkt. 3c., oz. 15c., 1/4 lb. 35c., lb. $1.00.

SPINACH

We are very large growers of Spinach Seed and can give very low quotations on 100 or 1,000-lb. lots of any sort.

New Amsterdam Prolific Long Standing. The most abundant cropper; the longest keeper; the finest quality; doubles the yield of all other long-standing sorts; the best spring spinach in the world for the amateur or market gardener. This is a new variety, distinguished for its exceedingly dark-green colored, curly leaves of robust growth, and for its remarkably long standing qualities, being from two to three weeks later than all other long-standing sorts. It is very hardy and will withstand the severest winter, of rapid growth and is adapted to any time in the year. On account of it being such an enormous yielder, the ground should be well manured. Pkt. 2c., oz. 10c., 1/4 lb. 35c., lb. 35c., 10 lbs. $3.00, 100 lbs. $25.00.

AMERICAN ROUND SEEDED SAVOY or BLOOMDALE. 1/4 lb. 10c., lb. 16c., 100 lbs. $15.00.

New Hardy Winter. The best for fall and winter sowings as well as early spring; of a handsome dark-green color, producing more and larger beautiful curled thick leaves than any other. Will yield double the bulk, and remain firm and bigger longer than any other. The best and most profitable curled variety to grow. Oz. 5c., 1/4 lb. 10c., lb. 30c., 100 lbs. $15.00.

Belgium Evergreen, or Virola-
Moore's New Extra Early Cluster

The ideal early Patty Pan. The most profitable early squash for either home market or shipping

The productiveness of this variety is truly astonishing, the yield is truly enormous; it is not uncommon to count eighteen or twenty beautiful green fruits on a vine at one time. Sixty-one squashes have been picked from a single hill. It is a true bush variety of unusually compact growth. The fruits are smaller than the Joe's Extra Early to which we introduced eight years ago and which proved so profitable to all who grow it. The color is a beautiful pea green. The earliness of Moore's Cluster is no less remarkable.

The seed cavity is unusually small, while the rich, delicate flavor and delicious quality is not found in any other sort. It is ten days earlier than the Long Island Mammoth White, or White Scallop. On account of its extreme earliness, beautiful appearance, and fine eating qualities, it being very tender and fine grained, it outsells all other sorts on any market. Fancy prices are assured all who grow it.

It is the best keeper, the fruits carry better, remain in good condition longer, and retain their attractive and beautiful pea green color longer than any sort hitherto introduced. It is not only early, but if the fruits are promptly picked it will continue to yield a marketable squash twice as long as any other. Indeed, we cannot recommend it too highly to all who wish early squashes, and plenty of them. We have had it fully tested by our home market gardeners and many large southern growers in Texas and Florida, and they all agree in saying it is the king of all early sorts for the grower, dealer and consumer. No home garden should be without it.

**FINE PEAGREEN COLOR**

**BEYOND QUESTION: THE BEST EXTRA EARLY BUSH SQUASH.**

---

**Dow's Extra Early Patty Pan**

Productive. The squashes mature fully a week earlier than the Long Island White Mammoth and are bringing high prices. The squashes cook well and the flavor is delicious. It forms no hard shell until nearly ripe, which is another great improvement over all others of this type. Color a beautiful green. Entirely free from any yellow cast. Unusually solid and heavy, which greatly enhances their value for shipping long distances.

**LONG ISLAND MAMMOTH WHITE BUSH.** True. Fruits are deep and light green to white. Oz. 10c, 34 lb. 25c, lb. 65c, 5 lb. $3.00.

**Strickler Green Summer Crook Neck.** They have a dark green skin, are very productive, of the finest quality and sell well. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 75c.

**Canada Winter Crook Neck.** Rich yellow, solid and fine grained. Good keeper. Pkt. 5c, oz. 10c, 34 lb. 35c, lb. 60c.

**WARNED HUBBARD.** Of large size, and very dark green color. A good keeper. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 65c.

**PIE Squash.** Flesh is yellow, very thick and of fine quality. A ready seller on market. Pkt. 5c, oz. 10c, 34 lb. 35c, lb. 60c.

**IMPROVED CUSHAW.** Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 60c.

**DELICATA.** Pkt. 5c, oz. 10c, 34 lb. 35c, lb. 65c.

**Dunlap's Prolific Early Golden Marrow.** This new Marrow Squash is certainly a valuable acquisition; for, while it is remarkably productive, no variety can compete with it for earliness, it being about twelve days ahead of the Boston Marrow, and for this reason can be planted a week later than any other variety of marrow. Its color is most attractive, a brilliant creme color.

A good keeper. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 60c, 5 lb. $4.50.

**French Cocoonut.** For both summer and winter use. The most deliciously flavored squash grown; dry, sweet, rich and wonderfully solid and productive and the best keeper of all. When well mated and taken off in fine condition it is a unique thing for them to keep one year in good condition.

**Golden Custard Bush.** Large golden scallop. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 65c.

**Mammoth Chill.** Pkt. 5c, oz. 10c, 34 lb. 30c, lb. $1.00. Very large size, good quality.

**Chinese.** Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 60c.

**The Warren.** Excellent winter sort. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 75c.

**Golden Warned Hubbard.** Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 70c.

**Giant Golden Summer Crook Neck.** Bright yellow, very fleshy and early and all summer. Pkt. 5c, oz. 10c, 34 lb. 50c.

**New Egg Plant Bush Squash.** Beautiful cream-colored fruit, of medium size and first-rate quality and excellent flavor; delicious when made into fritters. Comes into fruit much earlier, besides being free from disease and much easier to grow than egg plant proper.

**Boston Marrow.** Flesh dry and sweet. Pkt. 5c, oz. 10c, 34 lb. 25c, lb. 60c.

**Sutton's White Vegetable Marrow.** Pkt. 10c, oz. 15c, 34 lb. 30c, lb. 80c.
**THE MOST VALUABLE**

Extra Early

TOMATO

EVER INTRODUCED

MOORE'S KING OF THE EARLIES

Is Positively the Largest and Smoothest

Extra Early Red Tomato in the World

We have here the grandest large extra early smooth tomato of the age for market gardeners, private gardeners and shippers, no matter whether you plant one dozen or one million plants for your first picking. It is just the large extra early tomato thousands have been looking for. It is the tomato you need. It is the tomato above all other extra early tomatoes. It is an enormous yielder. The plant is a perfect mass of large, beautiful red fruit. It is the ideal "stem setter," and as there is a remarkable absence of leaves the fruit ripens early and almost "all at once." The tomato that will bring you wealth and fame. Each and every vine is a perfect mass of large size fruit, as our illustration shows. It is a very compact grower and consequently can be planted one-third closer than any other early sort. If you grow early tomatoes, don't miss planting it. It will be both pleasure and profit to you. It is the earliest large, smooth tomato ever introduced. Pkt. 10c., 3 for 25c., 1/2 oz. 30c., oz. 35c., 1/4 lb. $1.00, lb. $3.00.

ANY TOMATO GROWER IN THE UNITED STATES CAN MAKE BIG MONEY GROWING

MOORE'S NEW EXTRA EARLY JUNE PINK

Better in quality, more handsome in appearance and immensely more productive than any other extra early pink-skinned variety. The vines are one solid mass of beautiful, large sized, smooth fruit, which always sells for fancy prices in every market. We have been developing and improving this remarkably valuable new extra early variety for the past eight years and now offer it to our many thousands of customers throughout the world as being the earliest, most productive and most profitable extra pink tomato in existence. First pickings of ripe tomatoes last season sold for $4.00 per crate wholesale. The crowns set often consist of thirty beautiful large fruits. Moreover, it is exceptionally hardy. The fruit is deep, very smooth, solid and meaty and entirely without core. It is a great money maker for all who grow for early market. As a long distance shipper we assure our customers that it will carry fully as well as our Moore's Royal Pink or Moore's Old Blue Stamped Duke of York. That you know is saying a great deal. Every one of our customers who have had it pronounce it free from blight. Fine for the South and will make big money for the man who grows tomatoes for early market, no matter where he may be located. Ask your neighbor about it; he may be planting it. Pkt. 10c., 3 pkts. 25c., oz. 35c., 1/4 lb. $1.00, lb. $3.50.

**BLIGHT RESISTING STOCK**

All our Specialty Tomato Seed is grown, selected and saved exclusively from the best specimens for seed, and is of the highest quality.

MARKET GARDENERS and CANNERS will find our SELECTED TOMATO SEED RELIABLE in every respect.

REMEMBER, THE MAIN THING IN MAKING A GOOD CROP OF TOMATOES IS TO GET YOUR SEED FROM US. BUY THE BEST!
MOORE'S NEW EARLY ROYAL PINK

A truly wonderful yielder—being of large size and wonderfully prolific as our illustration shows—and continues to yield beautiful large fruit longer than the Globe, Acme, or Beauty. Very distinct in shape, firm-fleshed, and of delicate and delicious flavor. It is a very beautiful variety; in quality there is nothing more to be desired in a pink tomato. It has a great future, it has already become a popular variety with all tomato growers who have tried it. Every market grower, large or small, is delighted with it. It is at smooth as an apple, colors up nicely, continues in bearing condition longer than any other pink variety; and meets with ready sale on all markets. Every Florida, Texas, Mississippi, Louisiana, Alabama, Tennessee or other Southern tomato grower should plant Moore's New Early Royal Pink Tomato. It matures enormous crops of No. 1 fruits only a few days later than our Moore's King of the Earlies. Beautiful large, smooth, solid pink skinned fruit, which invariably sells above the market price. The texture is extra firm, thus making it a first-class long-distance shipper. It outclasses Livingston's Globe on every point, being one third larger, earlier, yielding 50 per cent, heavier crops and, unlike the former, will carry thousands of miles in perfect condition. Pkt. 10c., 3 for 25c., ½ oz. 30c., 1 oz. 50c., ½ lb. $1.50, lb. $5.00.

Moore's New Coreless. All markets requiring a bright, rich, red sort will be pleased with the Moore's New Coreless. In shape it is almost round, being of about the same diameter each way. The depression at the stem end has been almost eliminated, making it the most profitable variety for canning, owing to a very small amount of loss in material and labor. It is immensely productive, clusters of four to seven fruits are produced at six to eight inches apart along the stem when plants are trained to stakes. Tons per acre and cans per ton is all important. All of the fruits are of marketable size, and many of them are quite large, twelve to fifteen ounces. A grand, good slicing variety; the seed cells being surrounded by bright red, heavy, meaty and delicious flesh, which is slightly more acid than the Livingston's Globe. The strong outside and inner walls of flesh of the Moore's New Coreless render it a very firm fruit and one of the best for long distance handling and shipping, but it is entirely free from hard green core. Its color is that bright, rich red so desirable to packers of high grade goods, and more important than ever now, since the law for the use of coloring matter. Every canner, market gardener or lover of good tomatoes should plant this grand variety this year. Pkt. 10c., oz. 40c., ½ lb. $1.00, lb. $3.75.
MOORE'S WONDERFUL EARLY TOMATO

INTRODUCED BY US IN 1904

Most Valuable Large Second Early Red Tomato for the Market Gardener Ever Introduced

YIELDS 30 TONS PER ACRE

Since we introduced this most excellent variety it has brought joy, gladness, satisfaction, and hundreds of thousands of dollars to the homes of market gardeners and others who have purchased our seed from us. It ripens even when very few seeds, while the productivity is simply astounding, it having frequently produced 3½ bushels of beautiful ripe fruit per plant. It not only bears very large, but continues to bear ripe fruit until frost, and unlike most other varieties, the size is held up well until the last picking. It is no experiment, but is on a broad basis of firmly established merit. It is well adapted to all sections of the country. If you would have a “good thing,” don’t fail to plant it. It is of especial value to tomato growers in the State of Maine, New Hampshire, Vermont, New York, Michigan, Minnesota, Wisconsin, North and South Dakota, Idaho, and Washington, and all localities where the growing season is short, as it will withstand more frost and mature beautiful large fruit early where no one else succeeds. It is singularly well adapted to growing in the Dominion of Canada, as well as throughout the United States, and every market gardener, no matter where located, will find it a sure money maker. The meat is unusually firm, sweet, and bright red, and carries well from 8 to 10 days later than Moore's Supreme Early Selected seed. Pkt. 10c., 3 for 25c., oz. 40c., ½ lb. $1.00, 1 lb. $3.75.

MOORE’S SUPREME EARLY

A Marvelous New Tomato in a Class All by Itself

In introducing this most wonderful early and valuable variety to the tomato-growing public, our Mr. Moore has given it the name of Supreme, for the reason that it embodies all the desirable qualities produced in early tomatoes “up to date.” It possesses the highest, greatest and most excellent qualities yet attained in early tomatoes, to the same degree. Plant it and you will agree with us. It is a beautiful large size, very early, red skinned variety, and as such is supreme in earliness, yield, beauty and fine quality, and what is still more valuable, it commands outside prices on any market. Our Moore's Supreme Early is miles ahead of any other. It is not excelled for market or home garden. It is the tomato for everybody. The plant is full fruit, with few leaves, and of compact habit. It is no uncommon thing to pick beautiful large solid, ripe fruit sixty days from setting; it is also very juicy. No tomato grower should miss planting liberally of this notable new early variety. Pkt. 10c., 3 pks. 25c., 5 pks. 50c., oz. 40c., ½ lb. $1.25, 1 lb. $4.00. It has come to stay.

MOORE’S NEW IMPROVED GLOBE

Seed Grown From Blight Proof Stock

Color a fine glossy rose, tinged with purple, Very early. The fruit is of a much larger size than the Livingstone Globe, which is a decided advantage. Enormously productive; no fruit too small for market. It has already become a big leader with many prominent and successful tomato growers in all parts of the country. It has never shown any tendency to blight with us. A fine shipper. Being smooth and of large size, it always brings fancy prices and will invariably sell for double that of Orie's Pink and twice that of Earlina, Early, Acme, Freedom, and other old sorts. Pkt. 10c., 3 for 25c., oz. 30c., ½ lb. 85c., 1 lb. $3.50.

MOORE’S NEW GOLDFINDER

“Does Not Seal Scald Nor Blight”

A new tomato with many desirable qualities and quite distinct from all other sorts. It is distinct in color, size, shape and color of fruit, the foliage being dense and of a dark green color. The fruit is of a pleasing shade of red, medium early and is set well up and borne thickly on the stem. It is round shaped, and tolerably resistant to “scalding, sun cracks,” etc. David Myers, Esq., Northfield, N. J., writes:—Your Moore’s Goldfinder Tomato pleased me mightily. Not a single tomato is unsound, while I lost one-half my Earlinas and Paragons from this cause. I averaged twenty cents more per basket for them than either Paragon or Stone. The yield astonished me. The branches were stiff with fruit. Not a single plant blighted. Pkt. 10c., 3 pks. 25c., oz. 30c., ½ lb. $1.00, 1 lb. $3.50.

HORNER’S EXTRA EARLY Prolific

An extra early red variety, quite smooth and solid. Its name indicates, it is extremely prolific. It originated with Mr. J. W. Horner, a large and very successful tomato grower, Miami, Fla., also of Miami, Fla., where hundreds of acres of this highly prized variety are successfully grown every season for northern markets. We have greatly improved this variety in size, solidity and smoothness, and in this respect our strain is superior to that sent out by the originator. This variety has netted Mr. Horner at the rate of $8.000.00 per acre. Pkt. 10c., 3 pks. 25c., oz. 30c., ½ lb. $1.00, 1 lb. $3.50.
Moore's Wonderful Tomatoes

Are Worth Many Millions of Dollars to Tomato Growers

MOORE'S Big Victor

EXTRA EARLY

"There's Big Money in it for Early Tomato Growers."

Introduced by us in 1905

We have a big reputation for growing good tomato seed, and for having the best varieties: A word to the wise—MOORE'S BIG VICTOR EXTRA EARLY TOMATO is brand new and distinct variety never before offered to the public, and was produced at great cost. This valuable market variety was developed from chance seed found growing in a field of our Moore's King of the Early. It is the earliest large-fruit red variety, and the largest. Extra early red variety ever produced. Its yield is enormous, every vine bearing a great mass of large-sized red fruit of the stem-setting type. Single clusters of 50 to 60 tomatoes are not uncommon. It is truly a wonderfully productive sort. It invariably fetches the highest market price. This wonderful variety is actually earlier and larger than our Moore's King of the Early, and fully as smooth—but as a large fruit grower remarked to us—gives me earliness and large size, and the tomato will sell even if it be not smooth. He was right. Every tomato grower should plant it. Our word for it—he will miss many dollars if he don't. Pkt. 10c., 3 pkts. 25c., oz. 50c., 1 lb. $1.00, lb. $4.00.

MOORE'S NEW RED GLOBE

This is probably the Greatest Novelty in Tomatoes ever Introduced

Said by all who have seen it to be the most perfect ever a shaped canning variety ever produced. Large size, globe shaped, full at stem end. Bright red, a strong grower and big cropper. Yes, Moore's New Red Globe Tomato is a great novelty. It is a great novelty in shape, a great novelty in yield, a great novelty in color, a great novelty in quality, a great novelty in growth—indeed it is a highly valuable novelty! and all who grow tomatoes should become closely associated with it. Only by planting large crops of it. It ripens immediately after Moore's New Wonderful and Moore's New Early Royal. The shape (see illustration) is ideal. It is a large main crop, rich bright red variety, highly suitable for canning, home markets, home gardens, and long distance shipping. Fruits solid, coarsest and almost seedless. Every amateur, market gardener, or canner should plant it. Every fruit is marketable. We sincerely hope you will not miss at least some of this valuable novelty. The disease at the stem end has been almost eliminated, making it the most profitable variety for canning, owing to a very small amount of waste. It is immensely productive; clusters of four to seven fruits are produced at six to eight inches apart along the stem. All of the fruits are of marketable size, and many of them are quite large, twelve to fifteen ounces. Always free from green core; ripens all over and through and right up under the stem, all at once. A grand good slicing variety: the seed cells being surrounded by bright, glossy red, heavy, meaty and delicious flesh. The strong outside and inner walls of flesh of the Moore's New Red Globe render it a very firm fruit and one of the best for long distance hauling or shipping. Pkt. 15c., 3 pkts. 25c., oz. 45c., ½ lb. $1.25, lb. $4.50.

MOORE'S NEW RED GLOBE - The above nine varieties, Pkt. 10c., oz. 30c., ½ lb. 85c., lb. $3.00.

Remember, the Main Thing in Making a Good Crop of Tomatoes is to Get Your Seed from Us. Buy the Best Purple Peach. This fine tomato resembles some peaches so closely in size, shape and general appearance that at a short distance away it is frequently taken for a peach. It seems to have the real bloom or fuzz which peaches have, except for purple, blended with orange-amber; very productive, comes early, lasts until frosts, and never rots. Delicate flavor. Skin thin, and peals off like that of a peach. A very ornamental variety. Pkt. 5c., oz. 25c., ¼ lb. 80c.
Moore's Triumph Tomato

The Greatest Second Early and Late Tomato ever offered to the American tomato grower. Planted last fall by over 6,000 of the best gardeners and shippers, who all unanimously endorse it as the best ever introduced.

Our illustration gives a very correct idea of the size and shape of this valuable new variety. We introduced this grand tomato to our gardening friends fifteen years ago, and since then scores of seedsmen have tried without success to offer one as good. Words cannot adequately describe its many admirable qualities for the market gardener, shippers, or private grower. We can truly say, however, that it is the finest medium early or late tomato ever introduced, a truly remarkable, handsome, very large, solid, smooth, bright, glossy red variety of the finest quality, ripens clear to the stem; wonderfully productive and size crops, does not crack, sells on sight. Its large size might lead some to believe that its fruits are few in number, yet the truth is, it is even more prolific in fruiting than any of the standard sorts now in cultivation. It is unquestionably the largest known. The tomatoes are borne in immense clusters of four to eight fruits, and occasionally ten large fruits have been found in a single cluster. In solubility and meaty quality it has no equal, while in lascivious quality it surpasses it. While it is an excellent sort for medium early, it is the best in the world for a late crop. As a carrier it "holds up" perfect condition longer than any other large red sort. The large size, beautiful color, productivity and solubility are maintained throughout the season until killed by frost. Every grower should grow it for his home market. Pkt. 10c., ½ oz. 30c., oz. 35c.; lb. $1.00, lb. $3.50.

Moore's Old Blue Stemmed
"Duke of York"

Of Special Value to Florida Growers and all Long Distance Shippers

Introduced by us. One of the grandest tomatoes recently introduced. Color rich glossy scarlet, similar to Moore's Royal Early Pink, splendid cropper, somewhat globular in shape, flesh very firm, large size, fine flavor. A leading feature of this superb variety is that it ripens its fruit more uniformly together than any known known. Previously clusters, averaging eight and ten large eveny-formed clusters each, makes it con- tinuously handsome. Ripens evenly to the stem, is a strong, healthy grower, not subject to rust or blight, is an enormous cropper, and produces until the vines are killed by frost, holding its size exceedingly well until last picking. Quality the very best, very solid and meaty. It is in every way a desirable variety for market gardeners, as its beautiful appearance always insures an extra price. As a long distance shippers it stands foremost of all other sorts. The walls of the fruit are unusually thick and dense, the center of the fruit is so globular in shape and heavy. It "stands up" well after arrival, it is a great favorite with thousands of growers in Texas, Florida, Porto Rico, Cuba, Isle of Pines and the Bahamas Islands. We are headquarters for selected seed of this important variety. An excellent sort for late summer and fall. Plants should be set out earlier than other late sorts. Pkt. 10c., 3 for 25c., oz. 40c., ½ lb. $1.00, lb. $4.00.

Moore's New Extra Early Giant Fruited Acme

The Handsomest and Earliest Type of Acme Tomato

Positively the earliest and largest Acme tomato ever introduced. Extremely valuable to market gardeners and shippers. Just what you have long sought—a large fruited, early, smooth, solid tomato with a pink or purple skin. Herefore all pink skinned tomatoes, such as the Acme, Dwarf Champion, Beauty, Imperial and Advance, have been too small in size to make them salable or profitable for the market gardener or shipper to grow. By repeated crossing and skillful selection we have produced our New Early Giant Fruited Acme which is many days earlier, much larger and vastly more productive than its old prototype, on account of its beautiful appearance and fine quality, sells more readily and for a higher price than any similar sort. This variety is pre-eminently the one to grow, for it possesses all the qualities that go to make up a perfect tomato, viz., roundness, large size, quality, yield, appearance, solidity, fruit, "beefy, meaty," thick, solid and almost seedless. Now, what more could you wish? We predict an enormous demand for our Early Giant Fruited Acme, when its many good qualities once become known. It is adapted to all sections of the United States, and more particularly to those who ship long distances. We advise every one to plant it. Pkt. 10c., 3 pkts. 30c., oz. 30c., ½ lb. 85c., lb. $3.00.

Moore's Early Giant Acme

Greatly reduced in size.
SELECTED NEW STONE. [Our strain of this variety has obtained the highest recommendation from gardeners everywhere. Its solidity and carrying qualities are remarkable. Its color is a desirable red. Seed saved from finest specimens only.] Pkt. 10c., oz. 35c., 3 lb. 75c., lb. $2.50.

LIVINGSTON'S BEAUTY. Early, large, smooth, solid, and excellent in quality. Color a very glossy crimson, with a tinge of purple. Pkt. 10c., oz. 35c., 3 lb. 60c., lb. $2.00.

SELECTED EARLY PARAGON. Flesh solid, well covered and flavored. Ripes between the early and late varieties. Color of skin glossy deep red. Very choice. Pkt. 10c., oz. 35c., 3 lb. $2.25.

BUCKEYE STATE. Color somewhat darker than Beauty. Matures about the same time as our Moore’s Triumph. Good shipper, but not as productive. Pkt. 10c., oz. 35c., 3 lb. 90c., lb. $3.00.

GREATER BALTIMORE. (Improved.) A large late red sort. Pkt. 10c., oz. 35c., 3 lb. $1.00, lb. $3.00.

THE TRUCKER'S FAVORITE. Color purplish red; very solid, firm flesh, heavy yielder. Pkt. 10c., oz. 35c., 3 lb. 75c., lb. $2.50.

JAPANESE TREE TOMATO

PLANTS grow stiff and upright, producing large, plump, red, solid fruits, very smooth and symmetrical in shape, ripening cheapest on the bush. Pkt. 10c., oz. 35c., 3 lb. 75c., lb. $2.50.

FORCING or GREENHOUSE TOMATOES

We make a special study of these and find the following to give the best satisfaction. Those who force tomatoes under glass can place fullest dependence on our varieties as the finest grown. All of our varieties have required many years of intelligent selection and crossing to produce the fruit which we are now offering. Those who own greenhouses and have the facilities to produce the finest fruit will find the following to be just what they are looking for. Pkt. 30c., 3 oz. 35c., 1 lb. 75c., lb. $2.50.

MOORE'S EARLIEST OF ALL. Unquestionably the earliest red forcing Tomato in cultivation; fruit smooth, of medium size and very productive. Pkt. 10c., oz. 35c., 3 oz. 75c., lb. $1.50.

SUTTON'S PERFECTION. A superb Tomato, combining great productiveness with excellence of form, high quality, and large size. Free from any heavy yield and perfectly smooth; color rich bright crimson; flesh solid, almost free from seeds, and of an exceptionally pleasant flavor. One of the finest Tomatoes for exhibition and excellent for general indoor cultivation. In favorable seasons enormous crops may be grown out of doors. Pkt. 25c., 3 oz. 60c., oz. 75c.

BLUSHING BEAUTY. A most excellent winter tomato, of medium size, rich glossy pink color, and heavy session. A truly superb variety, Pkt. 25c., oz. 45c., 3 oz. 60c., oz. 75c.

HURST'S COMPACT. Pink, very smooth, solid, fruit produced in clusters, few seeds, free from disease. A splendid sort. Pkt. 30c., 3 oz. 50c., oz. 75c.

LORILLARD. Greenhouse grown seed, a medium size red, and very productive variety. Pkt. 30c., 3 oz. 50c., oz. 75c.

FORCING GOLDFINDER. Beautiful and productive, glossy red, free from seeds, and of medium size, very solid, few seeds. Pkt. 20c., oz. 40c.; oz. 60c., oz. 75c.

MOORE'S SURPRISE. (New.) A most wonderful and valuable variety. Fruit red, small, solid, and produced in wonderful profusion. Habitat of vine open. Pkt. 50c.

JOHNSON'S COMET. Very early, fine quality, solid, few seed, fruit red, smooth, heavy yielder. Imported seed. Pkt. 25c., 5 pks. 10c.

MOORE'S BIG CROP. This variety has proved a marvelous bearer and extremely early settler. There is no tomato which should become so widely grown as this under glass for home use or market; it is bound to give the utmost satisfaction to all. It is of perfect shape, of a deep rich crimson color. The skin is firm with a bloom and the fruitfulness of the plant perfectly astonishing. Pkt. 50c., large packet $1.00.
TURNIP

Perfection Red Top Market White Globe. Private market gardener’s stock. It is the sweetest, tenderest, handsomely-looking purple top white globe turnip we ever grow. Our illustration, drawn from nature, shows its smooth, regular forms; best rich, purple-colored top. This early globe variety grown and the most profitable market sort. Of large size and very rapid growth; fine juicy quality. It keeps well. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 50c., 5 lb. $1.40.

PURPLE TOP FLAT. Strip leaved. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 35c., 10 lb. $3.00.

PURPLE TOP WHITE GLOBE. Imported seed. Good stock. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 40c., 10 lb. $8.50.

M. & S. Tetlow Golden. Very popular as a market sort. Of medium size, short top and very rapid growth. Globe-shaped bulbs, with deep yellow flesh, very tender, stringless and of delicious flavor. The top of the table is a beautiful golden-green, while the middle and lower part is of a beautiful rich golden-yellow color. An excellent keeper, retains its quality well. Excellent for early and winter sort. Every turnip grower should plant it. Sells on sight. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c.

YELL0W, or AMBER GLOBE. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 45c., 10 lb. $1.00.

NORFOLK WHITE GLOBE. A late variety for feeding stock. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 40c.

AMERICAN GREEN TOP ABERDEEN. Very productive, good table variety. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 60c.

EXTRA EARLY PURPLE TOP MILAN. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 45c.

EXTRA EARLY WHITE MILAN. Pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 70c.

IVORY BALL. Good table sort. Very early. Pkt. 5c., oz. 10c., ¼ lb. 35c., lb. $1.25.

GOLDEN BALL, OR ORANGE JELLY. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 40c.

COW HORN TURNIP. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 40c., 10 lb. $3.00.

EARLY WHITE FLAME DUTCH. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 35c., 10 lb. $3.50.

SOUTHERN SEVEN TOP. Used only for greens. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 40c.

JERSEY WINTER (Half Long Vertus). This variety is grown in large quantities for the Philadelphia markets and is very popular. Purplish red top, flesh firm, white, sweet and of most excellent quality, the best winter keeper sort of all. A most excellent sort for all. It resists cold so well that it can be allowed to remain in the open ground a great part of the winter. Fine sort for home use and very productive. Pkt. 5c., oz. 10c., ¼ lb. 40c., lb. $1.25.

Carter’s Model Purple Top Yellow Ruta Baga. A Perfect Turnip. No other sort equal to it in point of tenderness, sweetness, juiciness or nutritiousness. Our choicest stock grows entirely without neck and very small top and tap-root. Very quick growth, good globular shape, excellent table quality and best market variety. It is the most productive in type and entirely distinct from ordinary varieties which are used mainly for feeding stock. It has short leaves, grows clean and smooth as a turnip. The flesh is remarkably fine grain and delicious in flavor. Will not change color unless blanched. We pronouce this the best Ruta Baga grown. We most earnestly commend this fine sort to all who grow for market, as it will bring much higher prices than any other sort. No market gardener should fail to plant any other kind. All who plant it praise it. Pkt. 5c., oz. 10c., ¼ lb. 50c., lb. $1.00, 2 lb. $1.90.

LONG ISLAND PURPLE TOP YELLOW RUTA BAGA. Oz. 10c., ¼ lb. 15c., lb. 45c.

MIES’ BEAUTY BUTA BAGA. Good market sort. Pkt. 5c., oz. 10c., ¼ lb. 30c., lb. 75c.

IMPROVED PURPLE TOP RUTA BAGA. Oz. 10c., ¼ lb. 15c., lb. 35c.

Danish Golden Milk Turnip. At the present prices of grain for feeding stock the profits of dairying and stock-fattening is very much reduced, and the feeding of roots alone offers the solution of profitably continuing masting and fattening. The owner of the farm realizes the immense value of roots of various kinds for feeding his dairy, as well as all other stock he may have, the sooner will he experience the degree of prosperity that has so long waited for. It is the growing and feeding of root crops alone that makes the English, Danish and other European dairy farmers almost as much as the dairyman, and the farmer can be made to pay big profits if a judicious system of root feeding be practiced. Our Danish Golden Milk Turnip, which we have brought from Denmark, is the best of this class, and it is the Turnip particularly grown in that country for stock-feeding purposes; it is unusually rich in food value and will increase the flow of milk of the richest quality in a manner that will astonish the most skeptical. The roots are of immense size, of a rich golden yellow color, very solid and nutritious, of rapid growth, and a perfect keeper. In point of productiveness it is only necessary for us to say that seventy tons have been produced on one acre of ground, while from thirty to forty tons is an uncommon yield. Can be sown from April to July. broadcast or in drills; we recommend the latter. We advise several sowings made during the period above-mentioned, the last for late fall and winter use. It is also a good sort for table use. Of course it should be fed in conjunction with other feed, and in this way it will enable any dairyman to reduce his feed bills twenty-five per cent, and will increase his milk supply from twenty to thirty per cent. A trial will convince. Sow two pounds per acre. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 60c.

HERBS

BASIL, SWEET. Pkt. 5c., oz. 20c., ¼ lb. 40c., lb. $1.50.

DILL. American. Much superior to the imported. Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 70c.

FENNEL, SWEET. Pkt. 5c., oz. 10c., ¼ lb. 35c.

LAVENDER. Pkt. 5c., oz. 10c., ¼ lb. 50c., lb. $1.25.

Marjoram. Sweet. American. The strongest and most lasting herb for market. Highly esteemed for seasoning, both in summer and also dried for winter use. Pkt. 10c., oz. 40c., ½ lb. $1.25, 1 lb. $4.50.

SAGE. Pkt. 5c., oz. 20c., ¼ lb. 50c., lb. $1.50.

SUMMER SAVORY. Oz. 10c., ¼ lb. 30c., lb. $1.00.

Thyme. American. Of upright habit; broad-leaved. Very pro-ductive, highly flavored and hardy. Best for market purposes. Pkt. 10c., oz. 40c., ½ lb. $1.25, 1 lb. $2.75.

TARRAGON. Strong plants, 25c.; by mail, 30c.
Valuable Books Each

**Southern Gardener's Practical Manual.** The object of this work is to furnish a reliable, practical guide to those who desire to avail themselves of the wonderful facilities afforded by our sunny Southern soil for producing the finest fruits and vegetables with fresh vegetables from the kitchen garden every day in the year. Illustrated. 224 pages. Cloth. $1.00.

**The Forcing Book.** In this work the author has compiled in handy form the entire list of all the available information on the subject of forcing vegetables under glass. In addition to this, the experience of many practical growers in different localities is included. Illustrated. 286 pages. Cloth. $1.25.

**Mushrooms—How to Grow Them.** A practical treatise on mushroom culture for profit and pleasure. This is an eminently practical book written by a practical man who is a specialist in the cultivation of mushrooms, and one of the most successful growers in the world. It is told in detail, minutely and plainly, as only a practical man actively engaged in mushroom-growing can handle it. Illustrated. 169 pages. Cloth. $1.00.

**Pear Culture for Profit.** Teaching how to raise pears intelligently and with the best results, the best varieties to select, the manner of planting, the care of the plants, the care of the fruit, forcing, grafting and utilizing the ground before the trees come into bearing, and finally, of gathering and packing for market. Illustrated. 136 pages. Cloth. $1.00.

**The Practical Fruit Grower.** Illustrated. Cloth. $1.50.

**The Business of Dairying.** The author of this practical little book is to be congratulated on the successful manner in which he has treated so important a subject. It has been prepared for the use of dairy students who desire to know how to make dairying a business. Its purpose is to present in a clear and concise manner the important principles of dairying, and to help the dairymen to reap greater profits. This book meets the needs of the average dairy farmer and if carefully followed will lead to success in dairy work. It is a complete and an excellent textbook for college students and especially for short course classes. Illustrated. 288 pages. Cloth. $1.50.

**Commercial Violet Culture.** A comprehensive and complete treatise on the commercial culture, growing and marketing of violets for profit. Yet it contains no small amount of information of as much interest to the amateur as to the cultivated grower. Illustrated. Cloth. $1.50.

**Irrigation for the Farm, Garden and Orchard.** This book is offered to those American farmers and other cultivators of the soil who, from painful experience, can readily appreciate the losses which result from dry periods in agricultural periods. Illustrated. 276 pages. Cloth. $1.00.

**Ginseng.** Its cultivation, harvesting, marketing and market value. A complete working treatise for the grower of ginseng. A work that will attract much general attention among farmers and gardeners. It discusses in a practical way how to begin with either seed or roots, soil, climate and location, preparation, planting, harvesting, and market value of the beds, artificial propagation, manures, enemies, selection for market and for improvement, preparation for sale and the profits that may be expected. Illustrated. 159 pages. Cloth. $1.00.

**Tobacco Leaf—Its Culture and Cure, Marketing and Manufacture.** A practical handbook on the most approved methods in growing, curing, harvesting and packing tobacco, with an account of the operations in every department of manufacture. Over 500 pages, with 150 original, handsome and practical illustrations, embellish this for market and for improvement, preparation for sale and the profits that may be expected. Illustrated. 159 pages. Cloth. $1.00.

**How to Make the Garden Pay.** It is an entirely new and original work and treatise on gardening, for pleasure, health, profit and morality; market gardening, farm kitchen gardening, hints in marketing, manure and fire hire, and the management of coldframes, hotbeds, vegetable and forcing houses, drainage, irrigation, insects and other foes, seed and seed sowing, rotation of crops, thinning and transplanting, monthly memorandum etc. Illustrated. 372 pages. Cloth. $1.00.

**Spraying Crops.** A complete treatise on the principles and practice of the application of liquids and powders to plants for destroying insects and fungi. Illustrated. 180 pages. 5.7 inches. Cloth. $0.50.

**KNOWLEDGE IS POWER**

By Mail, Postpaid, to any Post Office in the United States at the Price Quoted

**Celery Culture.** By W. B. Beattie. It contains many illustrations giving a clear conception of the practical side of celery culture. The work is complete in every detail, from sowing a few seeds in a small box to the marketing of celery in carload lots. Fully illustrated. 130 pages. Cloth. $0.50.

**New Egg Farm.** A practical, reliable manual upon producing clean and profitable poultry and eggs for use and sale, with directions for either by itself or connected with other branches of agriculture. It tells all about how to feed and manage, how to breed and select the right fowls for your particular case, etc. 146 original illustrations. 301 pages. Cloth. $1.00.

**Asparagus—Its Culture for Home Use and Market.** In successive chapters the author treats exhaustively on the subject of the cultivation of asparagus, selection and preparation of the soil, planting, cultivation, manuring, cutting, bunching, packaging, marketing, canning and drying, insect enemies, fungous diseases and every requirement to successful asparagus culture, special emphasis being given to the raising, handling and marketing of the crop. As no garden is complete without an asparagus bed, so no gardener's or farmer's library is complete without this interesting and instructive book. Handsomely illustrated. 174 pages. Cloth. $1.50.

**The Poultryman's Handbook.** A complete manual on feeding, housing, caring and keeping pure cider. Illustrated. 120 pages. Cloth. $1.00.

**Gardening for Profit.** A guide to the successful culture of the market and family garden. Profusely illustrated. Entirely rewritten and greatly enlarged. Illustrated. 376 pages. Cloth. $1.50.

**Greenhouse Construction.** A complete manual on the building, heating, ventilating and arrangement of greenhouses, and the construction of hotbeds, frames and plant pits. The lucid descriptions of each topic, and the 118 diagrams and 114 instructive illustrations, enable the amateur and professional gardener or florist, and enable the beginner to proceed without fear of loss from errors of construction or arrangement. Many of the illustrations are full-size engravings from photographs of actual greenhouses and their arrangements. A book which is the only work published in America on greenhouse construction by practical American methods, and for the actual needs of American horticulturists. 215 pages. Cloth. $1.50.

**Greenhouse Management.** The Carnation, The Chrysanthemeum; The Violet, Bulbs and their Culture; Tuberous Begonias; Orchid Culture; Azaleas; Calceolaria, Cineraria and Primulas; Fenn, Smilax and Asparagus; Palms, Pandanums and Aracnida; Dahlia's and Other Cut Flowers; Geraniums and Primulas; Tomatoes and Melons; Mushroom Culture; Asparagus and Rhubarb; Radishes, Carrots, Beets and Beans; Grape Growing Under Glass; Strawberry Growing Under Glass; Fruit Trees Under Glass; Management of House Plants; The Growing of Bedding Plants; Propagation of Plants by Seeds and Cuttings; Propagation by Layering, Grafting and Budding; Insects of the Greenhouse; Diseases of Greenhouse Plants; Insecticides and their Preparation; Fungicides, the Use of Gas and Water and Watering; Fuel—Coal, Oil and Gas. 128 original and practical illustrations. 400 pages. Cloth. $1.50.

**The New Rhubarb Culture.** A complete guide to dark forking and field culture. Part I—By J. E. Morse, the well-known Michigan trucker and originator of the now famous and extremely profitable new methods of dark forking and field culture. Part II—Other methods practiced by the most experienced market gardeners, green-house men and experimenters in all parts of America. Compiled by G. B. Fiske. Illustrated. 350 pages. Cloth. $1.50.

**The Nursery Book.** A complete handbook of propagation and pollination of plants. It tells, plainly and briefly, what every one who sows a seed, makes a cutting, sets a graft, or crosses a flower wants to know, and is compiled in a methodical and orderly fashion as well as in a methodical manner. The cuts number almost 100, and are made especially for it, direct from nature. The book treats of all kinds of cultivated plants, fruits, vegetables, greenhouse plants, hardy herbs, ornamental trees and shrubs, etc. Illustrated. 357 pages. Cloth. $1.50.
Sowing Farrowing Hale's it thus There

EXCELSIOR variety

Hale's Early Prolific Soja Beans

The Great Soil Improver, Makes Richer Feed Than Other Crops, Makes Poor LAND Rich, Makes Rich Land Richer, Makes Good Land Moi-st Produce Very, at the Rate of 3 bushels per acre for Fattening all Kinds of Stock, Enriching the Soil, Even When the Crop is Cut Off

HALE'S EARLY PROLIFIC SOJA BEAN.

This Soja Bean is called by many an agricultural wonder on account of its great proficiencies; its wonderful yield of growth, its adaptability to all climates and soils and its enormous yield of green forage. Its chief value, however, lies in its great fertilizing qualities. The most eminent authorities on farm fertilizers pronounce it a better soil enricher than the average fertilizer drawn from the barn yard. It has been demonstrated beyond dispute that it requires to enrich a worn-out piece of land by the use of barnyard fertilizer than by sowing plenty of Hale's Prolific Early Soja Beans and plowing them under. Two crops a year can easily be raised and plowed under on the same piece of land by sowing quite early in the spring as soon as all danger of frost is past. Broadest rate of growth is made when the beans are plowed under when 30 inches high. The second crop at the same rate. The second crop can be plowed under, cut for food or grazed. The next season the land will be a money-maker. Hale's Early Prolific Soja Bean is superior to any other kind of soja bean or cow pea as a soil enricher. Its great fertilizing power is due to its ability to draw nitrogenous nourishment heavily from the air and conveying the chemicals thus gathered to the soil, thus enriching it to a degree that is most remarkable. In our Soja Bean we have a food and fertilizer combined. If not desired as a fertilizer it makes a highly nutritious food for cattle. As it draws great quantities of nitrogen from the atmosphere it thus ranks among the best fertilizers. The vines, properly cured, are a most desirable fodder for all kinds of cattle. The ripe seed contains nearly 20 per cent. of digestible protein, and is richer in fat and protein than the best clover hay. If desired, the plants can be harvested for the grain and the plants plowed under to fertilize the land. The seed can be grown for food and fed to cattle. The seeds are the richest known vegetable substance, and when

GROW RICH. Make Your Own Fertilizer by Planting Hale's Early Prolific Soja Beans.

ground and fed to cattle give a milk richer and better than cotton seed or ordinary hay. The leaves and stalks are excellent nurse stock for winter forage. The leaves and stalks are excellent nurse stock for winter forage. The leaves and stalks are excellent nurse stock for winter forage. The leaves and stalks are excellent nurse stock for winter forage. The leaves and stalks are excellent nurse stock for winter forage.

We have never grown a crop that cleans land better than Hale's Soja Beans. It is almost impossible for any weeds to grow or thrive where a crop of Hale's Early Prolific Soja Beans has gone. The weeds are used as wire This makes the field clean and the land is ready for another crop. The beans are a money-maker. Hale's Early Prolific Soja Beans are practically the only crop that furnishes a balanced ration in one crop. Our farmers report that they do not find it necessary to feed corn, cotton seed meal, or any oil foods whatever when feeding Hale's Early Prolific Soja Beans on a dairy farm.
MOORE'S FAMOUS BLACK NORWAY OATS

Imported Direct from Bergen, Norway

Few farmers are aware of the fact that the best black oats in the world is produced among the Fjords of Norway facing the Arctic Ocean. It is here that the black oat is cultivated to its greatest perfection as to yield, weight, quality and freedom from disease. Our stock seed was obtained direct from Mr. Hanson Hjort, who has devoted two decades to developing his favorite strain of "Hjort's Flek Brunn." Mr. Hjort has, on carefully prepared land, raised as high as 31½ bushels (by weight) per acre of his truly wonderful oats. Our own and other tests the past season showed a yield of over 200 bushels per acre. Any farmer can secure the same enormous yield under the same conditions. An acre of ordinary land on your farm that will only produce 85 bushels of common oats will readily yield 100 bushels of our Famous Black Norway Oats.

We do not feel backward in pushing this Famous Black Norway Oats, because we have seen such marvelous yields of this variety the past summer that we know any farmer can make lots of money scowing it. There is nothing like it in earliness in any other kind of black oats that we know of. Our crop was ripe and stacked before any of our neighbors'. The wonderful yield of this remarkable oats, as well as its resistance to the elements, is very largely due to its wonderful stolting habits. We have seen single kernels produce 102 strong, healthy stalks. Every farmer knows that when an oat stolls, its yield is increased in proportion. Take an oat that does not stoll and it cannot produce as heavily.

OTHER REASONS WHY YOU SHOULD PLANT IT

First—Drought Proof. It matures so early that the crop can be gathered before dry summer weather sets in. No sort we ever heard of so completely and thoroughly withstands dry weather.

Second—Feeding Quality. No variety equals it in superior quality. All kinds of stock prefer eating it to any other.

Third—Profit that Interests You. It makes farming profitable in every state and territory in the United States. Your neighbors will want it if they see or hear of it. They will pay you an extra price for it.

Fourth—The Last Forty Bushels. It is the last 40 bushels per acre that makes farming profitable. If the common sorts yield 50 bushels per acre, and this gave you 70 bushels, the last 40 bushels would be the profit; but if this gave you 150 bushels, it is very easy to figure out great profits on 100 acres or more. Try it and convince yourself.

Fifth—Many More Reasons. It comes from a country where rust does not exist. The low price we sell it for ought to induce every farmer to plant it. Its wonderful stiff straw holds it up like a wall where the wind and rain beat other sorts flat. Yield, which is enormous, some say 70, 120, 150, and others 200 bushels per acre.

IF WE HAD MORE ROOM WE WOULD TELL YOU MORE

Price of Moore's Famous Black Norway Oats

Large pkgs. 15c., lb. 40c., postpaid; by freight or express, pk. 75c., ½ bu. $1.00, bu. $1.75, 3½ bu. $3.75, 5 bu. $7.25, 10 bu. $14.00, 20 bu. $37.00, 25 bu. $52.00.

215 BUSHELS PER ACRE

Solomon Cutler, Genesee Co., N. Y., says: "Your Famous Black Norway Oats was a sight to behold, standing fully four feet high, a solid mass of grain. The straw was so stiff that not a stem lodged. It yielded at the rate of 215 bushels of 62 pounds per acre. I congratulate you warmly upon your remarkable success in producing farm seeds of such superlative merit."

EVERY MARKET GARDENER OR FARMER

Should grow his own horse feed. The best authorities say there is no grain food equal to Black Norway Oats for feeding horses, cows, sheep or hogs, either in the green state or dry grain. It possesses all the food elements necessary to keep the animal in perfect physical condition and greatly assists in warding off all manner of diseases. Now 8½ bushels per acre. It is the easiest, cheapest and best feed you can grow. It cleans the soil.

Send for a copy of our Seed Buyer's Guide for 1910—a postal will bring it.
It will Pay You Big to Change Your Seed Oats This Year

It will pay you to sell your common Oats and sow these improved varieties this year while the seed is so cheap. In our field the New Zealand Oats yielded about 100 bushels to the acre, and the Lincoln 90 bushels, while neighboring fields of other varieties under similar conditions yielded only 40 to 50 bushels. The increased yield on a few acres will cover entire cost of seed for your farm.

New Zealand Oats
Progressive farmers who have grown them pronounce them to be the most valuable Oats ever grown in America. It contains more new blood, hence more vigor and producing qualities than any other Oat we know of.

It Has Stood the Test of 12,750 farms, scattered all over America, in the remotest corners and obscurities of each state and territory—everywhere it did well, despite the most terrible season ever known.

This is absolutely the earliest Oat grown. Nothing like it in earliness that we know of. Our crop was ripe and cut and stacked eight days before other sorts were ripe, which stamps this variety as absolutely the earliest in existence. It means big money to the farmer. That's what the earliest Oats always bring in the market, and especially at the farm, for many farmers are short of Oats in the summer when this ripens.

It Withstands Drought. No sort that we have ever tested so thoroughly and completely withstand dry weather—yes, long continued hot droughts as New Zealand; the price of our New Zealand Oats is: 1 lb. 50c., 1 bu. $1.50. 25 bu. $3.25, 10 bu. $1.90; 20 bu. $3.00, sacks included. Indeed, it seems to be proof against every element of nature in the shape of weather, withstanding all and yielding heavily.

Strong Straw. Now, then, New Zealand Oats have wonderfully still straw, withstanding severe winds to a marked degree and coming forth after storms standing straight, erect—a pleasurable sight to behold. When other sorts lodge badly, this stands up like a strong stone wall.

Yield. This is simply enormous, some say from 150 to 200, yes, 200 bushels or more per acre, but we honestly believe that 150, yes up to 200 bushels or more can be grown per acre under careful cultivation; when specially planted it has yielded as high as 35 bushels per acre.

The color is a beautiful silvery white beautiful in the extreme, aids it to sell quickly and rapidly at an advanced price in almost every market on the globe. The color alone makes it a great seller.

No Oat exceeds this in excellent quality, and it has that advantage that it will make more and better oat meal than any other new Oat at the present day, while all horses will fight for it for food. All millers who have seen it pronounce it excellent in the extreme.

Now, then, here is an Oat that makes profitable farming absolutely certain in any state from Maine to California, and south to the Gulf and north through Canada. This Oat, if sown, will insure profitable farming. It will certainly yield from 20 to 100 bushels more per acre than any of the common varieties, which will ten times pay the cost of the seed.

The price of this Oat is ridiculously low, but that is the way we do when we have a good thing; we sell at a low price, so that all farmers can make money out of it.

The Last Forty Bushels. It is the last forty bushels per acre that makes farming profitable. If the common sorts yield 50 bushels per acre and this gave you 70 bushels, the last 40 bushels would be the profit; but if this gave you 150 bushels, it is very easy to figure out great profits on 100 acres or more. Try it and convince yourself.

GROW WONDERFUL ARABIAN CORN FOR Poultry

Can be planted and thrive anywhere in the United States, and is the cheapest poultry food known. Stalks grow four feet high and produce numerous heads of grain 12 to 15 inches long. The yield of grain is simply enormous, averaging about one pound when fully ripe. Plant same time as field corn. It is a wonderful egg producer and both farmer, besides it is a wonderful health promoter for all poultry and pigeons alike. Greedily. The leaves and stalks make excellent forage for cattle either green or dry. 5 pounds will plant an acre. Unaffected by drought or dry summer. Sow in 3 foot rows. Pkt. 10c., (lb. 35c., postpaid); by express, lb. 25c., 5 lbs. $1.00.
SMALL FRUITS

There is only one way possible to succeed in fruit growing, and that is to plant the right varieties. It does not matter how good your market is, or how well your soil is adapted to fruit, or how hard you work, you are bound to fail unless you have the right varieties that will produce the kind of fruit you want in paying quantities. We have gone over the long lists of varieties year after year, adding to and discarding until we have a list that cannot fail to do well. We have worked the produce out and we are sure we can help you. We have laid the foundation for success for hundreds of our customers. We want to lay the corner stone in the foundation work. We will help you in your career—fruit growing. You can succeed. We will help you—with advice, good plants and the right varieties. You may need help in getting started.

CRYSTAL WHITE. Berries of fine translucent white, of good size, sweet and pleasant. Canes prolific, but not entirely hardy. Should be planted near other sorts of fruit. Each 10c., doz. 75c., 100 $3.00.

DICKEL'S EARLY HARVEST. The earliest blackberry to ripen. Exceedingly hardy and of great merit. Fruit jet black, glossy, deliciously sweet and the flavor, size, tinge smaller than Rehner. Very profitable on account of extreme earliness and great productivity. Our plants are fine and true to name. Genuine stock is very scarce. Each 15c., doz.$1.00, 100 $8.00, 1,000 $25.00.

KENOYER, No. 1. A prodigious bearer of very showy fruit, of good color and size, ripens and is harvested much earlier than Early Harvest. This variety must be planted with an Early Harvest stock. Each 15c., doz. $1.00, 100 $8.00, 1,000 $30.00.

MERESEAU. A mammoth early-ripening variety, originated in northern New York. In quality it is exceedingly sweet, rich, melting and luscious. As a shipper it is unsurpassed, retaining firm without “bleeding” in hot weather. Each 10c., doz. 50c., 100 $3.00, 1,000 $25.00.

ELDORADO. Highly recommended by growers and experiment stations everywhere. It is an oblong berry of large size, fruiting in numerous pendulous large clusters, with few thorns. Color black, flesh deep crimson, flavor sweet and distinct, rich quality. One of the finest. Each 10c., doz. 50c., 100 $3.00, 1,000 $25.00.

RATHBUN. Large, an intense jet black. Very glossy, never turns red. Small seeds, extra fine quality, ripens early. Forms a compact bush four to five feet high. Has few thorns. Each 10c., doz. 75c., 100 $8.00, 1,000 $25.00.

WARD WONDER. Big glossy black fruit; rich, sweet, tender and melting. Averages 200 bushels per acre. Canes very hardy. Each 4 to 5 feet high. Agrim, profitable variety. Each 15c., doz. 50c., 100 $3.00, 1,000 $25.00.

BLOOMER'S FAVORITE. This variety has borne heavily for 15 years. Each 10c., doz. 50c., 100 $3.00, 1,000 $25.00.

WAUCHUSSETS, MINNEWASKI, ERIE, OLMER, EARLY KING, ANCIENT BRITTON and STONE'S HARDY, each 10c., doz. 50c., 100 $3.50, 1,000 $16.00.

KITTATINNY, LAWTON, WILSON, TAYLOR, SNYDER and WARD, each 10c., doz. 50c., 100 $2.00, 1,000 $14.00.

PRIMOS DEBBERRY. (New) Ten days earlier than Lucretia. Uniformly large, glossy black, finest quality, sweet and of unequaled excellence. Cannot be praised too highly. Quality and size uniform. Each 10c., doz. 50c., 100 $2.00, 1,000 $15.00.

LUCRETIA DEBBERRY. Doz. 30c., 100 $1.30, 1,000 $10.00.

CURRENTS

"PERFECTION." (A New Variety from New York). It has been awarded many valuable prizes and medals. Certainly approved by the very highest authorities and should be tested everywhere as there is big money in growing large currents.

The Color is a beautiful bright red. Size as large or larger than the Fay, the clusters averaging longer. The size of berry is well maintained to the end of the bunch. The "Perfection" has a long stem from point of attachment to the bush to the first berry, making it easy to pick without crushing any of the berries.

"Perfection" is a great bearer, resembling its parent, the White Grape; In this respect.

Quality. Rich, mild, sub-acid, plenty of pulp with few seeds. Ranks as one of the finest varieties of currants, having a color, shape, firmness, size, quality and size uniformity. Each 15c., doz. 75c., 100 $2.00, 1,000 $17.00.

WHITE GRAPE. The best white fruit, large and sweet, good grower and very heavy bearer. Each 15c., doz. $1.00, 100 $5.00.

BLACK NAPLES. The best black for all purposes; will stand most any climate; valued by some for jelly; it is very productive and hardy. Each 15c., doz. $1.00.

FAY'S PROLIFIC and NORTH STAR. Each 15c., doz. $1.00, 100 $5.00.

VERSAILLES, CHERRY, RED DUTCH and VICTORIA. Each 15c., doz. 50c., 100 $4.00.

MOORE'S NEW RED CROSS. Jacob Moore, the originator, says: "Red Cross clusters are long and have well-necked berries, double the size of Victoria, and far superior in quality to Cherry or Victoria. Nothing will compare in quality with Red Cross but White Dutch, which is so small. I have seen the fruit growing in such bushes as to hide the upper branches from view. It is later than Cherry. The plant makes twice the growth of Cherry and yields 2 or 3 times as much fruit. I recommend it with confidence. I consider Red Cross one of the best of the new currants." Each 15c., doz. 50c., 100 $7.00.

THE KENoyer. No. 1.

E. L. MOORE,

Wholesale Seedsmen

Philadelphia, U. S. A.
RASPBERRIES

(King's Haymaker. This valuable new raspberry is certainly the greatest acquisition of years in raspberries of its class. From actual figures Haymaker returned a net profit of over $800.00 per acre last year. This is the greatest return on money from this fruit that has ever been realized. It is dark purple, dark as Cardinal or Shaft, and much larger and firmer than either of those varieties, very sweet, hardy, shows an increase in size each year, and is excellent for either home or market. The originator has found it the most profitable berry ever raised for market and has never yet been able to supply the local demand. Recommended by experiment stations and leading Horticultural Societies everywhere. It certainly is a leader. Our stock is genuine. Each 15c., doz. 75c., 100 $1.50, 1,000 $25.00.

Moore's Ruby. Pronounced by thousands to be the best red berry to grow for profit. Color a beautiful bright red. Ripens with the earliest and continues picking a long season. Excellent for packing a long season. Excellent for packing a large fruit, good flavor, often sells for 25c. per quart. It stands shipping long distances better than any other. It has been grown commercially for 8 years and to-day stands at the head of all varieties in respectability, showing and profit. Each 15c., doz. 75c., 100 $1.50, by express.

New Brilliant. The berries are large and beautifully brilliant. It ripens with the earliest and continuing all at once, while the price is high. It carries its brilliancy to market and looks as fresh as when first picked. A great market variety. Every grower should have it. Each 15c., doz. $1.00, 100 $8.00,1,000 $30.00.

Golden Queen. The most profitable yellow berry grown. Doz. 75c., 100 $3.50.

The New Cardinal. This wonderful large red variety will grow ten feet high and bear in proportion. It is the wonder of the century, and will bear a complete crop the very first year. A variety of great merit. Each 10c., 2 for 50c., doz. 75c., 100 $3.50.

Loeden. Red, medium late; Eaton, red, long bearer; Eureka, purple cap; Gaul, T. A., Everbearing. Doz. 75c., 100 $3.50.

GREGG, CONRA TH, OHIO, KANSAS, SOUHEGAN, PALMER, EUREKA, CUBERT. 75c., 100 $7.00, 1,000 $18.00.

TURNER, HAWEL, MILLER, MARLBOROUGH, TOMPOZ. Doz. 75c., 100 $1.50, 1,000 $10.00.

Earhart New Everbearing. Actually bears continuously from June 1st until killed by frost in September. The canes are literally loaded with fruit in all stages from bloom to ripe fruit. Creates the greatest surprise when shown at fairs and horticultural societies. Has no equal as an ever-bearing variety. A great novelty and a very valuable one as well. Each 15c., doz. $1.00, 100 $8.50.

Davis' Cumberland. In hardiness and productiveness it is unequalled by any other variety. In size the any size is simply enormous, far surpassing any other sort. The berries run seven-eighths and fifteen-sixteens an inch in diameter, and are of such handsome appearance as to sell for 25c. to 5c. per quart; careful specimens give it a record of 22.00 per acre. It appears to be a leader. Each 15c., doz. $1.50.

Grape Vines. Strong No. 1 two-year-old healthy stock.

Concord, early, good size, black; Catawba, large late red; good wine variety; Delaware, small red, delicious, superior quality; Moore's Diamond, greenish white, large, fine quality, juicy; Marquette, red, excellent for cooking, large; Michigan, red, good quality, hardy; sweets and good; Rockington, white, large bunch, later than Niagara; Worden, blue, large, early, spicy flavor; Chambertin, red, excellent for wine, large; Ruby, red, good quality, hardy, medium berry; Campbell's Early, glossy black, early, good keeper, sweet and juicy, bunch and berry large; Brighten, red, large bunch and berry, quality fine. Price: Eaton and Campbell's Early, each 3c., doz. 75c.; all other varieties, each 15c., doz. $1.50. If by mail add 25c. per dozen.

Pearl

Extra Strong One-year-old Transplanted Stock. These must not be confused with cheap layer stock.

Of late years Gooseberries have proven to be the most profitable of all small fruits. Plant same as currants, in good, rich soil, give liberal dressing of manure every season; regularly water plants; the use of hellebore is essential for fruit set as leaves appear, and occasionally through the summer, with potassium sulphur, one ounce to a gallon of water; use hellebore to destroy weeds. Some authorities use hellebore. This is a very desirable American variety—a cross between Dixons' Pearl and Houghton and Industry. Dixons' Pearl was one of the large English varieties. It is a very hardy, entirely free from mildew, superior in size and flavor; also that it was a good cropper and fruit of very best quality. Of a rare native American (no English blood), it required time to get reports from other states where it was introduced. This in the many testimonials of this new berry from most of the leading horticulturists we have pleasure in reproducing this variety for small or extensive planting, the one which most occurs to us. High质量; our stock is genuine. Each 15c., doz. $1.50, 100 $10.00.

Houghton. Berries medium. Color, pale red: tender and good; plants make a spreading growth of rather slender wood; enormously productive. Each 15c., doz. $1.00, 100 $8.00.

Red Jacket. What the introducer says of it: "When we introduced this new gooseberry it was with entire confidence that it possessed the best foliage and was the most vigorous in growth of any gooseberry in America; also that it was a good cropper and fruit of very best quality. Although a pure native American (no English blood), it required time to get reports from other states where it was introduced. Next most important question was whether it would, in other localities, be afflicted with that curse mildew, which in America affects not only all English gooseberries, but all intermixed with English blood. We knew it was all right to ride in our state, but we were agreedly surprised to hear so much good from such a wide extent of territory." Our stock is genuine. Each 15c., doz. $1.50, 100 $10.00.
THOROUGHBRED MONEY MAKING STRAWBERRY PLANTS

The market never yet had a sufficient supply of the best strawberries. Little berries, sour berries, soft, "squashy" berries—these are shipped by the trainload from Florida to Oregon! The big red, firm, juicy, sweet, deliciously flavored strawberries—are these so rare that few persons are fortunate enough ever to have enjoyed the privilege of knowing that so fine a fruit actually exists to bless the world? These are the kind that will pay you to grow, and no other.

Why is this so? There are many causes, but the primary one isCHAPTER 1: ECONOMICS OF STRAWBERRY GROWING

The commercial strawberry grower, therefore, must at the start consider the quality of his product and see to it that he makes no mistake in the choice of his plants, if he would find a ready market at profitable prices. But he also must take into account his weather factor, namely, Quality—his fruit of the right portion. He must have strong plants, full of the vigor that insures a fine foliage and huge masses of fine fruit, fully developed and ripened perfectly, so that the full value of each berry may be secured and the highest market price obtained.

This combination of Quality and Quantity are the prime essentials to success in strawberry production. This combination may certainly and uniformly be had in the plants we herewith offer you. We advise early orders.

Price List of Thoroughbred Strawberry Plants

Please Read Carefully Before Making Out Your Order

When 500 or more plants of one variety are ordered we give thousand rates on that variety; but we do not permit customers to combine several varieties to make the number of plants 500 in order to secure thousand rates. 50 plants are not sold at 100 rates. We leave nothing undone in order to grow the best plants possible, and the prices quoted are the lowest at which they can be furnished. When plants are to be sent by mail, add at the rate of 30 cents per hundred for this privilege. Prices given, and if plants are to be sent to Canada, Cuba or Bermuda and additional charges are made, we will insure strong, full-size plants well packed and safe on arrival. No orders accepted for less than one dozen, and no fewer than 25 plants will be sold.

EARLIEST OF ALL.—Bisexual. Medium-large, bright-colored berry, very round and full on the calyx and tapering to an obtuse point, with prominent calyx wings. A bright, verdant green and of a bright, verdant green when nearer ripe. Its qualities are good; the originator calls it extra. It is the most productive of all large varieties. I esteem it as the best of them all. This is the first time we picked the Great Scott to hear one of the pickers call to the boys who were gathering in another part of the bed: 'Somebody's pickin' berries as big as a wagon wheel.'

PRESIDENT.—As its name implies, this variety grows enormous quantities of enormous berries. The berries are rather broad and wedge shaped with a crimson-colored surface and dark yellow seeds. The calyx is light green and lies flat on the stem. The stem remains long and green long after the berries are picked, thus aiding to retain a fresh appearance in the fruit after reaching the market. The berries are only quarts and the skin is thin, and the meat a deep pink, very juicy. It is a very popular variety for the family trade and "once a purchaser always a purchaser is the rule with this standby. This is the second year we have tried it, and since we have used our best bunches of plants in our beds, we are sure that it is the best variety as far as we are concerned. It is the thirteenth year of selection and restriction in our breeding beds, our constants being that we always advise our friends to be sure and get them for the trade they are bound to develop.

PRIDE OF MICHIGAN.—An old customer writes: Of all the varieties of strawberries we have ever grown, the Pride of Michigan certainly stands at the head of the long and colored race, and is the most productive of our market. The color is scarlet with bright-red checks—one of the highest colored berries we have seen. It is our hope that our originator, Mrs. Scott, will continue to produce this variety and to perfect and harmonize such delicate colors as appear in this great fruit, and it is quite as impossible for a written description to tell of its fine qualities. We have planted millions of plants, and this millon plus one is the pride of the nursery this year. We have been hearing from letters we are receiving from customers who have used it, we know from their experience, and we are the winner in all sections of the country. We are glad to say that this is the first year we have had this in our fruit beds, where the most careful selection has been made.

HERITAGE (New).—Last year was very much impressed with the performance of this variety, and realizing that there exists such a great demand for late varieties that produce bumper yields of big red berries we grew under long-distance shipping we knew our customers will find in Heritage a berry that will fill their highest ideals, both as to quantity and quality of fruit. We have therefore included this fine variety, which has greater excellence and harmonize such delicate colors as appear in this great fruit, and it is quite as impossible for a written description to tell of its fine qualities. We have planted millions of plants, and this million plus one is the pride of the nursery this year. We have been hearing from letters we are receiving from customers who have used it, we know from their experience, and we are the winner in all sections of the country. Another customer writes: The berries lie in windrows and the heavy, dense foliage spreads out wide enough to shade them. It is a splendid shipper, as the fruits are large and firm, and settles well in boxes. It is a variety of the class of its own. For six years we have had it in our fruit beds, where the most careful selection has been made.

OSWEGO (Very Late).—An extra large broad-shaped berry of a glossy dark red color, and generally considered one of the center of the finest of the market. It is a berry that will stand cold, and is strong as a shipper, qualities which make it a popular variety among many extensive growers. Its fruit red and large, and its leaves remain fresh and green. The calyx joins the berry in such a way as to form rather a long neck, drooping over the latter in the form of a pointed cone, and the berry is rather large. The size is not increased by more than a small degree, and holds the clusters of berries out in full view. The surface is a glossy red, and the fruit is very firm. The quality of the fruit gradually pulls them down until the berries rest on the clean mulching. This makes picking an easy job, but selling the fruit is still easier.

GREAT CROPS OF STRAWBERRIES AND HOW TO GROW THEM

STRAWBERRY CULTURE.—How to grow strawberries. For farmers, market gardeners, village people and small or large homesteaders. Precede by a brief description of the strawberry. This work is to teach beginners all the various details and methods by the study of the following page. Strawberries may be assured. 50 cents postpaid, or will be sent free on request, with an order for $10 worth of strawberry plants.
SOME SPLENDID NEW

STRAWBERRIES

We are greatly pleased to offer our customers some new strawberries of real merit, an improvement over many kinds being offered by other dealers and growers. We find it pays to grow only the best for big returns and good results. You must grow good varieties to succeed. It is absolutely necessary to do it or you fail, no matter how good your ground or how much care you give your plants. The plants we offer are the best varieties that can be obtained. We try almost all kinds. We have to do it to find out which are the valuable ones and then offer those only that prove valuable, thus protecting our customers from a long list of varieties, half of which are absolutely worthless and a waste of time and money to plant. The varieties we offer have made our customers money. If you will let us do it we can furnish you plants that will make money for you and give you results that will open your eyes. Are you willing? It costs no more to plant our good reliable plants that you can talk on than others, besides, you then have the assurance of success.

If Strawberry Plants are desired by mail, add for postage 10c., to the dozen price, and 60c. to the 100 price.

THE GRAND STRAWBERRY

"BIG VICTOR"

(Mid-season to Late—Perfect Flowering)

Although the Big Victor has only recently been offered to the public, yet it is already world famous from the superlatively flattering reports in the horticultural press from the experiment stations and from strawberry critics to whom a few plants were given for trial. It has been thoroughly tested in many parts of the country and has given universal satisfaction for shipping and home market, as well as for the family garden. The berries of the Big Victor are magnificent and of immense size—very firm, and so large a berry. In general it is broady heart-shaped, without neck; occasionally fruits will be found shaped as if two berries were joined together. Flesh red to the core, of delightful aroma, rich, juicy and luscious. The seeds are but slightly embedded, which adds to its firmness. The color is of a rich, dark glossy scarlet. Colors uniformly all over, no white blotches nor green tips, and its large green calyx greatly adds to the attractiveness of the fruit. In productiveness it is truly a marvel, both in size and quantity. The splendid large berries are borne on stiff, stout stems, ripening in succession for a long period, from mid-season until the very latest, holding up its size to the last and every berry coming to maturity. The plants of Big Victor are remarkably vigorous, healthy and hardy, throwing out strong runners. The foliage is of the largest and thinnest, entirely free from scald or blight. Price, doz. 35c., $1.50 per 100, $10.00 per 1,000.

Pine Apple. (Perfect.) This makes the third season we have offered this valuable new strawberry and have as yet failed to hear a single complaint. If you have not yet planted it send your order at once. It has a rich pine apple flavor. Think of it, Strawberries, Pine Apples—could there be a more luscious combination of flavors? It is within itself three-fold pleasure—look, smell and to eat. A vigorous grower. Berries large size, round and well shaped, beautiful crimson color, about same firmness as Haverland. A perfect bloomer and an abundant bearer, valuable alike for both home garden and market. Its great beauty and decided pine apple flavor make it a variety that commands a higher price on the market than the ordinary strawberry. We have fine plants of Pine Apple and we will send only fresh dug ones so you will surely succeed. We hope we may have an order from each and every person receiving our catalogue for Pine Apple Strawberry Plants, for it will be an advertisement for us that will do us good. In view of this, we are offering them at a very nominal price for a variety so valuable. Price, doz. 35c., $1.25 per 100, $6.00 per 1,000.

Corsican. (Perfect.) A distinct new variety of value for market and home garden. The fruit is dark crimson color, rich and delicious flavor, large size and quite firm. The foliage is perfectly healthy, making large plants that will protect the fruit from diseases. It is a good grower, making the right number of plants and an enormous yield of the finest, largest berries imaginable. Our customers are highly pleased with this great berry. Corsican is a wonderful berry. It is a great pleasure and very profitable to the grower. This variety sells at the very top price. Corsican is not only big; it is a beautiful color, a great yielder, a good foliage to resist disease and drought and even weeds and neglect, but such a variety as Corsican should not be neglected if possible. Do you want big berries? Then plant Corsican.

Marie. One of our largest berry growers writes us that our Marie Strawberry is "beyond doubt the most prolific and profitable berry in existence to-day. In yield we will put it up against any new or old variety. In point of beauty and general appearance when placed on sale, it has no equal." It was grown from seed of Crescent, fertilized with Cumberland. As a seeding it showed great promise. We planted for field culture as soon as sufficient number of plants were obtained and as yet have failed to detect any weak points in the fruit or plant of this grand variety. The plants are good growers, making plenty of runners for a good crop and show no signs of disease. The blossom is imperfect; season same as Bursach and Haverland. It is the most attractive in appearance when picked and ready for market of any in our entire collection. The berries are round as a bell, dark crimson in color; flesh dark and quantity, flavor delicious, holding up in size to the very last picking.

Price, doz. 35c., $1.00 per 100, $5.00 per 1,000.
HIGH GRADE STRAWBERRY PLANTS

If wanted by mail, add 10c. per doz. and 50c per 100.

WHEN TO ORDER—Order early by all means, while the plants are in a dormant condition, before they commence to grow in the spring; they will ship better, stand more neglect and rough usage, and will start off better when set out. Allow time enough before you need the plants, so that if we are crowded and you should have to wait a week or two, it will not inconvenience you. The best result is to order a week or two ahead, and state the day you wish them shipped. Another advantage in ordering early is that our stock is complete and you are sure of getting all your order filled.

GUARANTEE.—We guarantee our plants true to name, well-rooted and from new beds that have never fruited; if they prove not to be so, we will replace them free of charge. While we do not claim to raise better plants than anyone else on earth, we do claim that we raise them better than some, and as good as the others.

Moore’s Earliest of All Strawberries

The most valuable product of the age. The most wonderful and remarkable large berry ever introduced. Absolutely the earliest large strawberry in existence. Immense size, prodigious yield, delicious flavor. Plant strong, luxuriant and healthy. Flowers bisexual.

Has Produced 16,000 Quarts to the Acre

Every market gardener who plants it largely is insured handsome profits. On account of its beauty and extreme earliness it always commands the very highest market price. Its extreme earliness is due to its hardness, the buds forming late in the fall, and remain unfroasted through the winter cold or early spring frosts—a remarkable thing but true. The blossoms are produced before the leaves in the spring, and are not affected by any frost during the winter, however severe. This valuable variety does remarkably well on poor, thin land, while on heavy soil the yield is simply prodigious. In our vicinity they usually commence bearing about May 5th to 8th, and continue producing large, beautiful berries of delectable flavor long after all early sorts are exhausted. The plant is a good strong grower, with dark green foliage and nearly rustproof. The fruit is perpetually abundant, even in light soil; the fruit is borne on long stems of large size and of a most brilliant scarlet color. The flavor is slightly tart, but very good, a grand berry for the private gardener, chef, and market gardener, as well as for the pure fruit market. It is a fine color and general excellence making it a fine dessert fruit. It is especially adapted for long distance shipping and we especially recommend it to southern growers. Every season we plant 100, north, south, east or west, should plant it. Prices for 101: Doz. 30c, 100 $1.00, 500 $3.50, 1,000 $6.00. Add 10c. per doz. If to be go by mail. Special prices will be quoted on lots of 5,000 and upwards.

Warfield Prize (Bi-sexual; early to late)

Regarded by the great strawberry growers as the best variety for general use, either for the family or for market. In the New York market it commands a higher price than any other, owing to its uniform size, delicious flavor and handsome appearance. In a two-acre plot of it we could not find a malformed berry; every one was perfect and as even in size and form as if turned out of a mould. It ripens uniformly, not a green tip ever to be found on it; the color when ripe is a glossy crimson scarlet. It is medium in size, juicy and solid to the centre and of a delightful flavor; in fact, this is one of its excelling merits and is the cause of its having been in demand by the finest hotels and private families in New York since the fruit was first sold there. It is an all-season berry, ripening early and bearing late, perfecting its fruit to the last berry as perfectly as the first. It is an abundant bearers, yielding as much per plant as the most prolific, and on account of its prolonged fruiting is more valuable than those which perfect their crop in a shorter period. After a close study of it for the past two years, we are convinced that it has no rival as a good all-around strawberry for the family or market— one that is certain to give satisfaction. Doz. 40c., 100 $1.50, 500 $4.00, 1,000 $7.50.

BEST IN 22 YEARS

FRED. MARING, P. O. Box 301, WASHINGTON, writes: Your Boston Mammoth White Plum Celerity is the best I have grown during the past twenty-two years.

TWO WEEKS EARLIER

PAUL CRESS, PHILLIPSBURG, N. J., writes: Your Moore's King of the Early Tomatoes were two weeks earlier than the Earliana.
GOOD THINGS FOR THE POULTRY KEEPER

NEW CHINESE WINTER EGG BEET

Thrive on any soil and anywhere in the United States, and is the most valuable winter egg-producing poultry food known. It is especially valuable for feeding chickens that are confined to small enclosures and to such a place should be fed the year round. The crops in the same as in ordinary field or garden beets. The beets and tops are eaten with great relish by all kinds of birds. It will be found a wonderful egg producer, the year round, as well as the cheapest and most valuable winter food. It will enable you to cut your grain rations in one-half. Four pounds will plant an acre. The roots can be preserved during winter same as turnips or potatoes. Culture same as for garden beets, the yield per acre may easily exceed 1,000 bushels. The flesh is a pale golden yellow, and it is the most nutritious and most nutritious of all beets. It is likewise an excellent sort for the kitchen garden. Plant about the same distance as for garden beets. It is not only a wonderful egg producer, but it is a wonderful health promoter as well. Price, 5c. oz., 10c., ½ lb., 30c., lb., $1.00.

BELGIAN POULTRY BEET

The cheapest and best form of green food for poultry. Will thrive on any soil and respond wonderfully to liberal manuring. One-half the tops of the beets are greedily eaten by the latest kinds of poultry. In Belgium, where the production of eggs and the finest flavored poultry is produced, this beet forms a large part of a daily ration. It also keeps the bird in a stupor of condition. Green food should always be fed in conjunction with grain and meat. Feed this beet can be cut in half or less by feeding this wonderful fare. This beet of poultry fed on beet top is remarkably sweet and tender, while the egg is greatly increased. If you grow poultry for pleasure or profit, and no matter whether your flock be large or small, it will pay you to grow liberally of this wonderful plant. Show in 4¼ feet apart, thin to 6 inches. Cut tops off inches from the ground. The beet will sprout out again and produce several crops in succession. Oz. 10c., ½ lb., 30c., 1 lb., 50c., by mail postpaid.

"THE MARKET GARDENER'S PERFECT PLOW"

This is the verdict of thousands of gardeners and farmers who use it, and say they would not part with it for twenty times its cost, if they could not replace it. The variety of attachments which can be used, fitting it for cultivation of all crops, makes it indispensable to the progressive farmer and gardener. It makes a first-class rooter for taking out celery, beets, carrots, beets, sausages, parsnips, etc., by simply removing the mold board.

Description of Attachments

Fig. 4, in cut, is a Dixon sweep, for splitting out middles. Specially adapted for light work. Price, 60c.

Fig. 5, in cut, is a corn and vegetable scissor or scissor, which can be used alone or with any of the single moldboards on plow. It does excellent work. Price, 60c.

Fig. 6, in cut, is our double moldboard and point, is used for opening furrows, and can be attached to the standard by removing the point and moldboard. Used for making drills to plant potatoes, corn, etc., for making ridges, plowing out between rows; as it throws the earth both ways, doing the duty of two single mold plows. It also is good for digging potatoes. Any practical farmer or gardener will quickly see the immense value of this attachment. Price, $2.50.

Fig. 7, in cut, is our cutter share or sodbuster point. Very popular. Price, 50c.

Fig. 8, in cut, is our potato digging attachment. Very effective for the purpose. Price, 50c.

Our truck, No. 1-A and No. 1-B molds (Figs. 1, 2 and 3 cut), together with an extra point and wrench suitable for all bolts in plow, are given to every purchaser of our No. 1 Plow, both Regular and Patent, free of charge.

DIAMOND STEEL GLASS CUTTERS

An Indispensable little tool which every Florist and Market Gardener with glass should have.

In these glass cutters we are offering a more durable and convenient tool than any other now on the market. Every wheel is carefully tested and ground by special process. Preferred by many to genuine diamond for cutting glass.

No. 16.—Rosewood Finish Handle, Turret Head, containing six Cutters, $1.50.

No. 20.—Putty-knife handle, polished and nickel plated, Turret Head, with six cutters, each 35c. Mailed postpaid.
Horse Radish and Coconot Graters

Will grate from 10 to 15 pounds an hour of Horse Radish, Coconot or similar substances. They are easily operated by one person, who turns the crank with one hand and holds the root with the other hand, against the revolving cylinder. The grated material falls into the drawer, shown in the cut. We furnish the machines with two kinds of cylinders, the cheaper being covered with heavy perforated tin; the better has a wooden cylinder studded with steel pins.

**Hot Bed Sash**

Made of the best wood, 2 in. thick, sash 3 ft. 2 in. wide by 6 ft. long. Plain, unglazed, each, $1.10; Glazed, sliding glass, each, $3.75; Glazed, putty glass each, $3.50.

Price on glazed sash includes painting. If glazed sash are to be shipped by freight or express, please add 10¢ per sash for factory packing charges.

**Excelsior Hot Bed and Cold Frame Mats**

Eureka Seed Drill

"Burlap" Mats. Best quality, size A, 10 x 76 inches, $1.00 each, $11.00 per doz.; size B, 76 x 76 inches, $1.35 each, $14.00 per doz.

"Waterproof Duck" Mats. These are filled with cotton and wool and quilted the same as the "Burlap" mats described above. The "waterproofed duck" cotton cloth on one side sheds water and prevents them from getting "socked" through. Best quality, size C, 20 x 76 inches, $1.50 each, $16.00 per doz.; size D, 76 x 76 inches, $2.00 each, $22.00 per doz.

The Eureka Garden and Hot Bed Seed Drill

You've Wanted it a Thousand Times

Works better and faster than hand work. It opens the furrow, drops the seed and covers. HAVE YOU A HOT BED? It is the only machine suited to sow in a hot bed. Sows up close to the sides in straight rows. Sows the smallest packet of seeds as well as a large bulk. By using this drill you save seed, you save time, you stand in an upright position, the work is easy, you get better plants. Price is only $1.00. Delivered by express, $1.50.

MOORE SEED CO., PHILA., WHOLESALE CATALOGUE FOR MARKET GARDENERS AND FLORISTS
You Must Spray to Save Your Trees, Fruits and Crops

"AUTO-SPRAY" No. 1
A SELF-OPERATING OR AUTOMATIC SPRAYER

A practical machine for spraying potatoes, tobacco, small fruits, vineyards, green houses, poultry houses, etc. Also excellent for whitewashing and disinfecting buildings, etc.

"Auto-Spray" No. 1 is the strongest, most useful and most generally used of all spray pumps. It will do all that our spray pump can do, and in most cases it will do the work quicker and better. It has superseded the bucket and knapsack sprayers, which require constant pumping and is positively and absolutely safe against all defects.

No work to operate the "Auto-Spray." The user simply holds the nozzle and aims at the object to be sprayed. With a few strokes of pump, nearly 200 of these sprayers are now being used with extreme satisfaction.

The "Auto-Spray" No. 1 has many improvements over all other styles of equipment. We believe it is in every way a better design, and it is practical and durable that a safety valve is not required. We recommend the brass tank as containing the purest and most unadulterated water. It is produced and produced with care.

When desired we furnish brass extension pipes in two-foot lengths for sprayling trees. The usual equipment for tree work is three lengths, and the price is given below. With every "Auto-Spray" is supplied FREE OF CHARGE the most complete and up-to-date spray calendar ever issued.

Weight empty 2 lbs. (Loaded) 20 lbs. Capacity 6 to 4 gallons.

The sprayer being carried by the shoulder strap leaves both hands of the person operating nothing to do but direct the spray. The spray can be made to flow faster or slower by merely turning the cock of the spraying nozzle, and will throw either a cloud-like shower or a solid stream.

The reservoir of the "Auto-Spray" is a degreaser stem, is passed through the nozzle every time the "Auto-Pop" is closed, hence the nozzle is automatically cleaned every time it is opened.

Universal Self-Cleaning Nozzle produces a fan-shaped spray and can be quickly adjusted to any degree of fineness or convertable into a straight stream. Price $1.00.

LEGGETT'S CHAMPION DRY-POWDER DUSTER

Distributes Paris Green, Hellebore, Sulphur, Dry Bordeaux Mixture, etc., uniformly with power and rapidity of using sprayer. For farm, garden, vineyard, tobacco fields, etc. This implement has proved itself "Champion," being far ahead of any other machine in its capacity to distribute a uniform amount and requisite quantity of Paris Green or other powder, doing effective work without injuring the foliage when used properly. The dry powder is thrown as a prostrating liquid spray, will do as much work in a day as a horse-power sprayer. Will two green rows of potatoes at once as fast as a man walks. Adjustable to any width of row. Anyone can use it. Will get out 2 acres and will last for years. Weights about 6 lbs. Each machine is packed in a case complete, comprising 4 tubes, 6 nozzles, 2 strainers, 2 handles, a No. 1 reservoir, holding 4 lbs. of Paris Green (or over a quart of powder). Is made in best manner, of tin, iron, steel and brass. We give this sprayer our unqualified endorsement.

"AUTO-SPRAY" No. 3-B
FOR WHITENING AND GENERAL SPRAYING OF LARGE ORCHARDS; this sprayer is more powerful than our No. 1 Auto-Spray, and is suitable for both large and small work. No other sprayer manufactured develops great force, hence it will handle and destroy more weeds that will work in any other sprayer. The reservoir is made of heavy galvanized steel, and holds 6 gals. of water and holds a gallon of storage. The cover is reinforced and so designed that the pump may be instantly removed, thus exposing all working parts. The pump is made entirely of heavy brass, except the handle parts. There is an agitator which is operated by the handle, and which keeps the solution thoroughly mixed about the suction opening. All valves are easily cleaned— the plunger is simple and effective and easily adjusted to take up all wear. This pump is fitted with a strong discharge hose, stop cock, and two 4 feet lengths of extension pipe, with latest type of terminal nozzle. The nozzle cap is fitted with a steel insert which does not allow the nozzle aperture to wear as fast as brass. Also every siphon is furnished with each nozzle, and they may be replaced as often as necessary to keep the spray a uniform size.

The "Auto-Spray" No. 3-B is perfectly practical and convenient for spraying large trees or whitening whole orchards, and is suitable for poultry houses and other buildings. If desired, a stock solution may be mixed in a barrel and the result passed through the machine. The machine is loaded easily carried from place to place and will remain loaded. Nozzles that are mounted upon barrels or other large reservoirs, and will be found very satisfactory.

Price "Auto-Spray" No. 3-B Complete with 8 feet of Hose, Extension Pipe, Stop Cock and Nozzle and Universal Self-cleaning Nozzle, $15.00.

NEW ERA SPRAYER

Plants and Powder. It is especially well adapted for spraying poultry houses and brood- ers, and for the destruction of all lice and insects infesting them. The reservoir holds one quart. Price, $7.50.

NEW WONDER COMBINATION SPRAY PUMP

All brass; 100 lbs. in use.

This pump is Absolutely Guaranteed by the Manufacturers to do as much and as good work as any $15 Spray pump on the market, or money refunded. It has Automatic Mixer and Barrel Attachment, and makes Three Complete Brass Machines. It is the Easiest, Cheapest, and Easiest Working Spray Pump in the World. It will last a lifetime. It is fitted with a "Spray Nozzles. It is Impossible to clog the nozzle. REMEMBER: That in buying our Spraying Outfit, you get Three Complete Brass Machines (not parts), and makes Three Complete Brass Machines. It is the Easiest, Cheapest, and Easiest Working Spray Pump in the World. It will last a lifetime. It is fitted with a "Spray Nozzles. It is Impossible to clog the nozzle. REMEMBER: That in buying our Spraying Outfit, you get Three Complete Brass Machines, and as such is worth double as much as any other same kind of pump. It has Automatic Mixer and Barrel Attachment, and makes Three Complete Brass Machines. It is the Easiest, Cheapest, and Easiest Working Spray Pump in the World. It will last a lifetime.

It then becomes an agricultural smyrine or potato bug exterminator, with which a man or boy can spray 6 to 10 acres of potatoes a day. The Veterinary is a variable acquisition, as you always have it at hand, and it may many times be the means of saving the life of a valuable horse or cow.

Our knowledge contained in this book is well worth $4.00 as it gives you just the information needed; tells you just the kind and quality of whatever poison is best adapted to rid your trees and vines of the different kinds of insect pests. Price, $6.50, complete.
Crosswicks Farms Thoroughbred Pigs

Our Stock has always been and always will be our best advertisement. Few, if any, in the live-stock business, shipping as largely as we do, spend so little in advertising. A pair of well-schooled pigs, as we ship them, will do all that the best advertising can do. We guarantee all stock shipped to be strictly first-class, and as represented and as represented to the buyer. We ship all our pigs as comfortably, but at the same time as lightly as possible, and will supply food for the journey at prices named. Get a pair of pigs and you can make big money out of the investment by selling the sows for breeders.

Large English Berkshires
No breed of hogs is so warmly popular today as our extra quality, high-class LARGE ENGLISH BERKSHIRE of the best type, Sired by MEADOWBROOK BARON, $75.00, and BERKSHIRE SOW VENUS OF WOODCREST 4th, 99/256. These are a true—300 lbs. in 6 months. These are Berkshires of quality, the great money-making kind with a guarantee on every animal. This famous breed of pigs is receiving deep interest from millionaires and men who have immense farms as well as all well-do farmers who are growing for big profits and home use. We have for many years made this breed a specialty and consider that we ship specimens that are unsurpassed. With every pig sent from our establishment goes a certified pedigree which entitles each pig to registration. We will give some of the esteemed qualities of these pigs. Sows are very prolific and good sucklers. They at all times breed remarkably true in color, markings, etc. They are uniformly healthy, with high vital powers, fitting well for themselves. Young pigs are very active, energetic, and grow rapidly. They may be fattened and marketed at any age. Their flesh is of the very highest quality. They are less liable to disease than other breeds. Summing it all up, they are in combining quality, constitution, prolific breeding and good weight. Prices:

Meadowbrook Baron, 103538
Single Pig (8 to 10 weeks old), $15.00; pair, boar and sow, not akin, $28.00; trio, 1 boar and 2 sows, not akin, $40.00.

Crosswicks Farms Model Chester White Pigs

Are invaluable on account of their large size—they readily weigh 150 to 200 pounds at 5 to 6 months old, 500 to 600 pounds at 12 or 14 months, 800 pounds even not being an unusual weight attained by well-fattened old porkers, 1 fine form; ready fattening qualities—as they can be fattened for market at any age, and may be fed to any reasonable weight desired; good bacon; flesh rating as A1. Doellity and prolificness; they are gentle, quiet and easily kept. Fatten easily, are very healthy, next fine-grained and sweet. Chester Whites are a well and thoroughly established breed, well-defined characteristics, to which they breed very true—as true as the Berkshires or Poland Chinas. We have shipped pigs to almost every state in the Union, and everywhere they prove the very best sort of an advertisement, procuring for us many of new customers. The Genuine Chester Whites, such as we ship, have the following prominent characteristics: Head very short and broad between the eyes; ears medium and projecting forward; neck short and thick; joints large and full; body length, deep and “well-ribbed out,” giving ample room for large, sound lungs; back broad and very straight; hams large, full and deep, with fine bones; legs short and well set under the body, of sufficient strength for bearing the heavy weight; hair perfectly white; skin fine and thin; tail neat and small in proportion to size of body. The accompanying cut of the fine pair “King of Chester County” and “Chester County Model of Perfection,” is drawn from live by an artist, visiting the farm for that purpose. Price: Single pigs, 8 to 10 weeks old, either sex, each $12.00; pair, boar and sow, not akin, $35.00; trio, 1 boar and 2 sows, not akin, $53.00.

The most useful dog for all purposes, possessing great intelligence, and remarkable for being most easily taught. A properly bred Collie thinks and acts for himself where it is necessary to know and do something. They are very hardy and always on the alert, while their intelligence is really marvellous. At one year old they are able to perform full duty, herding sheep, cattle, swine and other stock, attending them all day when necessary, keeping them together and where they belong, and driving off all strange intruders. They learn to know their master’s animals from others in a very short time, and a well-trained dog will gather them home and put them into its right stall. They have a dainty carriage and fine style, poodle-like hair of various colors, bushy tail, carried low, ears small and semi-erect, head long and sharp. No farm should be without one or more of these highly useful animals. They also make valuable house-dogs, being ever watchful of and great favorites of children. Both our stud dogs and breeding bitches are all pedigreed and have bred for their progenitors the most famous champion, prize-winning English Kennels. The latest importations have been selected with care for the excellent qualities they possess individually as to disposition and head qualities, also all up-to-date champions have been imported into their lineage. Thus our customers may depend upon getting practically everything good to be had in this most useful of all dogs. All our puppies are entitled to registry in American Kennel Club Stud Book. Price: Males, 6 to 8 weeks old, $8.00; females, not spayed, $7.00. Stock one year old, well trained, $50.00 to $30.00.

In the event of a customer buying two or more dogs, we can guarantee to furnish two pigs. Our breeding records are very carefully kept and we can always supply stock not related.
